

FEAR OF ROOSEVELT SHOWN BY HOWLING

Delegates at N. Y. G. O. P. Convention Respond to Prods of the Bosses.

(National News Association)
SARATOGA, N. Y., Sept. 25.—The spirit of the standpat Republicans rose out of the apathy of the early session of the state Republican convention this afternoon, the delegates rising to the jibes against Colonel Roosevelt and his policies, contained in the keynote speech of Temporary Chairman Guthrie, and yelled derisively, hooted and hissed every mention of Roosevelt's name. Delegates stood on their chairs, shouting their denunciation of the Colonel, while Barnes and Root looked out over the sea of excited men and waved their handkerchiefs with evident pleasure.

A few cheers for Roosevelt were drowned in a storm of hisses and Temporary Chairman Guthrie could scarcely make himself heard in the uproar. The hilarious demonstration was further heightened by a rife and drum core bursting into a rendition of "Turkey in the Straw."

References to President Taft's record during his administration goaded the delegates into a wild demonstration in his favor.

The standpat leaders of the party were manifestly pleased with this first enthusiasm evoked during the convention.

After holding up Governor Wilson as "a free-trader, a radical and an opportunist," and assailing the Democratic national platform, the temporary chairman devoted a majority portion of his speech to roasting Colonel Roosevelt and the Progressive movement. Mr. Guthrie concluded as follows:

"The way to put an end to Rooseveltism, once for all, is to demonstrate that Republicans cannot be led astray by any such scheme as Roosevelt is now advocating. Whatever strength Roosevelt now has is drawn from the radicals, socialists and anarchists who heretofore have followed the banner of Bryan."

HOW TO KILL CATERPILLARS.

Lettuce Leaves Recommended as a Diet For the Pests.

It begins to look as if the destructive brown tail and gypsy moths and the pestiferous caterpillar have been conquered at last. A simple diet of lettuce leaves, it has been found, is the easiest and best way to get rid of them. All that you have to do if the caterpillars are spoiling your shrubs and trees is to catch one or two of them and feed them on some lettuce that has been soaking in water four days. After they have eaten all they care to, turn the caterpillars loose again. They will do the rest.

The explanation is simple. It has been discovered that watered lettuce leaves give caterpillars the cholera. One caterpillar so infected quickly spreads the disease among its fellows. In Massachusetts the epidemic is spreading among caterpillars, brown-tails and gypses, much to the delight of the state entomologists, who almost despair of ever getting rid of the pests.

A caterpillar suffering from caterpillar cholera or wild disease soon stops eating, according to the explanation offered by Professor William Kellogg of Harvard. It becomes weak and lazy and usually crawls up on some object, as the trunk of a tree, a fence, a wall or other vertical surface, where it remains without motion. In a few hours there drops from its mouth a blackish liquid, the caterpillar becomes more and more flaccid, one leg after another loses its support, and finally the creature, reduced to a black skin, hangs dead, still holding on with one or two of its false feet.

Unnecessary Question.
"Poor man," said the sympathetic lady, to the brakeman with his forefinger wagging. "Have you lost your finger?"

"Oh, no, madam," replied the brakeman. "I've just left it at the manureheap to be polished up. I didn't have time this morning to wait until it was finished."—Harper's Weekly.

NEWS FOR THE FANS

World's Series Opens October 8 in New York.

(National News Association)
NEW YORK, Sept. 25.—The National base ball commission this afternoon set Tuesday, October eighth, as the date for opening the world's base ball series. The Giants and Boston Red Sox will play their first game in New York on that date.

CHINESE NOMINEE OUT FOR CONE

(National News Association)
BOSTON, Mass., Sept. 25.—Charles Shue, an American born Chinaman, who was nominated as representative to the state legislature by the regular Republican organization declared today that he is a supporter of Col. Roosevelt. Shue is 39 years old, was born in Seattle, Washington, is married and has three children.

AMNESTY OFFERED GENERAL OROZCO

MEXICO CITY, Sept. 25.—It was reported this afternoon that President Madero has offered to grant amnesty to General Orozco, the rebel leader, if he will surrender. The government claims to have direct information that Orozco has been awaiting only this offer to call off his revolution although he had previously declared that he would surrender only when Madero was driven from Mexico City.

A PUZZLE IN METALS.

Brass Has an Odor Yet Copper and Zinc Separately Have Not.

Brass, as every one knows, has an awful odor, yet the two things of which brass consists, zinc and copper, give no odor whatever in their separate states. This is a problem that has given a great deal of work to scientists. It is one as yet not entirely solved.

To arrive at the general law it has been found that almost all alloys, or mixtures of two metals, will give an odor, while the metals themselves do not. Brass is not the single example, though probably the most odiferous. The explanation is as follows: All substances, including metals, are always giving off small particles of their substance to the air—that is, evaporating. Some solids give these off so rapidly as soon to disappear. Gun camphor is a conspicuous example. To smell any substance a particle of that substance has to tickle a nerve ending in the nose. If a small particle of copper, we shall say, does this by itself, no effect is noticed, but if a particle of zinc and a particle of copper strike at the same time the effect is such as to cause a perceptible impulse to the nerve. The chance for these two to strike at the same time is given only when they are intimately mixed in an alloy.—New York Tribune.

