

## CHICAGO TO HOLD AVIATION MEETING

Greatest Airmen of the World to Compete at Lake City for 13 Days.

BY STANFORD MCFARLAND.  
CHICAGO, Sept. 7.—The aviators of the world have gathered in Chicago. For thirteen days they will spread their mechanical wings in an entertainment like a gigantic three-ring circus. Through every sort of competitive aerial maneuver they will contest through a program so vast that it has required three separate aviation fields to stage all its details. It will be the biggest air show the world has yet seen.

On September 9 the meeting will be inaugurated with the blue ribbon event of aviation—the aeroplane race for the Gordon Bennett trophy. The Gordon Bennett race is a speed affair pure and simple. This will be the fourth race for this trophy and as each race has seen the competition become more firmly established, the qualifications and conditions have been made exceedingly difficult in this one. This year the aviators who set sail in the race will face a greater strain on their nerves than in any similar contest held previously. They will be obliged to fly 50 kilometers further than normal contestants flew. The course this year being 900 kilometers, or 184.98 miles. It will be sailed around a circular course 3.1 miles in length, requiring 40 circuits to complete the distance.

For this race one field has been prepared. It is in the suburb of Clearing, west of Englewood, near the banks of the drainage canal. No admission will be charged for the initial day.

That there may be no interference with the race, it has been arranged that the two succeeding days be free of prize contests and should atmospheric conditions make the first day selected unfit for the race it will be run the next or second succeeding day.

After the Gordon Bennett race the aviators will move to Cicero Field, the regular flying field of the Aero Club of Illinois. Here for four days, September 12, 13, 14 and 15, the program will continue. If the Gordon Bennett event is run on Sept. 9, the two open days will be given to the aviators for turning up their machines and exhibiting them to the public.

The program at Cicero will consist of various contests and minor races. Altitude and duration flights will be features.

After the closing bomb is fired on the night of the fifteenth, there will be a hasty exit from Cicero. The aviators will appear next day at Grand Park, fronting Lake Michigan and lying just east of the "Loop district." Hydroaeroplanes will be the star feature of the events to be staged there. Dips to the surface of Lake Michigan, flying from the water and all sorts of aeronautic combinations have been planned. In addition cross country and cross water flights will start from and return to Grant Park and altitude and duration flights will be staged.

The Grant Park event will begin Sept. 16 and will close Sept. 21.

The most ambitious feature of the meet was finally abandoned. This was an 1,800 mile race to start from and end in Chicago and circle the cities of the middle west. As first planned, the race was to go as far west as Omaha, to touch Kansas City and St. Louis, circle through Indianapolis, Columbus, O., Toledo, Detroit and finally come back to Chicago. The official reason given for abandoning the race was lack of suitable control stations. The committee found that so many difficulties would be encountered in attempting this flight that it would practically be impossible to run it as it was scheduled.

Although to the aviators interest centers in the Gordon Bennett cup race, there are a number of other fea-

## IOWA WOMAN WELL AGAIN

Freed From Shooting Pains, Spinal Weakness, Dizziness, by Lydia E. Pinkham's Vegetable Compound.

Ottumwa, Iowa.—"For years I was almost a constant sufferer from female trouble in all its dreadful forms; shooting pains all over my body, sick headache, spinal weakness, dizziness, depression, and everything that was horrid. I tried many doctors in different parts of the United States, but Lydia E. Pinkham's Vegetable Compound has done more for me than all the doctors. I feel it my duty to tell you these facts. My heart is full of gratitude to Lydia E. Pinkham's Vegetable Compound for my health."—Mrs. HARRIET E. WAMPLER, 524 S. Ramsey Street, Ottumwa, Iowa.

Consider Well This Advice. No woman suffering from any form of female trouble should lose hope until she has given Lydia E. Pinkham's Vegetable Compound a fair trial.

This famous remedy, the medicinal ingredients of which are derived from native roots and herbs, has for nearly forty years proved to be a most valuable tonic and invigorator of the female organism. Women everywhere bear witness to the wonderful virtues of Lydia E. Pinkham's Vegetable Compound.

If you want special advice, write to Lydia E. Pinkham Medicine Co. (scientific) Lynn, Mass. Your letter will be opened, read and answered by a competent medical authority.

JULIA RING, IN "THE YANKEE GIRL," AT GENNETT SEPTEMBER 11.

tures that will probably prove more entertaining to the spectators.

One of these is a water hurdle, run by hydroaeroplanes just off Grant Park. The conditions for this event are exacting. This steeplechase race will be run over the water along the harbor. Hurdles will be raised at intervals by stretching strings between floats. The racers will be required to make two laps, starting in the water and rising over each hurdle. They will be compelled to touch the water between hurdles. The race goes to the aviator making the best time for two laps.

