HYOMEI RELIEVES IN FIVE MINUTES

Help Comes Quickly When Hyomei Is Used For Catarrh.

Quick relief from the Hyomei treatment for catarrh and all troubles of the breathing organs such as stopped-up head, snuffles or morning choking. Put a few drops of liquid Hyomei in the pocket inhaler that comes with every outfit, and before you have used the treatment five minutes you will notice relief from your catarrhal troubles.

It gives a tonic healing effect to the air you breathe, kills the catarrhal germs, stops the poisonous secretions, soothes the irritated mucous membrane and makes a marked improvement in the general health.

Hyomei is not a cure-all; it has but one aim, the relief of catarrh and disease of the breathing organs. When there is no catarrh, the general health is improved, for then nature has a chance to build up the entire system.

If you suffer from offensive breath, raising of mucus, frequent sneezing, husky voice, discharge from the nose, droppings in the throat, loss of strength, spasmodic coughing and feeling of tightness across the upper part of the chest, or any other symptoms of catarrh, use Hyomei at once. It will destroy the disease germs in the nose, throat and lungs, and give a quick and permanent relief.

Hyomei does not contain cocaine or any habit-forming drug. The complete outfit costs \$1.00, extra bottles if later need 50 cents. Leo H. Fife and druggists everywhere. (Advertisement)

TO AVOID TROUBLE WASH ALL BOTTLES

This is the Warning Issued By the Health Authorities.

Wash all milk bottles and avoid trouble.

This is the warning handed out by health officers here to housewives, who have been in the habit of returning milk bottles to the drivers of milk wagons without properly cleaning them. Under the new law housewives are required to see that the bottles are sterilized and probably washed under penalty.

The law makes every consumer responsible for the condition of the bottles. Should the driver care to be could, under the law, file an affidavit against any consumer who returns an unwashed bottle and the court, under evidence substantiating the affidavit, could impose a fine.

This law was enacted at the instigation of health authorities who have received many complaints about creamery and milk men about the seeming carelessness of consumers. When the bottles are not properly washed, authorities declare, the milk sours, and it is argued that in this manner sickness among babies is often started.
