

MOVING PICTURES WILL SHOW WORK

Will Be Popular Feature of
Missionary Institute at
a Local Church.

FIRST SESSION TONIGHT

FILMS WILL SHOW IN A GRAPHIC
MANNER THE SPREAD OF
CHRISTIANITY AMONG THE
HEATHEN PEOPLES.

One of the most popular features of the missionary institute that will begin at the First Presbyterian church this evening at 7:30 o'clock, will be the moving pictures used to illustrate the actual work of missions at home and abroad. These pictures as well as the other views used in the stereopticon, have been gathered from all parts of the earth by a commission of expert photographers, and will show to the audience the natives of Uganda, a transformed community, going up their cathedral; the natives of India on their way to the Christian church; a Hindoo fakir on his bed of spikes; Japanese children at their kindergarten play, etc. The machine used is of a high class, and the man who operates, Mr. Ward Everett, is an expert. The lecture this evening, "A World Tour for Young People," is to be given by Rev. W. E. Doughty, will be of special interest.

Program of Institute.

Admission is free to these illustrated lectures as well as to all other sessions of the institute. Following is the program for the three days:

Wednesday, November 2.

7:30 p. m. Mass-meeting. Stereopticon and moving pictures, "A World Tour for Young People."

Thursday, November 3.

4:30 p. m. Mission Study Classes. "Korea in Transition." "Servants of the King." "Advance in the Antilles." "Uganda's White Man of Work."

Friday, November 4.

6:00 p. m. Luncheon for pastors, officers and teachers of Sunday schools.

7:15 p. m. Conference. "Missionary Methods for Young People's Societies."

8:15 p. m. Mass meeting. Stereopticon and moving pictures. "The Young People of Many Lands."

Mrs. Austin Buckwheat Flour gives the real genuine old time flavor.

A Hearty Eater.

In a book on gastronomy appears this anecdote of the gastronomic prowess of a Swiss guard in the employment of the Marechal de Villars: "One day the guard was sent for by the marechal, who had heard of his enormous appetite. 'How many sirloins of beef can you eat?' he tentatively asked. 'Ah, monsieur, for me I don't require many—five or six at the most.' 'And how many legs of mutton?' 'Legs of mutton? Not many—seven or eight.' 'And fat puddlets?' 'Oh, as to puddlets, only a few—a dozen.' 'And of pigeons?' 'As to pigeons, monsieur, not many—forty, perhaps fifty.' 'And larks?' 'Larks, monsieur?' 'Always!'

Only One "BROMO QUININE," that is
Laxative Bromo Quinine
Cures a Cold in One Day, Grip in 2 Days

Appetite Gone

Indigestion is the Cause of It—Leo H. Fine Has the Cure.

People go on suffering from little stomach troubles for years and imagine they have a serious disease. They over eat or over drink and force on the stomach a lot of extra work.

If these people would take two MI-ONA stomach tablets or after meals stomach misery would go in five minutes and they would be a great big help to the stomach in its strain of overwork.

MI-ONA is guaranteed by Leo H. Fine to cure indigestion or any stomach disease or money back.

MI-ONA for belching of gas.

MI-ONA for distress after eating.

MI-ONA for foul breath.

MI-ONA for biliousness.

MI-ONA to wake up the liver.

MI-ONA for heartburn.

MI-ONA for sick dyspepsia.

MI-ONA after a banquet.

MI-ONA for vomiting of pregnancy.

Fifty cents a large bottle at Leo H. Fine's and druggists everywhere.

RUBBER GROWN HERE

Possibly Important Industry
May Be Introduced in
America from Asia.

NEW ENGLAND EXPERIMENT

Boston, Nov. 1.—The possibility of raising a rubber bearing tree of Central Asia in the United States is being tested at the Arnold arboretum. If the experiment succeeds botanists who are watching it say they see no reason why any owner of a rocky hillside in the eastern part of the United States should not set out an orchard of rubber trees, which would grow with reasonable rapidity and yield a hard, gummy substance which has caoutchouc as its base and in character appears to stand midway between the allied commodities of rubber and gutta percha.

The prospect, they assert, is particularly pleasing from the point of view of possessors of abandoned farms, who could in no other way make their acres so profitable. A thousand and one industries stand ready to welcome a new source of crude rubber, and this, the scientists believe, may be found in the seeds of cuttings of a little group of trees which have already made a good start in the New-England climate.

Most Interesting of All.

Of this Chinese rubber tree, botanically known as Eucommia ulmoides, a number of good specimens were secured by E. T. Wilson, an explorer in the arboretum's Asiatic expedition of 1907-1909. Of all the new things that were brought here by the expedition none perhaps is potentially so interesting as this gum producing wild tree, which, transplanted and cultivated as the apples, pears, black, privets and many other tree forms from the same region, have been transplanted and cultivated, may prove to have an economic value exceeding that of any of the earlier importation.

