Lusitania	1907	45,000	26 1/2
Olympic	1910	48,000	21

(American News Service)

Belfast, Oct. 20.—An ocean steamer that will rank among the wonders of the world was to be launched today at the yards of Harland & Wolff in this city. The steamer is the Olympic and close by is her sister ship the Titanic, which will also soon be ready to take her initial plunge in the deep.

While nothing seems to be impossible with ship builders, there are many bold enough to prophesy that, so far as size is concerned, these steamers are the last word in the building of merchant ships. They are being built for the Oceanic Steam Navigation company, more widely known as the White Star line, and will ply between Liverpool and New York. The new vessels will have a displacement of 48,000 tons. They are to be 860 feet long with a beam of 90 feet and the boat deck will be more than 60 feet above the water. In both tonnage and size they will surpass the Mauretania and Lusitania, although they are not expected to do in speed. The lines of the new ships are not designed for great speed, 21 knots being the average aimed at, as against the 25 of the giant Cunarders. An immense amount of space, which in fast boats is devoted to machinery, will thus be saved for cabin accommodation. The carrying capacity of the Olympic and Titanic will exceed that of any ships afloat today by at least one-third. Each ship will carry under normal conditions, more than 5,000 persons all told.

Are Floating Hotels.

In almost every respect the new ships will be floating hotels. Dining rooms, smoking rooms, cafes, a library and even gardens are to occupy prominent positions in these wonderful vessels. There will be a cool avenue of Oriental palms, beds of roses and carnations, and arbors skillfully contrived by expert gardeners. In the winter months all these are to be protected by glass roofs. Among other interesting innovations will be a swimming bath, sufficiently deep for diving and a skating rink.

The suites of cabins are to be in their design and fittings equal to the rooms in the finest hotels of Europe, and families will be able to cross the Atlantic in almost the same privacy as in their own homes. There are to be many dining rooms, the principal one of which will be elaborately decorated and will seat no fewer than six hundred. Those who wish to take their meals on deck can do so at a "veranda cafe" situated on one of the upper decks fifty feet above the level of the water. All the cafes will be decorated in a remarkable manner. They will be fashioned to represent those of the Riviera. Exposed rafters will be twined with vines, and to complete the illusion, the attendants will be similar to those in Southern Europe.

The Olympic and Titanic will be as complete in their safety appliances as in their luxurious equipment. Each boat will be divided into upward of thirty steel compartments, separated by heavy bulkheads. An automatic device on the bridge will control all these heavy steel doors, making it possible for a single hand to close them all in case of danger.

A combination of turbine and reciprocating engines will propel the ships. It is expected that a great economy of coal will be effected by this arrangement. The crews will be the largest ever employed on merchant ships, each vessel carrying more than 600 officers and men. The displacement of each vessel when loaded will be nearly 60,000 tons. It is expected that both ships will be ready to be placed in regular service early next spring.

Brighten Up

Now is the time to do small painting and decorating around the home. For the many who do this work for themselves we can recommend "Sapelin" Paints and Varnishes.

The Sapelin Floor and Furniture Stains are easy to apply and give fine results. They are colored varnishes, imitating closely all the popular woods, such as oak, walnut, cherry, mahogany, etc. in cans from 15 cents to 75 cents.

Other lines are Gold Paints, 15, 25 and 40 cents. Plain Furniture Varnish 10, 15 and 25 cents. Enamels for Beds, Chairs, etc., 15, 25 and 40 cents. Stove Pipe enamel 15 and 25 cents. Bath Tub Enamel 25 and 40 cents.

Beneath Your Fat a Graceful Figure Dwells

Heredity, natural tendency, inaction, high living, and inactivity of the system to dispose of fatty foods are responsible for the pads and rolls of fat which gather on chest, hips, waist, chin, cheeks and neck, covering up and distorting the lithe, graceful figure beneath. To remove or prevent these unwelcome deposits—control their quantity and location without paying the price of violent exercise, dieting, self-denials or impairment of health; in short, to find one's own slim self beneath the fatty sheath—has been made possible by a noted physician, whose Marmola Prescription helped thousands of over-fat men and women to reduce safely and surely from 10 to 15 ounces per day, until natural health of the system is restored and slimmest results. Marmola Prescription Tablets, the new form of this great remedy, each contain an exact dose of the famous Marmola Prescription. Take the original prescription, they are absolutely sure and harmless. Nearly every druggist keeps these wonderful little tablets, or they may be secured direct by mail from the Marmola Co., 385 Monroe Ave., Detroit, Mich. 7c for a large case is the uniform price.

THAT MILK PROBLEM

Will Again Be Investigated to Learn if Sanitation Affects Dairymen.

HEIRONIMUS IS IN CHARGE

If dairymen operating with high class and most modern equipment are driven out of business at the price which dairymen now receive for their products, the municipal research bureau believes that there is something radically wrong. N. C. Heironimus, a member of the research bureau was authorized at the meeting on Wednesday evening to go ahead and investigate the cost and conditions under which milk is sold in other cities in Indiana. The committee took up the milk question soon after the Commons' Dairy company went into the hands of a trustee.

It is probable that an agitation for burning the leaves in the morning will be started. The bureau believes this would be better than to burn the leaves in the evening as is now the practice. For several hours in the evening the air is filled with smoke. But by burning the leaves in the morning the smoke would evaporate more rapidly than it does in the evening because there is more air stirring.

