

# First Photos Show Aftermath of Battles and Prisoners

First prisoners of war. Photograph shows two hundred German reservists being marched by the English troops through the streets of Folkstone. These men were captured as they were about to leave England for the Continent.

Photograph (above) of burial of the first victims of the war. The picture was taken in England and shows English sailors firing a salute over graves of four Germans and four English sailors who perished when H. M. S. Amphion and the German steamship Koenigin Louise were destroyed in the North Sea.

Photograph (below) of the German crowd in Brussels rejoicing over German trophies, helmets, rifles, etc., captured in the fierce fighting around Liege.

## NEW WATER RATES IN OPERATION UNTIL ACTION ON APPEAL

Dill and Works Board Agree to Use Schedule Until Courts Pass on Rehearing Bill.

Although the suit filed in circuit court by the water works company against the public utilities commission of Indiana could be regarded as nullifying, the new schedule of rates which the commission fixed recently, H. A. Dill superintendent of the water works company agreed with the board of works yesterday, that the revised schedule of lower rates will be effective commencing today.

The board of works members and the superintendent of the water works company held a conference on the situation. It was agreed that the appeal of the water works company in circuit court is sufficient to nullify the rate schedule fixed by the commission and ordered effective September 1.

Case May Drag. Whether there will be a decision in this case soon or whether it will drag through higher courts or even a complete rehearing of the case by the commission, is a matter of speculation. If the water works company loses the case to have the rates paid back on their old basis where they have been for twenty years, the new rates which are effective today will continue.

Should the decision be in favor of the water works company and a new hearing be granted, the old rates will again be made effective. Until that time, the actions of the water works company in charging for water will be entirely subject to the court, Mr. Dill said.

The water works company also agreed at the conference to secure a meter to measure the water which is used in the street flusher. The capacity of the flusher tank is 750 gallons. This is multiplied by the number of tanks used each month and the total number of gallons is used as a basis to find the number of cubic feet of water used. In seven months of operation, the flusher used 2,740,000 gallons of water.

## GROCERS CONSIDER OPERATING BAKERY

The formation of a co-operative bakery association in which grocers and other wholesale purchasers of bakery products have been asked to participate, is being undertaken in Richmond.

A number of prominent grocers met yesterday in the Commercial club rooms. An Indianapolis promoter of co-operative bakeries explained the plan to the grocers. They decided it worthy of further investigation and an expression from all grocers of the city.

A meeting of retail grocers will be called in the next ten days, one of the promoters of the scheme stated today. Those who have heard and understand the plan will be able then to explain it intelligently to other grocers of the city.

The formation of a stock company of grocers to buy or build and operate a bakery from which all members buy, is the plan. There is little profit in bakery goods under present conditions, grocers say. By forming a co-operative bakery and purchasing their own product, they share in two profits.

## BAVIS WILL OPPOSE INSPECTOR MEASURE

Believes Member of Board Could Fill Position Without More Expense.

Discrepancies in the ordinance presented last night at council by the committee on sewers, streets and alleys for the restoration of streets after excavation and for the creation of the office of street inspector at a salary of \$75 a month, may lead to opposition on the part of President Bavis of the Board of works.

Mr. Bavis says that the salary of the street inspector would add unnecessary expense to the city when any of the three members of the board of works can do the inspecting. Even though an inspector were chosen, the board members would be required to watch his work and instruct him, Mr. Bavis believes.

The ordinance provides that sewer, water and gas taps shall be made to curb lines and the cost charged to the property owners by the city. This is in direct conflict with the ruling of the public utilities commission which ordered that the corporations making the connections pay the cost as far as the curb lines, Mr. Bavis said.

## FILES SECOND SUIT AGAINST CAR LINES

The second damage suit against the Terre Haute, Indianapolis and Eastern Traction company within the last two days was filed this morning by Adaline Mergler, asking \$3,000 for personal injuries received January 9, 1914.

According to the complaint, the plaintiff was thrown to the ground at West Eighth street and the National road when a street car started before she had safely alighted from the car. As a result she suffered a dislocated neck, a wrenched spine, a bruised right hip, a sprained ankle, a fractured right ankle, a bruised shoulder and a weakened nervous condition, as alleged in the complaint. She asked for \$5,000 for personal injuries received in a similar accident on the same car line, was filed yesterday by Elizabeth Ascraft.

