

INFIRMARY INMATE DIES OF LOCKJAW

Henry Meyers, Knowing Fate
Tries to Open His Jaws
With Penknife.

From a slight bruise on the knee which Henry Meyers, aged 74 years, an inmate of the county infirmary sustained in a fall about ten days ago, lockjaw developed, and early Thursday morning the man died after suffering from the ailment less than eight hours. Upon realization of his terrible affliction Meyers pulled out his pocket knife and opening the blade, thrust it between his teeth and tried incessantly until his death to pry open his jaws and thus relieve his condition, which all known de-

was not sufficient to break the lock. The man's tongue was immovable and he, unable to murmur a word, informed the infirmary physician and Superintendent Brumfield of his trouble by gesticulating vigorously.

Home Remedies Used.

Late Wednesday afternoon the attention of Mr. Brumfield was called to the man's condition. Home remedies were resorted to as it was not known what the man's trouble was. About 7 o'clock the infirmary physician was called. He at once diagnosed the case as lockjaw.

Meyers, who is a native of Germany had been an inmate of the institution less than a week. About ten days ago while intoxicated, it is said, he fell in a South Sixth street livery stable. About his only injury was a small bruise on the left knee. It did not trouble him in the least and little attention was paid to the wound.

It is thought the man's filthy condition affected the wound, resulting in the dread disease.

Meyers had been a resident here for several years. He had no relat-

ives so far as Mr. Brumfield is informed. Before becoming a resident of the county farm he did odd jobs about the city.

The Ocean.

Of all natural stores of water the ocean is, of course, the most abundant and from it all other water may be said to be derived. From the surface of the ocean a continuous stream of vapor is rising with the atmosphere to be recondensed in the upper regions and precipitated as rain, snow and sleet. Some eight-elevenths of these precipitates return directly to the ocean; the rest, falling on land collects into pools, lakes, rivers or else penetrates the earth, perhaps to come to light again in springs and wells.

He wanted it safe.

Townley—Your friend, the old captain, seemed to be a little bit about going riding in your auto.

Wimstrang—Yes; the fact is he is a bit of a machine equipped with an anchor and a compass. —Chicago News

The society was first organized in Wiliston church, Portland, Me., Feb. 2, 1881. It now has branches in every part of the world and a total membership exceeding 3,600,000.

The Stick Insect of Borneo.

The longest known insect is undoubtedly the stick insect of Borneo. Specimens thirteen inches in length have been captured. It is an interesting example of mimetic coloring, resembling in a remarkable manner a piece of rough stick. On the bough of a tree it is extremely difficult to distinguish between the insect and the bark.

FALSE THEORIES.

Lead to Worthless or Harmful Remedies.

Stimulating the scalp may allay the itching of the dandruff, but that does not cure the scalp. The disease won't yield to quinine or capicum nor alcohol, because it is caused by a germ or parasite. To cure dandruff the germ must be destroyed. Until recently there was no hair preparation, or dandruff cure, or hair restorer on the market that would kill the insidious germ that dries up the scalp in little scales called dandruff, and absorbs the vitality of the hair, causing falling hair, and finally baldness. Newbro's Herpicide is the only really scientific preparation to cure dandruff, prevent falling hair and baldness. Sold by leading druggists. Send 10c. in stamps for sample to The Herpicide Co., Detroit, Mich. A. G. Luken and Company, Special Agents. One dollar bottles Guaranteed.

The farm value of the corn crop of the United States is \$1,720,000,000.