Lesson in Scientific Complexion Renewing

(From The Family Physician)

Everyone has a beautiful skin underneath the one exposed to view. Bear that in mind and it will be easier to understand the correct principle in acquiring a lovely complexion. Nature is constantly shedding the top skin in flaky particles like dandruff, only much smaller in size. In abnormal conditions, or in advancing age, these particles are not shed as rapidly as in robust youth. The longer they remain the more soiled or faded they become—that is the immediate cause of a "bad complexion."

It has been discovered that ordinary mercurized wax, to be had at any drug store, will absorb these worn-out particles. The absorption, while hastening Nature's work, goes on gradually enough to cause no inconvenience. In a week or two the transformation is complete. The fresh, healthy-hued, youthful underskin is then wholly in evidence. You who are not satisfied with your complexion should get an ounce of mercurized wax and try this treatment. Use the wax nightly, like cold cream, washing it off mornings.

CONGRESSMAN GRAY IS HERE THURSDAY

Will Deliver Political Address at Council Chamber—Halls Are Scarce.

Unable to rent a hall in which to hold a Democratic meeting, the local Democratic workers were in despair yesterday, but today the board of works gave them permission to use the city council chamber for a political meeting Thursday night.

Congressman Finly Gray of Pennsylvania will be the principal speaker for the occasion. Other prominent Democrats will make speeches outlining their political work for the fall, and prospects for a large crowd are bright.

District Chairman Charles Beck will preside at the meeting.

Owing to the many meetings in this city this week the Democrats were unable to secure a hall, and although this is the first time the city council chamber has been used for a political meeting, the Republican administration said it would be no more than fair to give their opponents a fair deal.

RAINFALL RECORD

(National News Association)
WASHINGTON, D. C., Sept. 25.—Records for rainfall have been established in the Middle Atlantic states during the past forty eight hours and the down pour is scheduled to continue for twenty four hours more.

Baltimore reports the greatest rainfall with more than six inches, Philadelphia with second with 3.31 inches, while Richmond, Va., Atlantic City and Washington reported in excess of two inches.

SPAIN HAS STRIKE

BARCELONA, Spain, Sept. 25.—Twelve thousand of the 22,000 railroad employees ordered to strike quit work today. As fast as they left their positions they were taken by government soldiers. Attempts were made to wreck three trains but only one was successful. Eighteen persons were injured in this. The government has ordered martial law along all divisions run by the troops.

In China the ratio between gold and silver today is, perhaps, as 35 to 1. In the early part of the eighteenth century it was not more than 15 to 1.

LABOR ATTACKS TAFT

And Advocates Independent Voting This Fall.

(National News Association)
WASHINGTON, Sept. 25.—In the October number of the "Federationist," the official organ of the American Federation of Labor, the Republican party is condemned for refusing to enact labor legislation. To this criticism is added the statement written by Samuel Gompers, president of the Federation, "That Mr. Taft has accentuated his antagonism to the correction of the evils and abuse of injunctive powers."

"Independent and non-partisan use of the ballot to elect officials friendly to organized labor," is the campaign policy announced by Mr. Gompers in the article.

FELL OVER LEDGE

(National News Association)
BLOOMINGTON, Ind., Sept. 25.—While at work in a large stone quarry at Sanders, south of here today, David Smith, aged 59, plunged over a high ledge, breaking, and crushing many bones in his body. He was killed almost instantly.

FAMOUS EPIDEMICS.

In Europe in 1348 the Black Death Claimed 25,000,000 Victims. In the twelfth century not less than fifteen epidemics of disease and many famines carried off the people of England. The thirteenth century saw twenty plagues and nineteen famines, while the fourteenth had a black record of disease. In 1348 the "black plague" or "black death," which was brought into the country from the east, caused the death of 100,000 persons in London alone, while in Europe altogether 25,000,000 people fell victims to its ravages.

In 1485 the "sweating sickness" appeared in England, causing great destruction of human life. It reappeared at various intervals for a century thereafter. The last terrible visitation of the plague in England was in 1646-66, by which 100,000 lives were lost in London alone.

This epidemic was followed by the great fire of 1666, which destroyed 13,000 houses, including all the most densely populated portions of the city. The rebuilding of London with some regard to sanitary laws appears to have put the first check on the epidemic diseases that had previously devastated the population.—London Standard.

CAPTAINS CHOSEN OF Y. M. C. A. TEAMS

Will Make a Two Days' Campaign to Increase Membership 500.

The hearty good will of the business men and manufacturers is doing much toward helping along the plans for the great campaign to be waged by the Y. M. C. A., October 1 and 2.

Fifty thousand dollars has just been subscribed to the Muncie Y. M. C. A. by the Ball brothers of that city. This makes over one hundred and fifty thousand dollars in all subscribed by those men.

The captains of the local Y have selected their teams which will endeavor to raise the membership five hundred by midnight of October 2.

DEATH RESULTS IN A CONTRACT SHIFT

Delay on the part of the administrator of the estate of John Potter, deceased, who had the contract for the improvement of the Richmond and Newport turnpike, caused a special meeting of the board of county commissioners this morning. The board decided after conferring with William F. White, administrator of the estate, to transfer the contract to Tripp and Sons, of Peru. The contract calls for the improvement of North Tenth street and the road running through Spring Grove, known as the Richmond and Newport turnpike. The estimated cost of the improvement is \$32,000.

The commissioners are desirous of having the work proceed as rapidly as possible so that the fills can be made before winter, allowing the fills to settle before spring, when the work will be completed.

Sandlight Energy.
The energy released by a candle burning steadily for two full days is equal to one horsepower.
