**MEDICINES MADE FROM ROOTS AND HERBS**

In the good old-fashioned days of our grandmothers they depended upon medicines made from the roots and herbs of the field to cure disease.

Lydia E. Pinkham's Vegetable Compound, that standard remedy which is made from roots and herbs for woman's ills, had its origin in this way. For thirty years it has been redeeming its promises written on the label of every bottle by curing thousands of women of feminine ills. It's a good honest medicine.

**WE'LL GET HIM YET**

**Weather Man's Latest Stunt Was to Wash Away the Old City Water Wagon.**

**GENN REFUSES THE BLAME**

Intending to wash up the old city water wagon for the Centennial day parade, Street Commissioner Genn placed it in the river, near the Municipal electric light plant, Monday. Then "Doc" forgot all about his wagon, and then Tuesday afternoon when the river began rising "Doc" went after it.

The old "boat" by that time was far out in the river in six feet of water and beyond reach. Yesterday the wagon was hanging over the dam at Main street where it had floated from the light plant. It was a picture of distress, according to witnesses. This morning the old relic was nowhere in sight and city officials are charging "Doc" Genn with its loss, although he refuses to assume the blame. He says that ——— Weather Man is responsible.

More than fifty years ago this wagon was purchased by the city, it being the first ever in Wayne county. It was of the type having one large and one small end with a long horn like sprinkling device. Fall Festival men were greatly disappointed at losing such a good float. Believe it is a good "float."

## HOW'S THIS FOR STYLE?

Fur Trimmed House Gowns the Very Latest.

OF OLD ROSE SILK AND OTTER FUR.

Fashion says that house gowns this winter are to be fur trimmed. But what will the specialists say to the low cut bodice edged about the throat and finished with a fur Dutch collar. These collars are the height of style, by the way, and are fascinatingly becoming when fastened in front with cute little animal heads.

The gown illustrated has such a neck finish of otter fur, which belt also makes the band at the bottom of the skirt and edges the sleeves. The design of the gown is very simple, a peasant bodice joined to the skirt with a shirred girdle. But the sleeve and skirt trimmings give color and distinction to this model, which stamp it Rue de la Paix. These trimmings are of the new Turkish embroidery picked out with bits of mirror and colored glass used in combination with colored silk. The gown is a Paul Poiret model, a Parisian dressmaker who delights in touches of brilliant color on his creations.

**Queen's Curious Perquisite.**  
King George has the right by statute to the head of every whale caught on the coasts of the kingdom. The tail of the whale is Queen Mary's perquisite, the object of this curious division being that her majesty shall always be well supplied with whalebone, although, singularly enough, the whalebone is the king's half.

**Dainty Nightdresses.**  
Here are three examples of dainty nightdresses. The first will probably be found the easiest to make. The bodice part is entirely formed of embroidery by the yard. Two edges of the two pieces of embroidery are joined up the back and part of the way up the front, the sleeves put in and the whole joined to the skirt by a broad band of beading through which a soft wide ribbon is run.

The second example is much plainer in appearance and is made with lace

motifs buttonholed to the material and the muslin cut from under them. The neck, sleeves and waist are finished off with beading and ribbon. In the third illustration there is a good deal more embroidery in eyelet hole design. The flower sprays are, too, formed of eyelet holes. The stems and leaves being in stem stitch, and a band of drawn work divides the yoke of embroidery from the skirt of the gown. The neck and sleeves are edged with buttonholed scallops through which ribbon is run.

Liberia, the West African negro republic was founded mainly through the efforts of American Quakers, organized under the title of Pennsylvania Colonist society. The chief bar to the development of Liberia is a law by which white men are not allowed to hold property in the country. Capital has, therefore, gone elsewhere and Liberia possesses none of the resources of modern civilization.

Tomatoes packed in peat and sawdust go from Toronto to London in good order.

## FASHION'S FADS AND FANCIES

FLORENCE FAIRBANKS.

The vogue for black velvet seems to have reached its height. It edges the filmy materials of evening gowns. A broad band of velvet is used at the hem or to gather in the fullness of a tunic. This note is repeated on the sleeves that might suggest too little strength of weave to sustain the weight, but it can be done with safety and undecidable effect.

Black velvet with lace is another charming combination. Spanish lace, in white, black or colors, is relieved by stripes and panels of velvet that gives a rich body to any filmy gown and affords contrast in texture. In the form of rosettes, girdles or pipings the use of black velvet is without limit. Black velvet is also used extensively for sashes, either fringed or without fringe.

The latest French fashion is in striped goods, fine stripes of white on pink or blue on green, or black on white. The stripes themselves are used as trimming on morning or tailored dresses by using the fabric with the stripes running up and down for the body of the frock, and horizontally for the bodice trimming bands and the wide skirt band.

The broad brimmed white beaver hats which may be worn with drooping brim or coquettishly caught up to one side, are becoming to the average small girl. Flowers as well as ribbons are used for trimming.

