## ALLIES ON GALLIPOLI SUFFER FROM WATER

BERLIN, July 22.—Dispatches from German correspondents with the Turkish army predict the annihilation or capture of the allied forces on the peninsula of Gallipoli. It is said that the British and French troops are in desperate straits from lack of water. The rocky southern part of Gallipoli has no springs or wells, and all drinking water for the allied soldiers must be brought from the Greek islands by steamer.

The arrivals of German submarines and the fire of the Turkish batteries have seriously interfered with these transports and the water supply of the allies may be cut off entirely.

If this should happen, the British-French expedition would be lost. The withdrawal of the landing corps under the Turkish guns would be almost impossible, and the Turks and their German commanders confidently expect that eventually the whole force of the enemy will be compelled to surrender.

## ILIFF PROTESTS

field. Many shipments of these have been made to foreign ports. A few horses have been lost at sea. Most of them will reach, or have reached the battlefields in France and Belgium. It is said that over fifty thousand American horses have already been purchased. The vast majority of these will die from wounds, exhaustion, shell fire, sickness, starvation, injuries and ill treatment. Very few of this enormous number of horses will survive the war. The average life of a horse on a battlefield at the present time is said to be anywhere from three days to three weeks.

American humanitarians are aghast at this condition of things. For forty years citizens of the United States have been educated in the principles of kindness to defenseless animals. We pass laws to protect animals from abuse at home, and then allow our horses to be shipped abroad, with the positive knowledge that they will be subjected to conditions of diabolical cruelty? Is this consistent? Is it right? The question is fairly up to the American people to decide. It is apparently a case of humanity versus cupidity; of national honor versus commercialism. If we permit this, are we true to our principles of humanity? Are we fair as neutrals? What shall the answer be?

**How to Protest.**

If you believe that this traffic, which means so much excessive cruelty to our horses, should be stopped, write at once to the Hon. Woodrow Wilson, president, White House, Washington, D. C., and also to your United States senators and your congressman, and protest against this practice. Ask those representatives of your people to have action taken which shall stop these foreign shipments of horses until the war is at an end. Write at once, and write very plainly. Make

## Cocoanut Oil Makes A Splendid Shampoo

If you want to keep your hair in good condition, the less soap you use the better.

Most soaps and prepared shampoos contain too much alkali. This dries the scalp, makes the hair brittle, and is very harmful. Just plain mulsified cocoanut oil (which is pure and entirely greaseless), is much better than soap or anything else you can use for shampooing, as this can't possibly injure the hair.

Simply moisten your hair with water and rub it in. One or two teaspoonsfuls will make an abundance of rich, creamy lather, and cleanses the hair and scalp thoroughly. The lather rinses out easily and removes every particle of dust, dirt, dandruff and excessive oil. The hair dries quickly and evenly, and it leaves it fine and silky, bright, fluffy and easy to manage.

You can get mulsified cocoanut oil at most any drug store. It is very cheap, and a few ounces is enough to last every one in the family for months.

your mind known. Ask all friends of humanity to join in this protest in behalf of mercy and kindness to our unfortunate animal wards. Act promptly.

Does any one imagine that American public sentiment sanctions this cruel policy? Have we any shadow of an excuse for sending our horses to Europe to aid any of these combatants? Is the quarrel our quarrel? Should we not as neutrals cease directly aiding and furnishing supplies to contending armies in the field? Are we exempt from moral responsibility in bearing parties to such practice? Can we retain our self-respect and yet aid in sending abroad these poor animals, which we know are to be pushed into the pit of the modern inferno of the battlefield, for a few pieces of silver?

Have we no duty to perform? If we are not callous to our responsibilities in this matter, shall we not lift up our voices in protest?

It is not a time for gush and sentiment. It is a time for action. Our sense of national honor and humanity has been outraged. If we are to violate our duty as neutrals we might better send arms and ammunition rather than to ship these living sacrifices to the god of war. We do not believe that mercy and kindness are dead in the land. It is time to be true to our better and nobler instincts in this matter and demand a true and legitimate course on the part of our government.
