

HONOR ANNIVERSARY OF AGED TEACHER

Sunday School Pupils Surprise William Reynolds of Chester Church.

CHESTER, Ind., July 15.—William Reynolds of Chester reached the eightieth milestone of his age Tuesday. At 4 o'clock in the evening present as well as some of the former members of his Sunday school class met at his home and gave him a pleasant surprise as a reminder of his birthday anniversary. They brought with them an elegant supper and also some presents as future reminders. The ladies' Aid gave him a beautiful potted fern.

Those present were Mr. and Mrs. Levi Fulghum, Mr. and Mrs. Charles Crawford, Mr. and Mrs. Leroy Nichols, and daughter Mary, Mr. and Mrs. Silas Williamson and daughter Passmore, Mrs. Homer Estelle, Mrs. William Wessler, Mrs. Rufus Newman, Mrs. Maggie Roehner, Mrs. Fanny Martin and sister, Mrs. Crawford, Mrs. Ada Morrow, Mrs. Bertha Carman, Mrs. Mary Smith, Mrs. Ida Pickett, Mrs. Frank McDowell, Mrs. Mary Jeffers, Mrs. George Minor, Mrs. Ona Pyle, Miss Eva Pyle, Miss Hunt and Miss Lena Hiatt.

Many cards were sent by former pupils with regrets that they could not be present.

Mr. Reynolds has been the teacher of a class of women over twenty years in the Methodist Sunday school at Chester, but still calls them "girls."

The following lines were written by one of his pupils:

Your eightieth milestone you have won,
Your four-score years now are run.
As from God's Holy Word you taught,
In living deeds as well as thought.

These many years you've taught the Word,
There may be some who first have heard
Have come to meet a great reward,
And now in peace are with the Lord.

We, your pupils, bring good cheer,
To you our teacher who's so dear.
And may the teachings that you give,
Help us a better life to live.

May God bless you with years of life,
And they be free from sorrow or strife.
And when your race of life is run,
May you a star-lit crown have won.

Mother's League Gives Outdoor Fete Friday

An outdoor fete will be given at the Whitewater school, corner of Thirtieth and North G streets, tomorrow night by the Mothers League, an organization composed of women living in the school district. Ice cream will be served, home-made candy will be sold and drills and folk-dances by the children will entertain the people. Those in charge of the event are also planning to have a moving picture exhibit.

The Mothers League has been reorganized since the inauguration of the Social Center in the school and will use the proceeds of the social for defraying the expenses of the Social Center work. They have aroused a high degree of interest in the affair and the advance sale of tickets guarantees a very large attendance. People from all parts of town will be welcome and guaranteed a good time.

Mrs. Summerfruit, who conducted the flag drill at the Fourth of July celebration at Morton lake, has rounded up a group of youngsters and is teaching them some interesting drills for the social. Much of the candy and materials have been donated by families in the neighborhood, although many up-town merchants have lent a hand.

The moving picture entertainment which was given in the school yesterday afternoon was very much of a success. Over two hundred boys and girls and several women were in attendance and from the enthusiasm shown, it is highly probable the machine will be purchased for the permanent use of the school. In that

CHINA LEARNS CUT OF OLD EGYPTIANS

CAIRO, July 16.—Recent explorations indicate the Chinese learned their pottery art from the Egyptians and show the methods by which the early Egyptian professor discovered the circumference of the earth.

Among the most beautiful objects found in the ruins of Meroe, in the Nile Valley are specimens of so-called "biscuit ware." The ware is as hard and fine as the biscuit or egg-shell ware of China and differs from the latter only in not being translucent. In China it has not been found in works older than 200 A. D., whereas the biscuit ware of Meroe goes back to the third or second century before Christ. The Meroe ware was imitated from ostrich eggs. As the ostrich is an African bird, it is evident that the Chinese drew their ideas from the potters of Meroe and not vice versa.

Professor Garstang, an Englishman, has discovered an observatory at the bottom—not of a well, but of an underground bathing establishment. It was evidently a copy of the famous observatory at Assuan, where the circumference of the earth was first determined—a work which was said to have been done at the bottom of a well. That it could not have been a well in the ordinary sense of the word has always been clear. This discovery now explains what the so-called well must actually have been. The chamber in which the astronomer's instruments were placed was ideally fitted for its purpose. Only a strip of sky was observable. On one of the stucco walls the astronomer has left a record of his calculations, while, beside it his servant has amused himself by making a rude drawing of his master's work.

HOLD UP SPANISH STEAMER UNTIL HUERTA ARRIVES

VERA CRUZ, Mexico, July 16.—Sailing of the Spanish steamer, Alfonso XIII, was postponed this morning until afternoon. It was reported that she was being held until the arrival of General Huerta and his party from Mexico City. The steamer is going to Havana and will have as one of her passengers Estorpe Ruiz, Huerta's former secretary of foreign affairs.

FOX GETS BLAME FOR LENIENCY TO YOUNG OFFENDERS

Richmond police blame the extreme leniency of Judge Fox when dealing with young offenders in juvenile court with the number of juvenile thieves who are a source of constant trouble to the police.