The examples with which the Arnold arboretum is experimenting were found at an altitude of about three thousand feet on the slopes of the great mountain range against which the Yangtze-Kiang implants itself in the neighborhood of Fang in the province of Hupeh. The latitude of the region is about 32 degrees, the climate and topographical conditions not unlike those of the mountainous districts of New York and New England.

Female spiders are much larger and more ferocious than the males and generally devour their husbands.

Royal Couple is Given Hearty Greeting at Cape Town, S. A.

(American News Service)

Cape Colony, Natal and Orange river colony, Nov. 1.—The steamer Balmoral Castle, having on board the Duke of Connaught and his party who came to attend the opening of the First South African Union parliament arrived here this morning. Later the duke and duchess landed. The Balmoral Castle, the convoying cruiser and the merchant shipping in the harbor displayed many flags. The immense crowds on the docks included Zulus and Indians, as well as whites, and all cheered enthusiastically, the forts meanwhile saluting.

The duke and duchess, who were accompanied by Princess Patricia, welcomed on the pier by Viscount Gladstone, governor-general of the South African union, and by official representatives of the Transvaal. You know as well as any one when you need something to regulate your system. If your stomach is bad and your bowels are sluggish, food distresses you, your kidneys pain, take Gladstone's Rocky Fountain Tea. Always relieves. Be well tomorrow by taking it tonight.

TEXAS MAKES MERRY

(American News Service)

Houston, Tex., Nov. 1.—To two southern cities goes the credit for originating a period of real mirth and play covering an entire week and serving to illustrate the old adage that all work makes for dullness. New Orleans with her world famous Mardi Gras celebration and Houston with her No-Tsu-Oh festival have proved that in these days of rush and busyness worry, the people appreciate an opportunity to halt and play awhile. During the second week in the next month this city will be given over to the most distinctive festival in all the country, this being the twelfth annual carnival. The entire business district is gaily decorated and by night the gorgeous electrical illumination converts it into a blaze of light. King

of the 101,000,000 acres of land in Sweden, fully 51,000,000 acres are in wood. Finland alone of European countries has larger forests than Sweden.

THE MICROSCOPE.

Proves That Parasites Cause Hair Loss.

Nine-tenths of the diseases of the scalp and hair are caused by parasitic germs. The importance of this discovery by Professor Unna, of the Charity Hospital, Hamburg, Germany, can not be over estimated. It explains why ordinary hair preparations, even of the most expensive character fail to cure dandruff; because they do not and they can not kill the dandruff germ. The only hair preparation in the world that positively destroys the dandruff parasites that burrow up the scalp into scales called scurf or dandruff, is Newbro's Herpicide. In addition to its destroying the dandruff germ Herpicide is also a delightful hair dressing. Sold by leading druggists. Send 10c in stamps for sample to the Herpicide Co., Detroit, Mich. One dollar bottles guaranteed. A. G. Luken & Co., Special Agents.

number of political parties, which has led to bitter factional animosities. In Havana alone there are no less than five parties in the field. In addition to the Miguelistas and the Zayistas there is a negro party and an independent liberal party. Then there are the Young Cubans, modeled, so its leaders say, on the young Turkey party, and still another faction, which might be termed the anti-American party, which has for its object the elimination of the hated Platt amendment from the Cuban constitution.

Scottish aviators experience difficulty in experimental flights on account of the heavy atmosphere or damp cold encountered as in other northern countries. Except in one or two summer months the cold in the air makes practice or experiments hazardous.

P. R. R. PAYS TAXES

The fall assessment of the 1909 tax levied against that portion of the Pennsylvania railroad company which is located in the county was paid on Tuesday morning to the county treasurer, Albert Alberston. The total amount paid over to the treasurer was \$18,238.24. The Pennsylvania railroad company is by far the largest tax payer in the county. The money was paid by the Second National bank as representative of the corporation. None of the other large tax payers have as yet made their fall settlement.

The kind of wood exclusively used in the manufacture of boot and shoe lasts in London is American rock maple. The wood is imported in blocks which are kiln dried before shipment and are handled loose. The blocks are purchased at so much a pair, varying in price according to sizes, and perhaps averaging about 11 cents a pair.

A monument of Mrs. Kerenhappuck Norman Turner, who rode horseback from Maryland to North Carolina to nurse her son, who had been badly wounded in battle, stands on the battle field near Guilford, N. C.

HE CURED HIS RUPTURES

How a Strenuous Old Captain Got on His Feet. His Remarkable Discovery

So Eased He Sends It Free to All Who Are Ruptured.

With two huge ruptures, one on each side, bedridden for years, perfectly helpless, an old pioneer captain of Jefferson County made a remarkable recovery which he credits to his discovery. He sends it for trial absolutely free to all. No matter how or where or how long you have been cured, just you name and address once to C. C. Collins and he will send the discovery free by mail. Do not neglect to write at once. Fill out this coupon.
