

THE RICHMOND PALLADIUM  
AND SUN-TELEGRAM

Published Every Evening Except Sunday, by  
Palladium Printing Co.  
Palladium Building, North Ninth and Sailor Sts.  
R. G. Leeds, Editor. E. H. Harris, Mgr.

In Richmond, 10 cents a week. By mail, in advance—one year, \$5.00; six months, \$2.60; one month, 45 cents. Rural Routes, in advance—one year, \$2.00; six months, \$1.25; one month 25 cents.

Entered at the Post Office at Richmond, Indiana, as Second Class Mail Matter.

## Thaw Goes Free

Harry K. Thaw was declared sane by Justice Hendrick. He supported the verdict previously brought in by a jury. We hope that the curtain of oblivion will now be drawn over this case. No criminal case in the country in a decade has been so replete with foul and sensational matter as this one; none has received so many columns of news space. Let Thaw and Evelyn withdraw from the public gaze now and be forgotten.

The last trial of Thaw brought out distinctly the worthlessness of expert testimony on matters of sanity. It was pretty generally established that alienists were being paid to give their opinions as to Thaw's sanity and insanity, and as a result this testimony was greatly discounted. Courts in the East are now paying much less attention to the utterances of alienists.

## Staying at Home for Cures

The war with Europe has accentuated the advantages of travel in the United States, impelled American inventive genius to supply the products formerly imported, and in many ways taught the United States that she need not be dependent upon Europe for many of the luxuries and necessities which until a year ago were tremendous items in the mercantile field.

The war-torn European countries, among other

things, have forced thousands of persons to seek health in their native land. Formerly outbound steamers carried scores of passengers who were going to Karlsbad, Hornbrug, Wiesbaden, Luchon, Bath, Bogorra and other noted places where healing waters were reputed to cure ailments.

Dr. Woods Hutchison, whose writings on health subjects are known all over the United States, points out that every element found in the famous springs of European health resorts can be found in the bubbling founts of Colorado, California, Utah, and in many places in the eastern part of the country.

Not only this. He asserts that the cures ascribed to many of the health resorts of the United States and Europe do not come from the water the patient drinks, but from the change in environment, the exercise, the mental associations, the proper dieting that accompany a stay at sanatoriums.

He maintains that a person can have the same cures at home, in his own bath tub, if he wants to have them. Commenting on this, he says:

"So that all you need to do is to send for a prospectus of the springs you wish to visit, turn to its analysis and pick out the three or four largest constituents of its waters; the appalling comet's tail of smaller items don't count at all, as they are not present in sufficient amounts to have any effect upon anybody but your imagination, and are probably, most of them, contained in your own tap-water or well-water.

"Then go to the nearest drug store and ask the prescription clerk to put you up twenty powders, each containing enough of these salts to make twenty gallons of the mineral water as per analysis. You will be surprised to find how small the packages are in most cases, as well as the large percentage of common salt, washing soda and lime contained in them. Fill your bathtub with water of the temperature registered at the springs, lie down at full length in it, strike a sulphur match and hold it under your nose, and you have all the glories of Carlsbad, Aix or Luchon, under your own roof."

A civilian engineer, it is said has submitted plans to the navy department for the construction of a huge submarine cruiser, capable of carrying 2,500 tons and able to travel at a fair speed. The ship is to be used, according to the report, for carrying of combat munition to the allies.

It is known that Rear Admiral Taylor, Chief Naval constructor, is working on designs for the construction of a new type of submarine displacing 1,500 tons. Those at present in use by this government are of but 600 tons displacement.

It is practically certain that when the new naval advisory board gets to work that larger and swifter submarines will be forth coming.

to be fatal; not a disgrace but a disease; a misfortune, a disease that is caused by a living plant that can be touched and seen; that has its enemies than can be overcome. A courage that can obey for a year can overcome it; that thousands are recovering every year who are willing to know and face the worst in the beginning, that the sea on which we must make our voyage is not an uncharted one; that nothing but knowledge and obedience can save you; that the United States government has sent a man here to help us; that we must tell him all; must hunt him up for that purpose; that the opportunity is nearly over; that he will soon tell us what we must do to live; then as a city, a community, an individual we must do it or take the consequences.

It is known that consumption is not an overhanging nemesis, not the disfavor of God; not a fate that is sure to befall; not a disgrace but a disease; a misfortune, a disease that is caused by a living plant that can be touched and seen; that has its enemies than can be overcome. A courage that can obey for a year can overcome it; that thousands are recovering every year who are willing to know and face the worst in the beginning, that the sea on which we must make our voyage is not an uncharted one; that nothing but knowledge and obedience can save you; that the United States government has sent a man here to help us; that we must tell him all; must hunt him up for that purpose; that the opportunity is nearly over; that he will soon tell us what we must do to live; then as a city, a community, an individual we must do it or take the consequences.

Remember that consumption is not an overhanging nemesis, not the disfavor of God; not a fate that is sure to befall; not a disgrace but a disease; a misfortune, a disease that is caused by a living plant that can be touched and seen; that has its enemies than can be overcome. A courage that can obey for a year can overcome it; that thousands are recovering every year who are willing to know and face the worst in the beginning, that the sea on which we must make our voyage is not an uncharted one; that nothing but knowledge and obedience can save you; that the United States government has sent a man here to help us; that we must tell him all; must hunt him up for that purpose; that the opportunity is nearly over; that he will soon tell us what we must do to live; then as a city, a community, an individual we must do it or take the consequences.

The German patent office rejects about two-thirds of the 45,000 patent applications it receives annually.

PLANS BIG SUBMARINE  
TO HELP ALLIES

REAR ADMIRAL TAYLOR

Tuesday—Richmond Lodge, No. 196, F. and A. M. Called meeting; work in the Master Mason degree. Refreshments.

Wednesday—Webb Lodge, No. 24, F. and A. M. Stated meeting.

## KICKED TO DEATH.

TIPTON, Ind., July 20.—Charles B. Burkett, 42, is dead from injuries received in a runaway while returning from Elwood. After being thrown from the buggy he was kicked to death by the horse.

It is known that consumption is not an overhanging nemesis, not the disfavor of God; not a fate that is sure to befall; not a disgrace but a disease; a misfortune, a disease that is caused by a living plant that can be touched and seen; that has its enemies than can be overcome. A courage that can obey for a year can overcome it; that thousands are recovering every year who are willing to know and face the worst in the beginning, that the sea on which we must make our voyage is not an uncharted one; that nothing but knowledge and obedience can save you; that the United States government has sent a man here to help us; that we must tell him all; must hunt him up for that purpose; that the opportunity is nearly over; that he will soon tell us what we must do to live; then as a city, a community, an individual we must do it or take the consequences.