## ABANDON LABOR DAY CELEBRATION

It has been decided that no special labor day program will be held this year, but next year, Richmond will be one of the two cities in the state which will entertain organized labor. A meeting of the Central Labor Council will be held tonight at which union officials will be told that Richmond labor men have been invited to the Fort Wayne celebration this year. Earlier in the year a celebration had been planned at Morton park but the installation of sewers throughout the grounds have made this impractical.

## BUILDING ON BOOM DURING AUGUST

August proved to be the biggest month of the past two or three years in building activities. Building permits amounting to \$67,100 were taken out from Building Inspector Hodgins. The fees from these amounted to approximately \$135, the biggest collection of fees for a single month since the new building code has been in operation. There were thirty-four permits, including the Indianapolis Glove factory permit and a number of other large ones.

## CRUMP'S SHIP SAFE AT ARGENTINE PORT

State Department Locates Vessel But Hears Nothing of Greensfork Man.

The Sierra Nevada, the steamship on which Clifford Crump of Greensfork was reported as having sailed from Buenos Aires on July 24th, is now in the port at Pernambuco, Argentine, according to a telegram received today from the state department to which Dr. C. F. Crump, father of the young man, appealed for information. It is presumed by the family that Crump is safe in Argentine, although no word has been heard from him directly since he was reported to have sailed.

The steamship is owned by the North German Lloyd steamship company and when it left Buenos Aires it was bound for a port in France. It is believed that when war was declared it turned back and entered the port in Argentine.

Mr. Crump is connected with the national university of LaPlata, in Argentine. He is in the astronomical department. He holds the government position as astronomer. He is a graduate of Earlham college.

Dizzy? Bilious? Constipated? Dr. King's New Life Pills will cure you, cause a healthy flow of bile and rid your stomach and bowels of waste and fermenting body poisons. They are a Tonic to your Stomach and Liver and tone the general system. First dose will cure you of that depressed, dizzy, bilious and constipated condition. 25c. all Druggists. (Advertisement)

## TO SET NEW MARK IN STREET REPAIRS

Next year will be the biggest street repair the city of Richmond has had. President Bavis of the board of works announced today that this is the intention of the administration. In the budget \$8,000 was appropriated to buy crushed stone as against \$6,000 last year. Money was also provided for the purchase of a new street roller.

"We were so delayed this year in securing stone that we will protect ourselves against a repetition," Mr. Bavis said. "Since our work has been delayed, we expect to save over for next spring several carloads of crushed stone. Work was not started this year until June because of the delay in shipments. Next year work will start at the first opportunity and continue all year. There will be about 10 per cent more crushed stone available next year than we will have used by the close of this year."

To add to the rapidity of the work and the capacity of the department, the new scarifier will be used. This scarifies 4,000 square yards a day and equals the work of twenty-five men with picks and shovels for one week. The cost of operating is small.

Ohio is placing county employees under civil service.

## ARMIES FIGHT FOR VICTORY

[BY LEASED WIRE.] LONDON, Sept. 1.—Up to 3:30 p. m. no official announcement had been made relative to the course of the great battle on the continent between two armies of Germans and the allies numbering approximately 3,000,000 men. The engagement is made up of three separate battles.

The Kaiser has evidently aimed his heaviest blow at the English wing, and the silence of the British Press Bureau, and the French War Office is regarded as significant.

## DUMP FIRE COSTLY

Firemen Use Reservoir of Water in Fight.

Fire Chief Miller has estimated that since the fight against the west side dump fire started in June, a reservoir of water has been thrown on the dump. This is three million gallons, or more than one million gallons of water a month. In fighting the fire, six or seven firemen have been more or less seriously injured. The cost of the fight against the underground flames has not been estimated. No extra expense was attached to the water used. It is believed by the fire chief that enough water has been retained in the dump to keep through it and cool the heated undergrowth. Steam can be seen arising from several places in the ground.

## DOCTORS TO MEET.

The regular meeting of the Wayne County Medical society will be held at the Episcopal parish house Wednesday afternoon. Dr. R. R. Hopkins will be unable to deliver his address as scheduled on the yearly program of the society. The speakers for tomorrow are Dr. Charles Marvel, Dr. O. M. Deardorff and Dr. O. N. Huff.

