

REMONSTRANCE IS FILED AGAINST DAM

Another Complaint Made to Board of Works by Roller Mills.

NEW BRIDGE FLOORING

Contracts are Let For Improvements in New Reeveston Place.

A remonstrance from the Richmond Roller Mills company against the construction of a new dam across the river below the Main street bridge, again brought this matter before the board of works this morning.

C. G. Carpenter, manager of the Richmond Roller mills near the Doran bridge, claims that there was a constant backwater because of the dam, and wants the city to prevent it from being built as high as it was last year. He says that a dam two feet lower would answer the requirements of the plants and at the same time would relieve his plant of the back water.

No action was taken on the remonstrance. It was placed on file and will be brought up when the T. H. I. and E. traction company and the Light, Heat and Power company take further steps to have the dam built.

The contract for an improvement amounting to \$18,722.50 was awarded to John Hipskind. The improvement which consists of three parts, is Reeveston, and will be built with no expense to the city. The contracts provide for the grading, graveling, curbing and filling of the street, the placing of curbs around the park places, cement walks on both sides of the streets and the filling of the parking places with good earth suitable for sowing grass. The contractor also has a contract for the construction of cement walks.

The contract for the construction of a cement alley a half a square long between Tenth and Eleventh streets, north of Main, was awarded to F. E. Slick.

Because all traffic to the hospital must pass over the Tenth street bridge, the board will take steps to have a smooth flooring replace the present rough board floor of the bridge.

The owners of the K-D Cabinet company, whose building is now under construction on Center street, petitioned the board for fire protection. The city agreed to pay for one fire hydrant which gives the company a 500-foot extension without expense. The company will arrange for the laying of the remaining 250-foot main extension.

A complaint by Dr. E. B. Grosvenor that the water works company has failed to place National Avenue in its original condition after making main repairs, was ordered investigated. The board requested the company to repair Pearl and Fifth streets in West Richmond, as it is claimed that the water works company left the streets in a bad condition, following the laying of a main in West Pearl street.

A resolution for the opening of South I streets from Eighth to Ninth streets was adopted.

The sewers failed to carry off the water from the heavy rain Saturday afternoon and the board received the usual number of complaints today. In West Richmond, 11 sewer heads were almost washed out by the rain.

Because of the complicated system of keeping books according to the form of the public utilities commission, Superintendent Nimrod Johnson, of the city light plant, will take up with the board of works Thursday the plan adopted by other companies here. The water works company and telephone company have secured the services of an expert accountant to teach the bookkeepers the new system. Pratt verified the figures in the Maury valuation of the water works company for the city, and is well known here.

The bookkeepers of the city claim that the members of the commission do not understand the system and have secured experts to explain it to them. The methods were borrowed from the public service commission of Wisconsin. Three days have been set aside when the commission experts will explain to expert accountants the method of keeping books according to the system.

There are now fourteen accounts on the books of the city light plant. These will be replaced by 128 accounts when the public service commission is in use.

The new machinery is rapidly being installed in the light plant. Two engines and generators are expected next week. Last week a large excitor was installed. The walls of the buildings are completed to the middle of the second story.

