

REAR BOYS AS FARMER RAISES MARKET HOGS

Dr. Geisel Holds Up Scientific Handling of Stock as Example for American Mothers.

Train Girls for Motherhood and Teach Men Keen Appreciation of Chastity and Purity.

That the ballot box in the hands of motherhood, used in a wise, unwise way, would abolish white slavery in the United States, was the contention of Dr. Carolyn Geisel in her plea for the protection of America's daughters, made before an audience of two thousand people at Chautauqua yesterday afternoon.

Describing this enslavement as worse by far than the black slavery of past decades, she said that last year 1,700 girls and women were lost to their families and homes through the practice which continues in the larger cities. Immigrant girls, coming alone to the shores of the United States, are snatched from the gangplank, she claimed, by "harpies" and "vultures" who watch and closely inspect the women coming in on each ocean vessel.

With voice choked by feeling and with tears in her eyes, Dr. Geisel spoke to her almost motionless audience, portraying the working woman of the sweat-shops, mills and factories, and the conditions under which she labors. The speaker recalled many places she had visited, cases in which the medical experience and knowledge were required, and told heart-rending tales of cases of poverty, commercial cruelty and disease, each having its source in the lack of America's appreciation of maternal motherhood.

Need for Training. There was a drastic need, too, she said, for the teaching of the rising generation of young men of a keener appreciation of the virtue and holiness of motherhood.

Dr. Geisel congratulated Indiana upon having Purdue university, the first educational institution to establish a department for the teaching of home-life and home-making for girl students. Girls should be trained for motherhood.

"There are 100 million girls and women engaged in commercial work and six million of these are in the sweat shops and the mills, grinding out their pitiful daily existence to fatten the captains of commerce. The American daughter is self-supporting, but what is America doing to protect her and protect the sons and daughters of tomorrow?

Revere Motherhood.

"Every girl in the United States should be trained for motherhood. The land is carpeted with the graves of little ones because the mother did not know. She should learn to rear scientifically her sons as a farmer scientifically raises his hogs."

"America should reverence the chastity and purity of womanhood because woman's place in nature is the holiest place. Every woman, if God's laws are carried out, has the making in her of a Madame Gladstone."

CATHEDRAL CHOIR PLANS FOR RETURN DATE NEXT WINTER

Members of the Cathedral choir, which closed its engagement with the Richmond Chautauqua last night, after rendering a concert of sacred and operatic music before an audience of approximately two thousands people, will probably seek an engagement in this city sometime during the winter. The company made a deep impression, evidently, upon Richmond Chautauquans during the stay here. Of the company, Mr. Persson, pianist and musical director, and Miss Fallon, contralto singer, will probably appear here this winter.

In the bigger numbers, Mr. Persson displayed a full, virile tone and an unusually clear technique, while his imitation of a music-box was one of the brightest bits of comedy of the evening.

Miss Fallon showed a true conception of the Italian temperament in her singing of the old Neapolitan ballad, "O Sole Mio," and captivated her audience with her interpretation of "Believe Me If All Those Endearing Young Charms."

She is protege of Madame Schumann-Heink, who has made plans for her future. Arrangements are now being made for her appearance with the Chicago Grand Opera company.

Miss Edna Palmer, lyric soprano, who has been one of the mainstays of the choir for the last three seasons and who was also one of the members of the original Cathedral choir, made a distinctive success in her solo last evening.

The oldest and probably the best known male member of the choir is Mr. Malcolm Hallberg, who possesses a lyric tenor of rare quality.

Mr. Stanley Deacon, baritone, who attained popularity here, showed a decided operatic style in the "Toreador Song" from Carmen.

The basso of the choir, Mr. Eugene Kammerer, has a voice of deep, rich quality. He has studied in Chicago and New York.

Miss Esther Bailey showed her dramatic soprano voice to good advantage in Campbell Tipton's "Spirit Flower" and her beautiful pianissimo on the end of "Somewhere a Voice is Calling" moved the audience to loud applause.

Miss Esther Wright, contralto, also one of the original choir, displayed her versatility in her singing of the entirely different styles of songs.

Mr. Glen Chamberlain, while not possessing a tenor voice of much power, yet it possesses a quality which marks it decidedly out of the ordinary.

British India has 76,181,000 acres in rice.

ALCOHOL LEADS MEN TO MURDER SAYS DR. GEISEL

Chautauqua Crowd Held Spellbound by Narrative of Fatal Effects of Liquor on Patients.

CONDEMNS ITS USE

Shows How Poison Causes Many Deaths Among Consumptives and Induces Cancers in the Stomach.

