The Adirondack Lakes.

One of the most striking phenomena of the Adirondack region is the carrying power of the human voice in still weather upon the lakes great and small. Persons ashore easily hear the ordinary conversation of others who are so far out upon the lake as to be indistinguishable, and as a great many Adirondack visitors habitually violate the law touching the slaughter of deer all such offenders are extremely careful not even to whisper a word that might betray their guilt when rowing upon the lakes.

First Veterinary School.

As nearly as the facts can be got at the first veterinary school was founded in the city of Lyons, France, about the middle of May of the year 1761.

Since 1761 veterinary schools have spread all over the civilized world, especially in Germany, France, England and the United States of America, in which advanced countries the horse has the benefit of a fine science as that which exists for his master, man.—New York American.

Her Answer.

He—I am going to make you a present of a bracelet for your birthday. Which do you prefer—silver or gold?

She—Silver.

He—Well, which do you want?

She—Silent still.

He—Why don't you speak? I ask you which do you prefer—silver or gold?

Then he suddenly remembered that "silence is golden."

Creating an Impression.

"Is he really a great scientist?" "I have my doubts," replied Miss Cayenne. "I suspect he is one of the scientists who get their reputations by sitting down to a dinner table and saying chloride of sodium instead of salt."—Washington Star.

Her Choice.

"I believe there's good people in all denominations," Mrs. Lapsting said, "but as for myself I always go to one of the orchard ex churches."—Chicago Tribune.

A sharp tongue is the only edged tool that grows keener with constant use.—Irving.