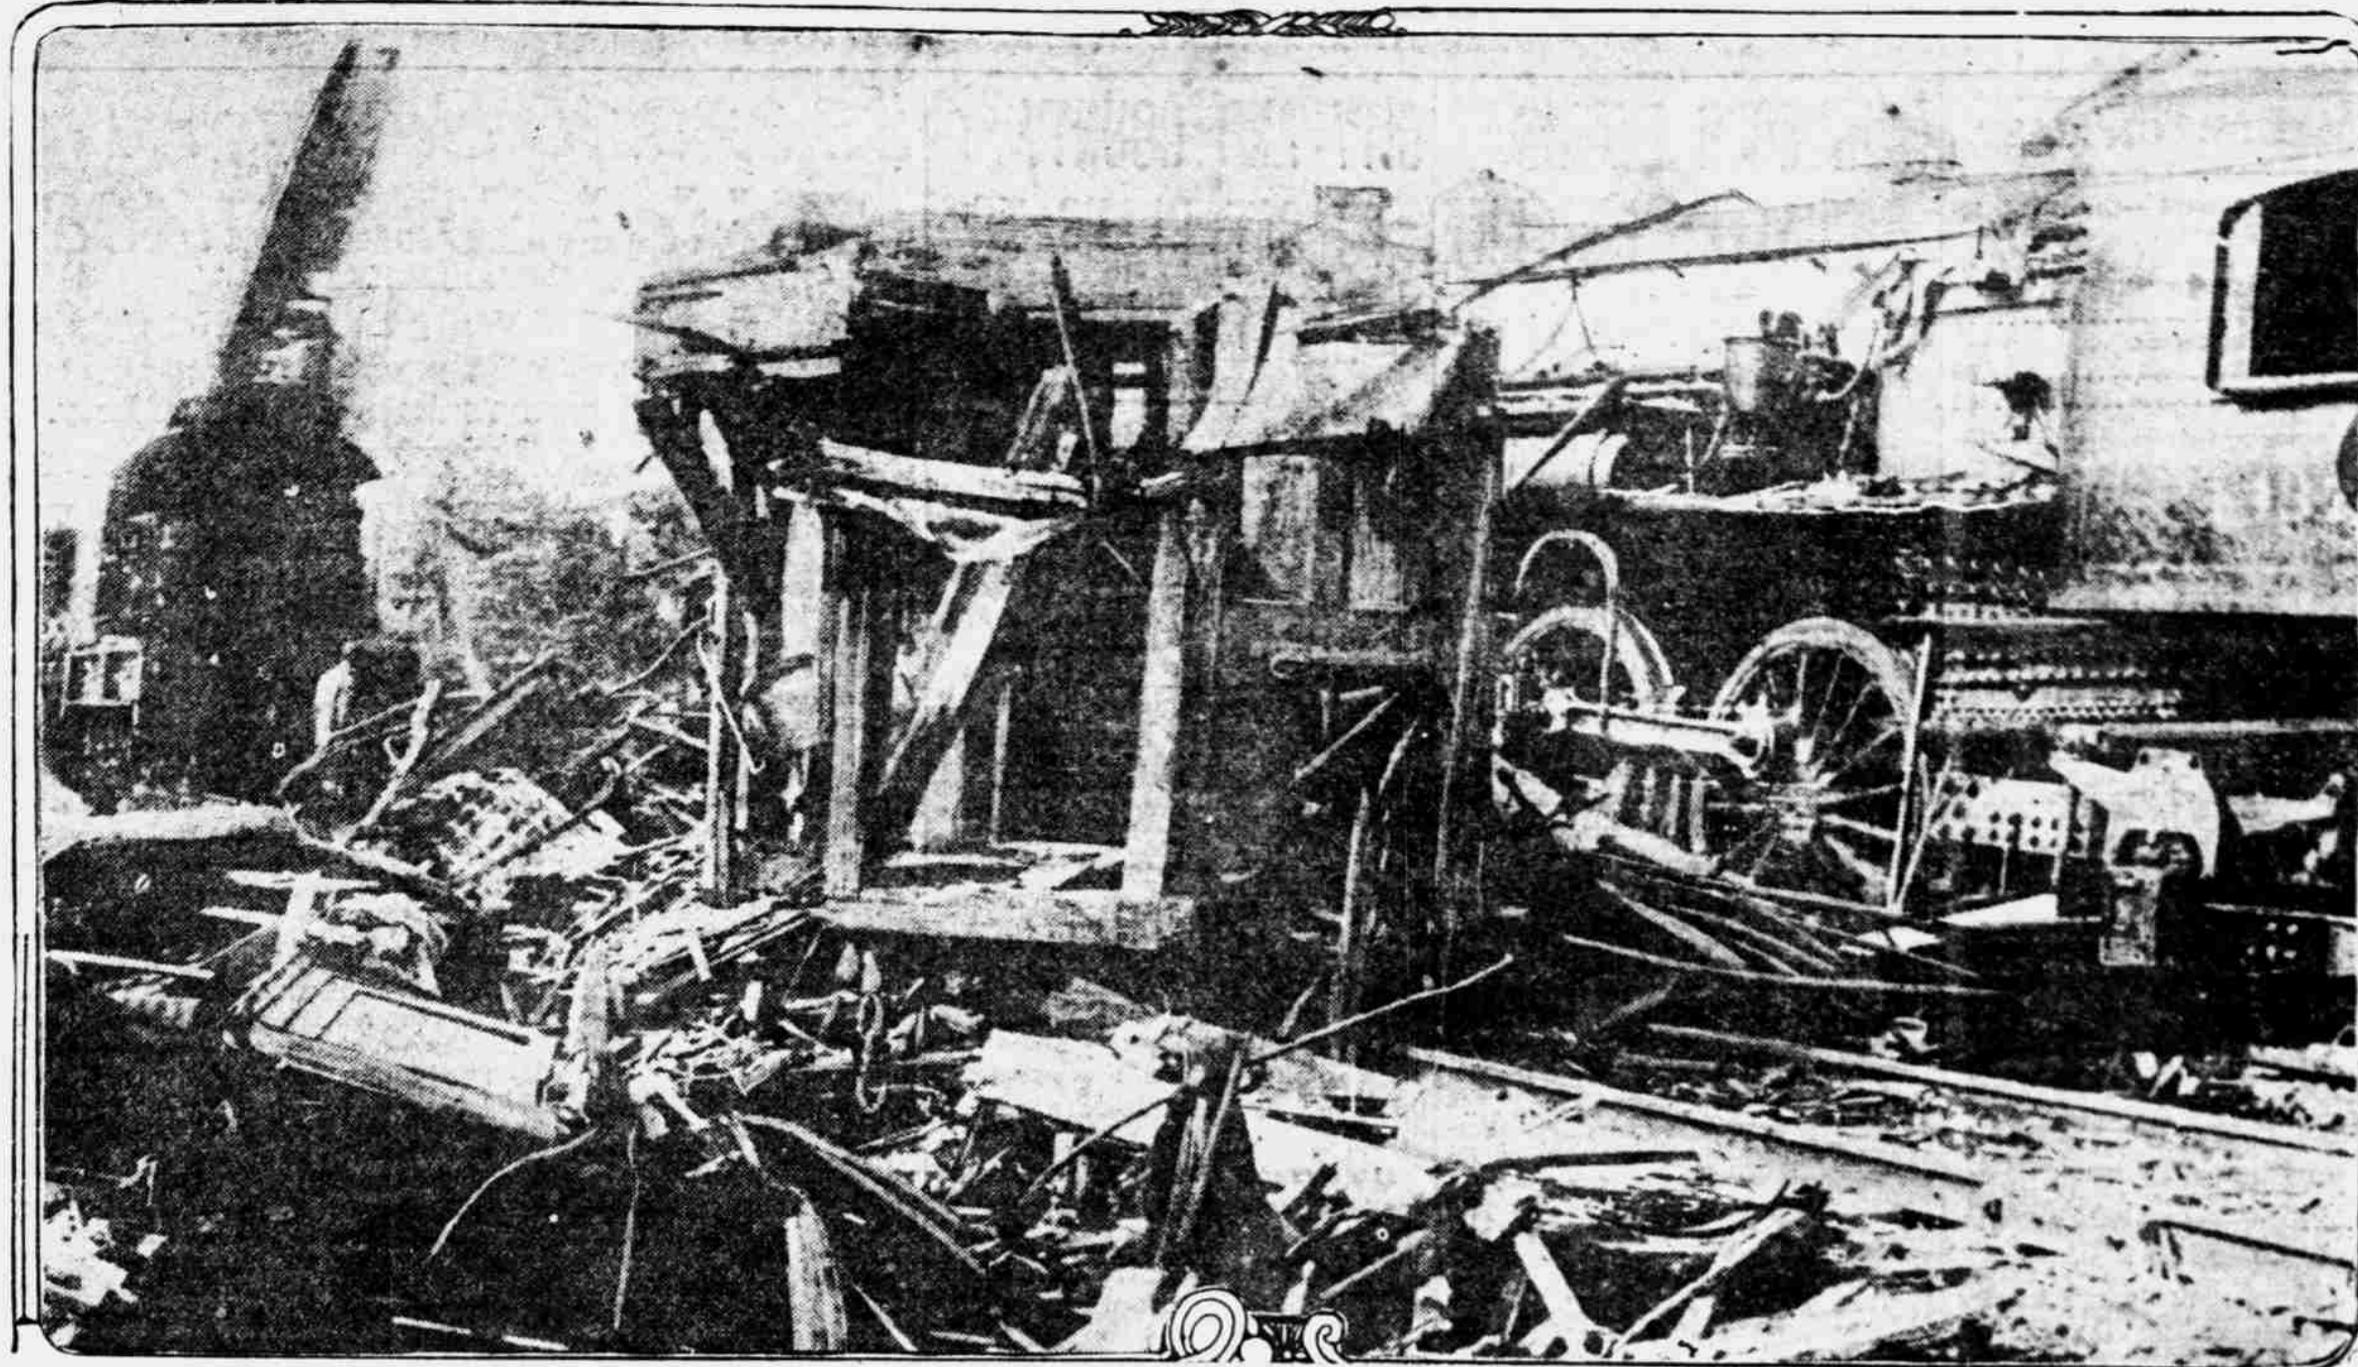

City Attorney Bond will petition the court for the appointment of an appraiser to take the value of an excitor which the city plant wishes to sell. The machine is too small for the work at the plant. Because it is valued at more than \$100, state law requires that it be appraised before it is sold.

MEETING TO FIX SALARIES TONIGHT

A special city council meeting will be held tonight for the purpose of fixing the salaries of the city officials who assume office in 1914. Appropriations for increases in the salaries of the officials were made last month, but without a city ordinance the increases would be invalid.

Many men owe the grandeur of their lives to their tremendous difficulties—Spurgeon.

Powerful Engine and the Path of Death it Plowed Through Wooden Coaches

This photograph shows the giant locomotive of the New York, New Haven & Hartford railroad, as it appeared after the wreck in which it plowed through the rear Pullmans of the Bar Harbor express at North Haven, Conn., killing more than twenty-one passengers. The side of one of the Pullmans through which the engine tore its way, is also shown in the picture. The forward part of the engine is hidden from view by parts of the two Pullmans, which were smashed into pieces. On both sides are smaller fragments of wreckage.