"I am a murderer. I murdered that man, unintentionally perhaps, but killed him nevertheless. I had a dormant appetite for alcohol by prescribing it as a cure for his illness. I lost to the state, a probable governor. He threw his newly-born child from the third story window of his house to the pavement below and later died a drunkard."

Dr. Geisel almost shrieked her words at her Chautauqua audience this morning when she reached the climax of the dramatic tale of the downfall of a brilliant and able lawyer and Sunday-school superintendent whom she visited, serving in her capacity as a physician some years ago.

The people beneath the big canopy sat, unmindful of the downpouring rain, much of which dripped through the creases onto the seats, platform and many of those below. Scores of umbrellas were raised inside the tent.

Patient Uses Alcohol.

The speaker, whose text was "Alcohol and Its Effect" was discussing the time, prior to the condemnation by the medical profession of the use of alcohol as a tonic and medicine.

She had been called upon to treat a man, never known to use alcohol who was spoken of as a candidate for governor of his state. The bottle containing the medicine and alcohol was on table near the bed on which he lay ill. He reached for it one night and this the speaker said was the beginning of a drunkard's career which ended in a tragic death.

Condemns Use.

Dr. Geisel condemned the use of alcohol in any form for any purpose and she made a plea for national prohibition. "Spiked" punch at parties and social functions could tap a dormant appetite for alcohol. She listed Peruna, Hostetter's Bitters, cider, whiskey, beer and wine as liquid containing alcohol, to be avoided. She asserted alcohol to be a habit-forming drug having an ill-effect upon mind, body and soul.

"I firmly believe," declared Dr. Geisel, "that God will call to account the United States government and its citizens for the murders committed by drunkards and not blame the drunkards themselves."

"There is positively no cure for cancer of the stomach known to the medical profession and 92 cases out of every 100 cases of cancer of the stomach are due to the use of alcohol.

"One out of every ten persons who dies, succumbs to tuberculosis. One out of every two drunkards dies of tuberculosis and statistics show that all of these drunkards who die of tuberculosis get the disease after they begin drinking liquor.

"Forty out of every one hundred deaths by apoplexy are due directly to drinking of alcohol. Alcohol in any form has a pernicious effect upon the blood, blood cells, brains and serves as a breaker of nerves."

COMPARES LIFE TO BALL GAME IN BIG LEAGUE

"Play ball. Play ball. Get into the game of life; practice, obey the rules, assist the other man, he's your teammate. Remember if you have an error marked up against you, another opportunity to make good will come along in a few minutes."

Portraying a national league baseball game in Chicago to show its similarity to the word picture of life, Henry Clark, lecturer and platform manager, held the attention of an interested audience of two thousand persons last night at the Chautauqua when he delivered a speech on the subject, "Play Ball."

He particularly told the need of each player in the game of life to practice continuously in order to be prepared to meet the opportunities which will be presented and to realize and appreciate interdependence and mutual relationship of one player upon another.

"Stay in the game, play ball faithfully and don't stop until you die," said Mr. Clark. "We are all good for something, all meant for something. It may be in the field of agriculture, commerce, art, education, mechanics, church or one of many others. You must find your position in the game, and above all, know your limitations. All that you know will not make up for what you don't know if you don't know. Don't try to fill a position for which you are not fitted."

BITE

VISITS CHAUTAUQUA.

Jeanette Kling of Cincinnati, spent Thursday at Chautauqua as the guest of Mr. and Mrs. F. F. Riggs. Miss Kling will appear on the Chautauqua platform at Cambridge City tonight. An effort will be made to have her give a recital in Richmond some time during the coming winter.

MAY PLACE HANDLEY AT RUSSELL'S CHAIR

Council will probably have several candidates to select from when it meets in special session this evening for the purpose of electing a successor to Prof. Elbert Russell, a councilman-at-large, who tendered his resignation last Monday.

While he has never announced his candidacy, it is known that Lawrence Handley will be placed in nomination and the prospects for his election are said to be very good. Three votes are also said to be pledged to Jessie Evans, a former member of council, but defeated for re-election two years ago. Lucius Harrison, Al Ford and S. K. Morgan are also candidates. Prof. Edwin Trueblood of Earlham college, has been spoken of to fill the vacancy, but it is not known whether his name will be placed in nomination.

REPORT LAPLAND SUNK BY WASP

QUEENSTOWN, Aug. 20.—Queenstown agents hear that the Red Star liner Lapland has been sunk by a submarine in the Irish sea. No official confirmation is obtainable at present.