The deep hem turned on the right side, is a favorite finish to the skirt. As a rule the skirt is slightly full at the hem which holds it in place, and sometimes the hem is of heavier material than the gown itself.

Extremely simple, but with a decided style, are the pumps of corded silk. The only suggestion of ornamentation is a self covered buckle of tiny dimensions at the toe, or a single small button also well covered.

The separate blouse is to be more in evidence this coming season than for years before. Many of these blouses are made with the seamless sleeves, the tuck in one form or another appearing on the sleeves.

The coat of bright cerise is popular for evening wear, and is often made in chiffon or mousseline, with self tone embroideries and a touch of black somewhere by way of relief.

The sudden and enormous popularity of somber satin hats must sooner or later result in their downfall. Too many are wearing them for the vogue to continue long.

The two-tone plaids are occupying a strong position among the new materials and offer many possibilities with plain fabrics for the fall costume.

The new high waist line will be generally outlined by either wide or narrow girdles, and in some instances merely by a well defined seam.

## THROUGH MUD AND WET BEVERIDGE'S PARTY CAMPAIGNS

(Continued From Page One.)

your flag. Do not let any partisan boss put a collar around your neck and lead you to the polls to his bidding.

Victory is in Air.  
The republicans of the twelfth district are feeling in splendid spirits. Victory is in the air, they say, and they add to the general chorus that Senator Beveridge's valiant fight in the senate is the saving element in this campaign. To begin with, the republicans of the twelfth district have their future before them. They will begin this year with zero, and below that they cannot go. The only nest egg left them by the landslide of two years ago is the joint senatorship of L. A. Grange and Noble counties held by C. W. Kimmel, a farmer near Kendallville.

He is a holdover and counts a vote for Senator Beveridge. So the republicans have everything to gain and nothing to lose in this district. The big factor in this district is the first law of nature, self preservation, operating through the human medium of Stephen B. Fleming, brewer of Ft. Wayne, a hold-over democratic state senator, and acknowledged to be the democratic boss of this district. Mr. Fleming, wealthy, cultured and affable, is not an altruist in politics. He is for one thing, Stephen B. Fleming. His interests at this particular time are wrapped up in the brewery business and he wants the county local option law amended to agree with the democratic platform of this year. To get this done it is necessary to have a democratic legislature by a large majority because Fleming remembers with not a little bitterness that the last legislature, although democratic by the grace of many things, among others the help of brewers and their funds, refused to repeal the county local option law, for which work it was supposedly elected. It is conceded this year that there will be many "dry" democrats in the legislature if it is democratic, and there must be not only a democratic majority but a "wet" democratic majority.

**Strains Every Nerve.**  
To accomplish this, Fleming is straining every nerve and exhausting every resource. He is willing to trade his shoes and burn his house to win in this fight and he is not indulging in any "stand by the party" tactics. It is conceded by both parties in this district that in order to get the democratic legislative ticket elected Fleming will trade off his state ticket and the congressional ticket. He would like to see all his party ticket successful but not at his own expense; and if he can elect a republican congressman and a republican state ticket in this district in return for a solid democratic delegation that is wet, he will do it and never shed a tear. Upon his ability to do this depends much of the legislative results in the twelfth. Can he deliver the goods? He cannot. Like all bosses he has incurred the enmity of local politicians, which will weaken his fight. Moreover every county in this district is dry except Allen county with Ft.

Wayne, and the dry democrats are against Fleming's program upon the general principles of temperance and they are against it because they do not like it to be said throughout the state that their votes can be delivered by Fleming and the brewery influences.

At the joint convention of Whitley and Huntington counties for the purpose of nominating a democratic candidate for the state senate Fleming tried to have the candidate instructed for a repeal of the local option law but the convention and the candidate bucked and after a general row the convention adjourned without Fleming's wishes being granted. This is not calculated to arouse any enthusiasm among the wets in this legislative district.

**Defiance to Fleming.**

In De Kalb county the dry democrats have sworn by the beard of the Prophet they will not permit the election of Fleming's wet candidate and they have perfected an organization which is working for the election of the dry republican candidate. Outside of these two cases there is a goodly number of dry democrats in every county who will not vote for "wet" candidates because they bear the label of democracy and numerous others who may vote but will not do any active work as they have heretofore. It is said that the overwhelming democratic victory in this district two years ago was due more to the popularity of Marshall than to any other reason and with that factor out of the fight this year a normal vote will be more nearly approximated. Outside of Allen county this vote is about 1,500 republican. So Fleming will have to capture at least 2,500 wet republican votes outside of Allen county, for it is estimated that at least 1,000 dry democrats will not vote for their own legislative candidates. Those familiar with the situation say this is impossible. Beveridge is an asset in this district and will hold in line hundreds of wet republicans who are more interested in returning him than they are in playing Fleming's game and electing Kern as a side line. Judge Heaton of Ft. Wayne, candidate for congress upon the republican ticket is another asset. He has twice carried Ft. Wayne, which is normally about 1,500 democratic.