UNABLE TO CONQUER DESIRE FOR LIQUOR

PRESIDENT IS UPHELD

N. Y., N. H. & H. Railroad to Issue Big Debenture Bond.

(National News Association)

BOSTON, Mass., Sept. 8.—The New York, New Haven & Hartford Railway Protective committee today endorsed President Elliott's program and voted its approval of the New Haven road's proposal to issue \$70,000,000 debenture bond.

President Elliott denied the report that the New Haven road was on the verge of going into the hands of a receiver.

FIRST APPLICATION FOR WORK ON FARM

The first application for work was filed in County Agent Cobb's employment bureau by William Harris this morning. Cobb expects this to be of great benefit to the farmers, who have been commenting upon the idea. They say they have felt the need of something of the kind for some time. In connection with this department, Cobb will keep a bulletin board on which will be posted the names of men wanting to buy and sell stock, horses or farms. This service is free to the farmers of Wayne county.

DEFEAT AMENDMENT

WASHINGTON, Sept. 8.—By a vote of 53 to 53 the House today defeated an amendment to the Urgent Deficiency bill to increase from \$50,000 to \$100,000 the appropriation for an investigation by the bureau of Foreign and Domestic Commerce, of the cost of labor and production at home and abroad.

TREATING A DOG BITE.

Act Promptly and There Is Little Danger of Hydrophobia.

If you should be bitten by a dog suspected of rabies don't get scared, but act promptly.

Immediately apply a tourniquet above the wound. No tourniquet being at hand, use a handkerchief or necktie, twisting it tightly with a stick.

The poison should then be sucked out and the wound cauterized as soon as possible. If it is believed the dog was mad the Pasteur treatment should be resorted to. Only two-tenths of 1 per cent of those who take this treatment develop hydrophobia.

Although the germ of rabies has not been demonstrated, it is generally conceded the disease has a specific germ. Rabies never occurs in the human spontaneously, but always by inoculation. It is also moderately well demonstrated that dogs and other animals likewise contract the disease through inoculation. Many more male than female dogs go mad. The reason given for this is that male dogs fight among themselves, but a male seldom bites a female. The proportion is seven males to one mad female. Contrary to popular belief, rabies is more common in a temperate zone than in the tropics or the arctic region and in spring and fall than in summer and winter.

The only sure preventive thus far found for rabies is thorough muzzling, which is another proof that the disease has its origin in inoculation.