FORMER EDITOR DIES IN DAYTON

John C. Ochiltree, 70 year old, a former Richmond newspaper man, died yesterday at Dayton, where for ten years or more he had been engaged in newspaper work. His body will be taken to Connersville for burial. During the several years that Mr. Ochiltree was a citizen of Richmond, he was editor of the Richmond Telegram, and he gave that newspaper much prestige as a result of his work. He was characterized as one of the ablest writers that had ever graced a newspaper sanctum in Richmond, and there was no great surprise when he was given the opportunity to become editor of the Dayton Herald. In addition to his newspaper work in Richmond, Mr. Ochiltree endeared himself to many persons because of his social virtues. He was a most companionable man who made friends quickly and retained them, and his death comes to his Richmond acquaintances as a severe shock.

MRS. DE YARMON DEAD

Mrs. Hattie M. De Yarmon, who died this morning at Reid Memorial hospital, was the daughter of the late Joseph Fleming of Richmond, and the widow of the late Thomas De Yarmon, who conducted a job printing office here for a number of years. For three years she was housekeeper at Earlham college and was very popular with the officials and students at County Bridge Engineer Mueller.

"What I say can only be in general terms," said Prof. Hatt, "but this I can say for sure, your bridge is in a dangerous condition. The man who closed that bridge for traffic knew what he was doing and he did not do it any too soon."

"As to the proper method of dealing with the question, that can only be determined by a more minute examination," he said.

"To determine in just how bad a condition the bridge is, it would be necessary to dismantle it," he continued. "Every piece should be taken out, sand blasted and tested. This would be an expensive process, no doubt, but no engineer would dare pass an opinion on the safety of the bridge unless this is done."

Exhibits Steel Flakes.

Prof. Hatt took from his pocket large pieces of rusted steel which he had taken from the girders during his inspection. He explained the difficulty in giving an off-hand calculation of how much work it would require to examine the bridge.

"The bridge you have here is not adequate for the traffic," he continued. "I'm going over the specifications I find that even if the bridge were in as good a condition as it was when it was built, it would not be able to stand the overloading it is now subject to. This amount to 40 per cent."

The expert refused to make a statement to the board members on an estimate of the probable cost of repair instead of rebuilding the bridge.

OBSERVE BABY'S DAY

"Baby day" will be observed at the Earlham Heights Presbyterian church with the following program at 9:30 o'clock Sunday morning:

Song—Duet.

Recitation, "Welcome Precious Babies"—Margaret Wilson.

Reception of Babies to Cradle Roll. Greeting to Babies by Superintendent of Cradle Roll—Mrs. J. Ballenger. Address by Pastor.

Solo—Miss Pearl Warner.

Closing Song.

Prayer.

RICHMOND GETS NEXT CONVENTION

Word has been received here that the next biennial convention of the Atlantic jurisdiction of the Y. M. C. will be held in Richmond. Frank Taube, local delegate, has not returned with complete details regarding the next convention.

GIRLS ARE ACQUITTED

Three colored girls, Eva Lewis, Daisy Miller and Clara Smith, were today acquitted of the charge of cruel treatment of a horse rented from the Williams livery barn. The case was heard in city court before Mayor Robbins. The girls were represented by Attorney Strayer.

EXONERATES MAN

The marshal of Eaton, O., was in Richmond yesterday and after seeing Ben Miller, arrested here this week after breaking into two residences, declared that he was not the man wanted in Eaton on a burglary charge. He said Miller did not answer the description of the man who had raided residences in that town recently.

PROGRAM

Tonight.

8:00—Suwanee River Quartet.

8:00—Dr. Geisel.

Saturday, August 21.

—Morning—

9:30—Dr. Geisel.

—Afternoon—

2:00—Suwanee River Quartet.

3:00—Byron King.

—Evening—

7:00—Suwanee River Quartet.

8:00—Byron King.

The total mechanical power in the United States is estimated at 120,000,000 horse-power.

British India has 76,181,000 acres in rice.

COUNTY HIRES THREE EXPERTS TO VIEW SPAN

Commissioners Want to Know Exact Condition of Structure Before Taking Steps in Case.

BRIDGE DANGEROUS

In order to obtain an entirely unbiased report on the condition of Main street bridge, the county commissioners have decided to engage three expert engineers to make additional inspection of the bridge and report to the board as soon as possible.

Efforts will be made to have the report submitted at the meeting of the county council on September 7, so that the council members can have the advantage of the opinions of experts before any definite action is taken.

According to the engineers who have inspected the bridge, it will be impossible to determine just how extensive the repairs should be unless the bridge is dismantled. This would require over a year, and the county commissioners believe it unwise to overload Doran bridge for that length of time.

According to the engineers who have inspected the bridge, it will be impossible to determine just how extensive the repairs should be unless the bridge is dismantled. This would require over a year, and the county commissioners believe it unwise to overload Doran bridge for that length of time.
