Why Not Have Curly, Wavy Hair

While abroad last year, a matron much envied for her youthful looks, generously confided to me several little beauty secrets which I prize highly. One of the best of these is that straight hair can be made wavy and curly over night by merely applying a little liquid silmerine. Some peculiar attribute of this harmless fluid causes the hair to dry in the most exquisite curls and waves, having all the appearance of true naturals.

My friends who have tried this are simply delighted. I find that pure liquid silmerine can be procured from any drugstore here, and a few ounces will keep the hair in curl for several weeks. There's nothing gummy, greasy or messy about it; on the contrary, it is quite pleasant to use. I'm sure if you will try this tonight—apply with a clean tooth brush—a look in your mirror tomorrow morning will give you a most agreeable surprise.—Anita Amhar's "Beauty Talks."—Adv.

1407—A Dainty Frock for Mother's Girl.

As here shown embroidered batiste in a pretty rose shade was used. The model is nice for organdie, lawn, gingham, voile, crepe, challis or dimity. It may be finished without bolero, with a round yoke of contrasting material. The dress would be lovely for party wear in crepe de chine, or embroidered voile, combined with soft silk, or it could be made of linen and trimmed with lace and insertion. The pattern is cut in 4 sizes: 6, 8, 10 and 12 years. It requires 3 1/2 yards of 36-inch material for a 10-year size for the dress, and 1/2 yard for the bolero.

A pattern of this illustration mailed to any address on receipt of 10c in silver or stamps.

TRIP AROUND WORLD RESULTS IN ROMANCE

MISS DOROTHY FROTHINGHAM

An interesting romance has been revealed by the announcement of the engagement of Miss Dorothy Frothingham, a society girl of Riverside Drive, and Lieut. Arthur N. Coles, of the English army, now at the front in France.

Miss Frothingham took a trip around the world with her father two years ago. On the Prince Eitel Friedrich, now a German auxiliary cruiser, the young couple met, on a trip from Hong Kong to Singapore. Mr. Coles had just completed his course at Oxford, and was making a world tour. They met again at Cairo and Calcutta. Last summer they met again in England. War was declared and before leaving for the front Lieut. Coles had obtained the consent of Miss Frothingham to become his bride.

The Real Suffrage Thought of Women

Motherhood is the thought uppermost in woman's mind. And with it, of course, comes the question of comfort, of helpful aids and influences. Among the best of these is a well known external remedy, "Mother's Friend." It is gently applied to the surface without the straining and pain on cords and ligaments. This influence extends through the myriad of nerves to deeper surfaces, the internal organs. And thus a period of repose must reflect itself not only in the mind of the mother, but upon the babe to come.

Young mothers who have used "Mother's Friend" have written to say how rejoiced they were at the absence of morning sickness, extreme nervousness, and other distresses of which they had heard and feared. Get a bottle of "Mother's Friend" at any drug store. Simply apply it over the stomach muscles and rest assured of perfect safety and comfort day and night. A Never Failing Way to Banish Ugly Hairs

(Aids to Beauty.) No woman is immune to superfluous growths, and because these are likely to appear at any time, it is advisable to always have some delicate powder handy to use when the occasion arises. A paste is made with some of the powder and water and spread upon the hairy surface; in about 2 minutes this is carefully removed and the skin washed. You will then find that your skin is entirely free from hair or fuzz. Be sure, however, to get real delatone.—Adv.

Great Demand for New Constipation Remedy

They say that the advent of the "santal tablet" as a vegetable substitute for calomel has resulted in an extraordinary demand for this remarkable product. It seems to have made a bit particularly with those afflicted with chronic constipation, who were quick to recognize its advantages over calomel and the usual laxatives. Santal tablets, aside from their efficacy, doubtless owe their success largely to a tendency to aid in bringing about natural functioning—instead of encouraging the "cathartic habit." Also, instead of injuring the membranous lining of the organs involved, they exert a healing influence. Instead of weakening, they add tone to the intestinal wall. And they work so easily and gently, they are of course preferred on this account to the violently acting purgatives. Their insipidness is another reason for the popularity of santal tablets. One need procure only a dime's worth, and take one tablet upon retiring, to be convinced that the ideal remedy for constipation, torpid liver, and their many evil consequences, has finally been found.—Druggists Review.
