TIGHT HATS.

They Impede Circulation in the Scalp and Invite Baldness.

Ingenious men are continually contriving new kinds of shoes, new suspenders and hundreds of different kinds of braces, but so far, says the Therapeutic Gazette, no one has taken up the idea of making a hat which will hold on the head and not blow off and at the same time not bind the head all around like a constricting band.

Some men go without hats at times with the idea that the hair is improved by ventilation and sunshine. Undoubtedly this does improve it, but the prime secret is not in not wearing the hat at all. The ventilated hat will not prevent baldness if this same hat be worn tightly around the head. If a string be tied over so tightly around the danger the effect upon the circulation may be easily marked in the end of that finger. A tight hat will affect the circulation of the scalp in the same way.

Hats which are easily blown off should never be worn, as they will not stay on unless jammed so tightly upon the head as to impede circulation. All stiff, rigid hats should be very light, and one should select a size larger than the head measurement and correct the over size by inserting felt strips under the sweat band, thus giving a cushion-like effect and preventing the constriction at that portion of the scalp.

8895—A Cool and Comfortable Frock for the Little Girl.

Simplicity and comfort combine to make this garment attractive and pleasing. It will not take long to develop this neat little dress, which may be made with or without the flounce portion. A shaped facing trims the sleeve and round yoke edge. The Pattern is cut in 4 sizes, 2, 3, 4, 6 years. It requires 3 yards of 36 inch material for the 4 year size.

A pattern of this illustration mailed to any address on receipt of 10c in silver or stamps.

(Fill out Blanks in pencil and send to Pattern Dept., Richmond Palladium.)