There is a disease called hydrophobia which closely resembles hydrophobia and is brought on by nervous dread. It has been contended by some that there is really no difference between these diseases and that hydrophobia is imaginary. This claim is refuted by the fact that animals and very young children, knowing neither imagination, dread or fear, do succumb to a disease exhibiting the unmistakable symptoms of hydrophobia.

These symptoms are, first, a fear of water, from which the disease derives its name; then the muscles stiffen and an attempt to drink water brings on convulsions; next the mere sight of water is sufficient to bring on a recurrence of the convulsions, fever sets in and death ensues in about a week, generally from exhaustion.

There is no known remedy for rabies, though opium is freely used to alleviate the pain.—Dr. John J. Reilly in New York World.

A SUIT CASE MAY SOLVE MURDER CASE

(National News Association)

CHICAGO, Sept. 8.—The finding of a suit case in the home of Charles Sing, the murdered Chinese merchant, known to belong to a man acquainted with Sing's white wife and one who had a personal grudge against the murdered man, today promised to clear up the mystery. Mrs. Sing, whose condition continues serious, furnished the police the tip by directing them to a back room closet in the Sing home.

HAZARDOUS MAIL ROUTES.

Postmen In Some Countries Are Never Sure of Their Lives.

The camel postman in the Sahara hasn't any cinch—that is, if he has a family he's anxious to live for or happens to be leading a care-free bachelor existence, for he needs all the nerve that he can possibly summon on every trip that he makes, for the wild tribes regard him as their particular prey, and he never does know when he starts out whether or not he is going to reach his destination.

Neither has the postman in some parts of Switzerland the safest job in the world. In fact, in several places in that country it is considered just about the most dangerous profession that a man can enter.

You see at some of the postoffices are situated at a height of 7,000 feet. There is even a letter box at the summit of Languard, which is nearly 10,000 feet above the sea level. Here all sorts of disastrous things have happened to unfortunate carriers of mail. Three have been crushed to death by avalanches and a large number swooped down upon and killed by fierce eagles.

Then in India the postman always has to be on the lookout for snakes. It is claimed that within the last year 150 were killed by snake bites and twenty-seven eaten by tigers.

Queer, isn't it, when in this country the business of being a postman seems about the most harmless and least dangerous of any a man could pick out?

In parts of Siberia they have only two mail deliveries a year, while in the interior of China they have no regular delivery or regular postman.—Chicago Tribune.

AUTHORESS TO SUE FOR DIVORCE DECREE

(National News Association)

DELAWARE, O., Sept. 8.—Lillian Belle Bogue, the well known authoress, announced today that charges of extreme cruelty and gross neglect on the part of her husband, Arthur Hoyt Bogue, a Chicago promoter, would form the basis of divorce proceedings she would institute this afternoon. One of the peculiarities of her husband, the petition asserts, is that he is addicted to the use of strong coffee. Among Mrs. Bogue's best known works are "Why Men Remain Bachelors," "From a Girl's Point of View" and "The Under Side of Things."

KISSING ADVANCE COSTS HICKS FINE

"Come on kiddo, gimme a kiss," said Walter Hicks at the carnival Saturday night to a pretty young woman who was selling chances at a booth. The woman became angered at Hicks' repeated demands that she allow him to make love to her and told her husband who was bally-hoo for the outfit.

The city and rural mail carriers were made happy this morning by the appearance of huge sacks of advertising matter for distribution. This marked the beginning of the annual fall advertising campaign. Lawrence Handley, deputy postmaster, said this afternoon in the fall and spring thousands of booklets, fashion books and catalogues were handled by the local office. Sack after sack of this matter is received from large houses who advertise by sending the catalogues to persons whose names their local dealers furnish. From now until after Christmas the mail will be full of this advertising, most of which is carried under one cent stamps and special permits.

SHORTHORN STEERS PLACED ON FARM

One hundred bellowing, branded Shorthorn steers from Kansas City attracted considerable attention this afternoon as they were being driven through the business district.

They are the property of R. G. Leeds who has placed them on his farm near Boston to feed for the spring market. The steers averaged 900 pounds and are about two years old.

Clement V. Carr and Thomas Williams purchased them for Mr. Leeds last week while they were in Kansas City.
