HEAVY LOSSES IN WHEAT TRADE

CHICAGO, Feb. 23.—There were heavy losses in the wheat market today, resting spots showing declines of 3-8 cents for May and 5-8 cents for July. It was a case of liquidation by longs and lack of buying power. The situation was bearish because of more favorable crop reports, dullness in the cash markets and reports that the allies were able to open the Dardanelles for the shipment of Russian grain. Corn closed 2 1/2 to 2 3/4 lower. Oats were off 2 1/2 to 2 3/4c.

Lime Treatment in Tuberculosis In the May 25, 1912, issue of the Journal of the American Medical Association appeared this statement concerning calcium (lime) medication in the treatment of pulmonary tuberculosis (consumption):

"Under the systematic, continued and persistent regime of calcium assimilation, Van Gieson has seen a number of his patients improve, undergo an exudation or partial consolidation in the lung, which then solving would appear to contribute to the healing of and closing of the lesions. Hand in hand with this course of events, the sputum clears up of tubercle bacilli, which finally disappear, and the patients are discharged with healed pulmonary tuberculosis."

Ethical medical journals seldom speak so positively about a remedial agent, yet this testimony coincides with that from many consumptives who have secured like results through the use of Eckman's Alterative. Hand in hand with this course of events, the sputum clears up of tubercle bacilli, which finally disappear, and the patients are discharged with healed pulmonary tuberculosis."