The Applan Way.

The famous Applan way, mentioned by almost every Roman writer, connected the Eternal City with all parts of south Italy. For many miles from Rome the space on each side was filled with sepulchers, many of them of persons distinguished in history. To have a sepulcher on the Applan way was equivalent to being buried in Greenwood, in New York, or Pere la Chaise, in Paris.

Household Economy

How to Have the Best Cough Syrup and Save \$2, by Making it at Home.

Cough medicines, as a rule, contain a large quantity of plain syrup. If you take one pint of granulated sugar, add 1/2 pint of warm water, and stir about 2 minutes, you have as good syrup as money could buy.

If you will then put 2 1/2 ounces of Pinex (fifty cents' worth) in a pint bottle, and fill it up with the Sugar Syrup, you will have as much cough syrup as you could buy ready-made for \$2.50. It keeps perfectly.

And you will find it the best cough syrup you ever used—even in whooping cough. You can feel it take hold—usually stops the most severe cough in 24 hours. It is just laxative enough, has a good tonic effect and taste is pleasant. Take a teaspoonful every one, two or three hours.

It is a splendid remedy, too, for hoarseness, asthma, chest pains, etc. Pinex is the most valuable concentrated compound of Norway white pine extract, rich in guaiacol and all the healing pine elements. No other preparation will work in this formula.

This recipe for making cough remedy with Pinex and Sugar Syrup is now used and prized in thousands of homes in the United States and Canada. The plan has often been imitated but never successfully.

A guarantee of absolute satisfaction, or money promptly refunded, goes with this recipe. Your druggist has Pinex or will get it for you. If not, send to The Pinex Co., Ft. Wayne, Ind.

CHAMPIONS TOBACCO FOR AMERICAN WOMEN

Gertrude Atherton, Novelist, Who Smokes, Says It Is a Pleasant Pastime.

PRACTICE TAKES NERVE

MANY USE CIGARETTES SECRETLY AND ONLY OLD TIME PERVERSION AND PIOUS ANIMADVERSIONS STAND IN WAY.

Chicago, Oct. 20.—"Well," said Mrs. Gertrude Atherton, "if you ask me, I see no reason why women shouldn't smoke cigarettes. Neither, I fancy, do many women of the better class in America, for I am sure they do it, and quite freely too, in their own homes, although, of course, they refrain from smoking in public. Most of them, though, once they have acquired the habit, probably would like to have their license to smoke when and where they please extended. And why shouldn't they enjoy the same privilege as men in that regard?"

In a Brief Visit Here.

Mrs. Atherton made those statements at the LaSalle hotel, where she is a guest in a brief stay in Chicago on her way from her home in San Francisco to the East.

"I know there is a certain stodgy, bourgeois sentiment against smoking," she continued. "I hear that club women and persons of that sort occasionally indulge in pious animadversions upon smoking women. And often some public lecturer will get up and make herself ridiculous denouncing the practice, but cigarette smoking is increasing rapidly in America nevertheless. And why shouldn't it? It's a pleasant pastime."

Some Use Them Secretly.

"I'll venture to say that many of those women who make so much fuss in public, go home and light a cigarette in their own rooms and help pass a dull evening. Surely you'll not be surprised to learn that at the houses where I am entertained in New York and San Francisco cigarettes are passed to the women with their coffee as a matter of course. And wherever women have become frank and have lost their little hypocritical nerves, you will find them smoking."

just as they drink liqueurs after dinner."

Mrs. Atherton, who has once or twice soared into the realms of those novelists, who are ranked as the "best sellers," smokes cigarettes herself, and since she is a novelist, it may be assumed that she is something on manners and customs.

Practice Also Gaining.

"Do you think smoking is as general among American as among European women?" she was asked.

"Well, it is becoming so," she replied. "You see, American women often do not smoke because they have not been brought up to it, as we say. Now on the continent women smoke as a matter of course. And I assure you, the practice, if followed in moderation, is absolutely harmless."

SAVED BY A SONG

Stamford, Conn., Oct. 20.—A canary's death song saved the life of Mr. and Mrs. Frank Elero here last night. Soon after midnight its last weak and quivering notes were but loud enough to waken Mr. Elero. He sprang up with a sense of suffocation and nausea. He was nearly overcome and fell, but regained his feet with an effort and staggered to a window.

Throwing it open, he thrust out his head and called for help. His neighbors rushed to his apartment, and found him unconscious on the floor, and his wife seemingly lifeless in bed in a room off the kitchen. The canary whose song had saved Elero, lay on its back in a cage near the range. The room was full of gas, which had been given off by the coal fire.

CHRISANTHEMUM SHOW

First Weekly "Chrysanthemum Friday" at
The Flower Shop

Every Friday during the Chrysanthemum season, we are going to offer BARGAINS IN CHRYSANTHEMUMS.

The blooms will be fine, fresh, beautiful flowers, the kind which we regularly sell for \$2.00 to \$3.00 per dozen.

Our aim in this, is to get Richmond citizens acquainted with THE FLOWER SHOP.

Beautiful Chrysanthemums 62c Half Doz.

Friday Only

No boxes, no deliveries at the price.