Other special features will include passenger carrying contests, speed contests, landing from 1,000 feet altitude and from 500 feet altitude with the motor shut off, mail delivery in a net, quickest getaway with 500 foot start, bomb shooting at a target, figure eight for hydroaeroplanes and a handicap race over the lake to the Four Mile Crib and return. Special prizes for duration will also be awarded. In all \$34,000 will be expended by the committee in paying the aviators for the stunts they perform.

There are a number of other novel features in the meet, some of which interest the aviators more than they will the general public. For example, there is an effort being made to run the entire meet—even with its thirteen day hoodoo—without a serious accident. The Aviators Association is interested in the affair. This is an organization to secure bettering conditions for aviators. One thing that is insisted on is that the birdmen shall not be compelled to fly when weather conditions are such as to make the flight dangerous.

A whole set of rules for air traffic has been adopted for the meet. They are those of the Federation Aeronautique Internationale. They provide that machines must pass to the right, that slow moving vehicles keep to the right, that slow moving vehicles keep to the right and no heavy traffic wagons shall be allowed to clutter up the aerial boulevards.

Signals, also of the Federation Internationale, have been adopted. To the aviator white is the danger signal, and this signal, violently waved on the ground, means that the birdman must fold his wings and come to earth. White is chosen as the danger signal because it is the most easily distinguished by the flyers as they look at the earth from their lofty perches.

The implicit confidence that many people have in Chamberlain's Colic, Cholera and Diarrhoea Remedy is founded on their experience in the use of that remedy and their knowledge of the many remarkable cures of colic, diarrhoea and dysentery that it has effected. For sale by all dealers.

## Amusements

### THEATRICAL CALENDAR.

Gennett Theater.  
Sept. 7.—Black Patti.  
Sept. 11.—Julie Ring in "The Yankee Girl."  
Sept. 12.—Orville Harrold.

Murray Theater.  
Vaudeville—Matinee and Night.  
Sept. 22.—Carl Morris.

The Murray.

Half of the attraction of the headliners the latter part of the week in the Murray, is the personality of the woman members of the company of two which plays on alarm clocks and curious musical instruments. She is pretty and vivacious with a charming smile and makes the appearance of this number eagerly awaited.

Funny is the depiction of the rural character, who seems to be the star of the bill, for he possesses both talent and humour and is clever with his various imitations both with and without musical instruments.

The rest of the program has variety and interest and altogether the last half of the week is as good as the first and that is saying much.

Black Patti.

The Twentieth Century colored attraction, The Black Patti Musical Comedy company, appeared at the Gennett this afternoon and evening. The great success of this company is owing to the fact that a first class performance

## "CASCARETS" FOR A SICK, SOUR STOMACH.

Gently cleanse your Stomach, Liver and Bowels while you sleep.

That awful sourness, belching of acid and foul gases; that pain in the pit of the stomach, the heartburn, nervousness, nausea, bloating after eating, feeling of fullness, dizziness and sick headache, means a disordered stomach, which cannot be regulated until you remove the cause. It isn't your stomach's fault. Your stomach is as good as any.

Try Cascarets: they immediately cleanse and regulate the stomach, remove the sour, undigested and fermenting food and foul gases; take the excess bile from the liver and carry off the constipated waste matter and poison from the intestines and bowels. Then your stomach trouble is ended. A Cascaret tonight will straighten you out by morning—a 10-cent box from any drug store will keep your stomach sweet; liver and bowels regular for months. Don't forget the children—their little insides need a good, gentle cleansing, too.

### JEFFERSON'S BONES.

He Praised Them Highly Until Dr. Wistar Saw Them.

It is said that when Thomas Jefferson journeyed from Monticello to Philadelphia on his way to take the oath of office as vice president he carried a lot of bones in his baggage. The bones, it is believed to be those of a mammoth had been found in Greenbrier county, W. Va., and sent to Monticello, where they were set up by Jefferson, who, it appears, entertained a somewhat exaggerated notion of his attainments in natural history and who stood sponsor for the bones as those of "a carnivorous clawed animal entirely unknown to science."

It was not until after Jefferson reached Philadelphia that he was informed, at first glance he learned Dr. Wistar saw that they were the bones of the common sloth, several specimens of which he showed the Virginian. Jefferson, it is related, was greatly chagrined, especially as his discovery became known as Megalonyx Jeffersoni.

It has been pointed out that indirectly no less a naturalist than the great Buffon may have been responsible for Jefferson's error. It was the Virginian's practice to send Buffon specimens and information, and with the subtle dexterity of a courtier the French naturalist wrote:

"I should have consulted you, sir, before publishing my natural history, and then I should have been sure of the facts."—New York Sun.

### The Foster Mother.

There is a story told about a hen which was intrusted with a sitting of ducks' eggs to hatch. When the young brood went down to the water she was frantic with anxiety, but the second year, when her next brood of ducklings went to swim, she was scarcely troubled at all, and the third year she would fly to a stone in the middle of the pond and from her coils of vantage watch the ducklings swim round her with evident pride. The fourth year she was allowed to hatch her own eggs, and when she discovered that the infant chicks had no intention of taking to the water she flew to the stone in the middle of the pond and clucked frantically to them to swim out to her.

