

## DOUBLE CROSS BY THE CITY, CHARGES MADE

Manufacturers of the city met at the Commercial Club rooms this afternoon with city officials and Supt. Johnson of the Light, Heat and Power company, to protest against the recent joint power rate schedule established by the state public service commission on petition of the city and the L. H. & P. company. President Reid of the Elliott-Reid Fence company, speaking for the manufacturers, declared the rates too high, objected to the system requiring power consumers to pay for current on a graduated system instead of paying one price for the total amount used each month; objected to the \$2.50 monthly charge for "double-throw" equipment because neither plant would guarantee service nor would be held liable in case service was suspended for any cause, and protested on the monthly minimum charge of 75 cents per horse power, declared that to be a rank injustice.

After Mr. Reid had concluded his statement Charles McGuire sprung a genuine sensation by charging that his company, the Dille, McGuire Lawnmower company, the F. & N. Lawnmower and the Elliott-Reid Fence company had been influenced to contract with the municipal plant for their current under a misrepresentation and he demanded an explanation from the city officials.

Mr. McGuire said that J. M. Lontz, of the F. & N. company, had recently come to him and to Mr. Reid and had informed them that Superintendent Kleinknecht of the municipal plant had promised him that if the municipal plant secured the business of the local manufacturing concerns the power

## BOOMING DIAZ AS HEAD OF MEXICO

General Felix Diaz, who organized the revolution that placed Huerta at the head of the Mexico City government, and was later expelled from Mexico by Huerta. Representatives of Diaz are now at Niagara Falls, suggesting to the mediators and the American envoys that Diaz is the best possible candidate that could be chosen to succeed Huerta as president of Mexico. Diaz is now in Toronto awaiting the outcome of his representatives' mission.

rates would be reduced. This promise, he said, influenced all three companies to contract with the city plant, following which Mayor Robbins positively refused to sanction any further reduction in power rates.

Yesterday manufacturers of the city held a meeting to discuss the electric

power rates, and all of them decided to make a vigorous demand for relief from what they believed to be unfair discrimination.

At the present time the municipal plant is supplying current to nearly every manufacturing concern in the city, and J. M. Lontz frankly admits that he is responsible for securing the city much of this business, believing, as he says, Superintendent Kleinknecht had authority to promise further rate reductions if the municipal plant secured this business. He now declares that he has been "double crossed."

The manufacturers are also beginning to realize now that their stampede to the municipal plant, instead of bringing about reduced power rates may have the opposite effect—an increase in rates by the public service commission to protect the Light, Heat and Power company, so that by reason of its heavy loss in business it will not be forced out of the electrical field.

This significant remark made by Chairman Duncan, of the commission, a few weeks ago, to a committee of Richmond men, has now been brought to the attention of the manufacturers, and has made them wonder if they have not made a tactical mistake in giving all their business to the city plant.

"The commission cannot reduce the rates below what it costs to produce the current, neither can it permit rates to be reduced to a point that will not permit the Light, Heat and Power company to earn a reasonable amount on its investment. The rates will be made so as to permit both plants to earn a fair return on the investment, regardless of whether it is a municipal or private plant."

Decline in the price and demand for Spanish sherry has induced some makers to turn to the champagne industry.

## Prof. Russell Favors Amending Milk Laws

Prof. Elbert Russell, councilman-at-large, and one of the champions of the stricter regulation of dairies which supply milk to the city, stated his belief today that the existing dairy ordinance can be so amended, one section at a time, that within a reasonable length of time it will be as effective a measure as the one defeated by council last week.

"I even believe the tuberculosis test feature can be incorporated into the ordinance we now have," Prof. Russell said today.

He also expressed his satisfaction over the removal of Dairy Inspector Charles Ploek, and said he thought the new inspector, Dr. Lou Clem, a licensed veterinarian, would make a very efficient official. Prof. Russell frankly charged Ploek with being a powerful agency in the defeat of the dairy inspection ordinance, saying that he knew Ploek had lobbied against the measure.

**Easy to Amend.** Prof. Russell said that in his opinion a majority of members of council would support each amendment to the present dairy inspection ordinance.

"The other ordinance was defeated because the councilmen had to vote for it as a whole," he said.

"Those who opposed its passage did so to defeat certain provisions they objected to. What one or two of the eight councilmen who voted against the measure might have objected to the other six might have favored, so under the plan of amending the ordinance we now have, one section at a time, I think all the good features of the defeated measure can be incorporated into it."

Dr. Clem's nomination as dairy inspector was submitted by the board of health to the board of public works this morning and was promptly confirmed.

Dr. Clem said he had not outlined any program of the work he plans to

**ROB JAMES HOUSE**

**Thief Gets Jewelry and Pennies.**

The home of the Rev. H. S. James, pastor of the United Brethren church, 1015 North B street, was broken into last evening and a valuable gold watch, chain and charm and a small bank containing fifty cents in pennies taken, during the absence of the family. The thief gained entrance to the house by climbing through a transom.

This is the fifth or sixth burglary reported to the police with in the last two weeks, and it is believed one man has been responsible for all of them. Loot valued at \$300 to \$400 has been taken from the various residences visited by him. In every case the thief has raised a home during the absence of the family.

Clara Carter, of Grand Junction, Colo., an invalid, predicted the hour of her own death a week in advance.

## FERGUSON NAMED FOR REPRESENTATIVE

(BULLETIN.) CAMBRIDGE CITY, May 28.—When Wayne township swung its vote to Charles Ferguson, of Fayette county, on the tenth ballot, he received the nomination for joint representative on the Democratic ticket.

CAMBRIDGE CITY, Ind., May 28.—There were two active candidates and one "dark horse" candidate in the field this noon for the Democratic nomination as joint representative from Wayne and Fayette counties. The nomination will be made at the joint convention in this city this afternoon. The two active candidates are Lawrence Bertsch, of Cambridge City, and Charles Ferguson of Fayette. The "dark horse" is George Bayer of Richmond. Bayer is known to be a receptive candidate but has made no

effort to secure the nomination. Ferguson has the support of Fayette's thirty-four delegates but if Bertsch and Bayer split the vote of Wayne's 128 delegates the result is difficult to foresee, although some of the Wayne delegation believe it might result in Ferguson's nomination. There is also the probability that if Bayer's entrance into the contest would result in difficulties of a political nature his friends would decide not to place his name in nomination and leave the field clear to Bertsch, who several weeks ago was practically promised the nomination by certain party leaders when they induced him to come out against Earl Crawford, who according to all precedents, was entitled to renomination, but which was denied him because he had taken up arms against the Taggart machine in the 1913 legislature.

The "turn down" Crawford received at the hands of the Democratic machine leaders has driven him outside the breastworks but he has said that if Bertsch is nominated he will support him, believing that he would make a satisfactory legislator.