One police officer, asked today if he thought Jimmy Crafton would be sent to the reform school for stealing a bicycle, revolver and a few other articles after breaking into a hardware store.

"Oh, no; this is only his third or fourth offense," the officer replied. "Police complain that when a youthful thief is brought before the chief he generally confesses to his crime, and if threatened with prosecution replies that such action would be unfair to him, because several other boys guilty of more offenses than himself have been released on good behavior." The juvenile court every time they have been arraigned.

Believing they will not be punished for their depredations, the police say, these boys keep on doing just about as they please, and laugh up their sleeves when arrested.

35,000 RAILROADERS MAY GO ON STRIKE

CHICAGO, Ill., July 16.—Negotiations between the railroad managers and the committee representing 35,000 engineers and firemen on the ninety-eight western railroads will be called off at once by the latter unless the managers express a willingness to make some new concessions. This was the statement contained in a communication from the union committee received by the managers today. Unless concessions are made, it was believed a strike will be ordered by the end of the week.

Newspaper Man Discovers Working Girls' Beauty

A reporter single, young and untutored, has made a discovery.

After a morning of research he proclaims to the city that Richmond's working girls are an unusually good-looking and altogether charming class of young persons.

Wandering about through stores and factories in search of his information he suffered the scorn which falls to the lot of benefactors during their long periods of work before they can announce their results to a doubting and skeptical world.

As he eyed the girl behind the dress goods counter, the face above the typewriter, over the ledger and at the telephone exchange, he was often mistaken for a masquerader and rudely sent scurrying away. Only a few tempted him to a flirtation with coy glances. But he was too serious in his purpose to let a pair of frolicking eyes interrupt his investigation.

Facts Not New.
When he had made enough observations to announce to the world his discovery, he was told by a heartless copy reader, that everybody had known Richmond working girls were attractive and pretty since typewriters and yard rulers were invented.

Here are some of the fruits of the reporter's investigations:

Approximately 1,500 girls and women are employed in the city in factories, in offices and in the homes. Of this number about 10 per cent are under twenty years of age, 60 per cent between the ages of twenty and thirty, and thirty per cent over thirty years old. There are more girls employed in the factories than in any other occupation.

In Richmond, more than in many other cities, it is no disgrace to be a working girl. Included in this number are some of the most intelligent people of the city. In many offices, the deputies know more about the routine work than the "boss" himself and undoubtedly a large number of well established firms in the city would run less smoothly were it not for the knowledge of the business held by some of the women.

Make Vacations Possible.
In many business institutions the head men would receive no vacations had it not been for the summer resorts were it not for the cool deliberate judgment of the women, who remain at home amid the sweltering

CITY WATER PLANT ASKS FOR SECOND HEARING IN CASE

INDIANAPOLIS, July 16.—Attorneys for the Richmond City Water Works company today filed a petition with the Indiana public utilities commission for a rehearing of its decision in the Richmond water rates case. There were arguments in the case this forenoon, William A. Bond representing the city of Richmond and H. C. Starr and J. F. Robbins representing the company. It was generally understood that the commission will grant the petition for a rehearing.

The water works company declares there are a number of inaccuracies and inequalities in the commission's decision and it also asserts that with the rates fixed and the valuation placed on its plant it will not be able to derive the profits it is entitled to under the state law.

NEW YORK BLAZE DESTROYS YACHTS

NEW YORK, July 16.—Fifteen firemen were overcome by smoke in a fire that destroyed three yachts and did \$200,000 damage in the New York Yacht, Launch and Engine company shipyard on the Harlem river early today. A number of other boats were towed out into the river before the flames reached them. Policemen had difficulty in saving about a hundred horses after the fire reached a nearby stable.

LIVER SLUGGISH?

The Liver Is the Great Health Regulator of the Human Body.

There's Nothing so Good as USOLINE To Keep Your Liver Active.

If the liver is out of order the whole body suffers. The liver produces and regulates the bile, and without bile there can be no proper digestion or assimilation of the food, particularly the fats.

Bile also effects and assists the bowels. If there is too little bile the bowels become clogged, constipated, irritable, and the skin becomes sallow and dull, the eyes yellow, and the urine a deeper yellow.

One vital organ cannot be affected without all the others suffering. Continuous liver trouble results in irritability, loss of appetite, indigestion, dizziness, sour stomach, biliousness, gas, belching, headache, bad breath, body pains, kidney diseases, eruptions and general nervous breakdown.

The old way was to physic the system with violent cathartics and purgatives—drugs that only aggravated the conditions and gave no permanent relief.

The modern treatment, endorsed by the most famous doctors of the world, is "Internal Lubrication," with USOLINE, an absolutely pure paraffine oil—tasteless, odorless, colorless and agreeable to take. It's better than Olive Oil in such cases because it's a mineral oil, and it all passes right through to the bowels to really lubricate them, whereas Olive Oil is absorbed by the system as food, and the liver already has too much fat.

USOLINE is to make the bowel movements regular and natural, to relieve the constipation and make it possible for the liver to perform its functions fully and actively. Just try USOLINE.

At druggists generally, 25c. and 50c. a large bottle, and \$