### A TELLING TALE.

"That," said the professor, "is an Egyptian queen. She is at least 3,000 years old."

"My," exclaimed the girl with large fluffy hair. "I'll bet she'd be annoyed if she knew you were telling it!"—Exchange.

Rubbing It In.

Patient (angrily)—The size of your pill makes my blood boil. Doctor—Then that will be \$20 more for sterilizing your system.—Boston Transcript.

Laying the Snare.

"For whom is she wearing black, her late husband?"

"No, for her next. She knows she looks well in it!"—Judge.

There is a difference between being busy and being industrious.

### A TELLING TALE.

To all knowing sufferers of rheumatism, rheumatic or of the joints, sciatica, lameness, backache, pains in the kidneys or neuralgia pains to write to her for a home treatment which has repeatedly cured all these tortures. She will do it to you at no charge to all sufferers FREE. You can yourself as to the results which will testify—no change of climate being necessary. This simple discovery banishes uric acid from the blood, loosens the stiffened joints, purifies the blood, cures the eyes, giving elasticity and tone to the whole system. If the above interests you, for profit address

Mrs. M. Summers, Box B, Notre Dame, Ind.

### SONG OF THE WHALE.

The Humpback is a Little More Musical Than the Bowhead.

Whales are rarely thought of as vocalists, yet according to Miss A. D. Cameron in "The New North" they really have a distinctive song of their own.

A certain Captain Kelly was the first to notice that whales sing. One Sunday, while officers from three whaling ships were "gunning" over their afternoon walrus meat, Kelly started up with "I hear a bowhead." There was much chafing about "Kelly's band," but Kelly weighed anchor and went to find the band wagon. Every sail followed him, with the result that three whales were bagged.

Among bowheads this singsong is said to be the leader of the school, as he forces a passage through Bering sea, makes in order to notify those that follow that the straits are clear of ice.

Walruses and seals and all true mammals that have lungs and live in the water have a bark that sounds strange enough as it comes up from hidden depths. Every lookout from the masthead notices that when one whale is struck the whole school is "galled" or stamped at the very impact of the harpoon; they have heard the death song.

The sound that the bowhead makes is like the long drawn out "hoo-hoo-oo-oo-oo" of the hoot owl. A whaler says that the cry begins on F and may rise to A, B or even C before slipping back to F again. He assures us that with the humpback the tone is much finer and sounds across the water like the note from the E string of a violin.

### Jefferson's Bones.

The turkey lunch Saturday afternoon and evening, with Weideman's beer at Frank Puthoff's, 203 Ft. Wayne Avenue.

4-4t

### His Cure.

"I have cured myself by learning to chew my food."

"What have you cured yourself of?"

"The belief that if I remained away from the office for more than ten minutes at lunch time everything would go to the dickens."—Chicago Record-Herald.

### Forgot His "First Aid."

"But how does she know that he doesn't love her?"

"She fainted away the other evening, and he didn't kiss her before he holstered for help."—Houston Post.

### As a Last Resort.

Mother—I saw you kissing my daughter.

"Yes, but only out of desperation. I couldn't think of anything to say to her."—Flegel Blatter.

I should have consulted you, sir, before publishing my natural history, and then I should have been sure of the facts."—New York Sun.

### The Lawyer.

Wife by his wife—his mind must be clear at all times.

Neither he nor you nor any thinking person can win if wife are dulled by a headache.

### HICKS' CAPUDINE CURES HEADACHE

Take as the bark—get at the cause—heat, cold, nervousness or grippe.

Capudine is a liquid, pleasant to take; quickly effective; contains no acetanilide. Isn't it a pity to suffer with headache when you really can cure it? 25c and 50c at druggists—trial size 10c.

### SAVING MONEY.

A Dollar a Week Put Into the Bank is a Good Investment.

"It is mighty hard," said an unfortunate workingman some time ago to the writer, "to save up a thousand dollars by laying aside a dollar or two a week and then to take it out of the savings bank and lose it to a get rich quick swindler, as I have just done." The poor fellow could work and save, but he had not had even a kindergarten education in finance, else his story would have been different. He had never given a thought to interest and was absolutely ignorant of growth through compound interest and, of course, had never heard of that wonderful process of accumulation known as "progressive compound interest."

One dollar deposited in a savings bank that pays 4 per cent will amount to \$2.18 in twenty years. This is simple compound interest. Now, if you deposit \$1 every year for twenty years, or \$20 in all, the sum to your credit will have grown to \$30.97.

Any wage earner can put in a savings bank for twenty years will have increased to \$1,612. A deposit of \$5 a week will have grown to \$8,000, and this at 4 per cent will be \$320 a year. There is no secret, no mystery, about this. It is as clear as the cloudless sun, and the method is just as clean and honest."—Christian Herald.

Dr. A. L. Bramkamp has returned from a study trip and has resumed practice.