## NEW MILK LAWS BECOME EFFECTIVE

Little trouble in enforcing the new milk ordinance effective today is anticipated by Dr. Lou Clem, dairy inspector. He said that all dairymen had expressed themselves as willing to comply with the sections of the ordinance.

## WESTCOTT CHANGES

The Westcott hotel, for years operated on American plan, was converted into a European plan hotel today. The management announced that it will continue to operate its main dining hall and cafe, however.

The government estimates that in addition to the loss of \$200,000,000 in the cereal crops caused by insects, the loss on vegetables is \$53,000,000 on fruit \$27,000,000 on other crops enough to bring the total loss up to \$580,000,000.

## BRING MISS ROBIE HERE FOR BURIAL

The body of Bertha Grace Robie, daughter of Colonel and Mrs. W. J. Robie, who died Monday at the Robie summer home in Petoskey, arrived here today and was taken to the home, 117 North Thirteenth street, where friends may call any time. The news of her death comes as a shock to her host of friends. She has been one of the most prominent club women in this city and was also interested in all civic affairs. For some time she was regent of the Richmond chapter of the Daughters of the American Revolution and was instrumental in accomplishing many things along a civic line attempted by the D. A. R's.

A beautiful book of poems written by Miss Robie has been published and is considered by many to be of unusual merit.

The funeral will be held Thursday afternoon at 3 o'clock from the home.

## BOARD TO PREVENT FIRE INVITED HERE

Telegrams have been sent to officers of the Indiana State Fire Prevention association which meets today and tomorrow at Fort Wayne, asking that the association hold its October meeting in Richmond. The Commercial club desires an inspection of the city by the authorities.

The club plans to have the association meeting here October 13. If the invitation is accepted, the club will make arrangements for an automobile tour of the city to show the fire protection, fire fighting facilities and the improbability of big fires in the city.

On the same night the club would hold a big conference in which the association members would be asked to go over the data which they secured in their day inspection of the city. This, it is believed, would be of value in the campaign for lower insurance rates.

## CITIZENS TO MASS AT SITE OF DUMP

West Side Residents Plan Bon Fires and Concert to Boost Park.

To investigate the campaign for a park to replace the west side dump, West Richmond citizens, headed by T. C. Hubbard, are making plans for a big public gathering at the dump site Friday night.

A band has been secured to head a parade which precedes the park demonstration. The band will leave Main and Eighth streets at 8 o'clock, followed by as many automobiles as the citizens can obtain.

At the dump there will be bonfires and other demonstrations. Speakers will ask that new life be instilled into the campaign for Riverside park. Dr. David W. Dennis will be the leading speaker of the evening. A number of West Side citizens have been asked to make short addresses.

The Commercial club has been invited to attend the mass meeting. City officials who showed themselves in favor of the park will be asked to cooperate in the effort to put new life in the park campaign.

## RELIGIOUS CREEDS PLAY PART IN SUIT TO END MARRIAGE

The difference in the religious beliefs of husband and wife have played an important part in the trouble that has arisen between Lucy B. O'Connell of Dublin, and her husband Albert M. O'Connell of this city, according to the testimony presented in the divorce case tried before Judge Fox today. All the evidence in the case was presented this morning. The case will be argued by the attorneys Monday morning.

The case is one of the most complicated with which Judge Fox has had to deal. The charge preferred by Mrs. O'Connell against her husband is failure to provide. He has filed a cross complaint alleging cruel and inhuman treatment. Action is also pending in the Marion circuit court, at Indianapolis in which Albert O'Connell, asks for a six month's separation from his wife, which is termed under a section of the divorce statute as a "limited divorce." This case is one of the most peculiar in the state, since action under this statute is very rarely brought. A "limited divorce" does not affect the property rights of man and wife as does a permanent divorce.

## ORVILLE WOOD DIES IN SHALLOW WATER

Drowning in six inches of water with his head within ten inches of the shore, was the fate of Orville Wood, son of Steven Wood, one and a half miles west of Dalton. The accident occurred Sunday evening but his body was not found until Monday morning. It is believed that Wood, who was afflicted with epilepsy, suffered an attack while crossing the footbridge over the creek at Dalton and fell into the water.

Wood left his home Sunday morning to attend church at Franklin. The accident occurred when he was returning to his home by way of Dalton.
