

FUGITIVES SUFFER IN SIBERIAN INTERIOR

BUCHAREST, Oct. 7.—Hundreds of Germans who have been driven from the interior and the southern provinces of Russia are arriving daily

at Urgel on the Rumanian border. The fugitives are mostly old men and women and children, as all Germans, Austrians and Hungarians of military age have been sent to concentration camps between Moscow and the Ural mountains in Siberia.

Almost without exception the fugitives are in a pitiable condition and penniless, although many of them formerly were very wealthy. Escorted by Cossacks they have travelled hun-

dreds of miles afoot and in freight cars and their sufferings in most cases have been terrible. Before they are pushed across the Rumanian border all money over 500 roubles is taken from them.

A weighted sketching board, with which information can be dropped from an aeroplane without forcing it to alight, has been invented by a United States army private.

THE LAUREL
IS THE BEST—
WE CAN
PROVE IT

Why the Laurel Is the Best

The mere fact that we have sold so many Laurels within the past week is proof that the Laurel is the Best. Here are other reasons however:

Saves three times the fuel over other makes.
Burns the cheapest and dirtiest slack that can be bought.

The wonderful slotted fire pot burns this slack without any smoke or dirt.

Has same advantages as furnace—takes the cold air from the floor which keeps your room at an even temperature.

An advantage to the house wife is the cleanliness of the stove—no smoke will escape into the room—the patented *reed door* permits adding of fuel without smoke.

The fire pot is guaranteed by us and the manufacturer for 20 years.

The patented features on the "Laurel" prevents other stove makers from duplicating.

The Art Stove Co. (Mfr. of the Laurel) are the originals in stove making.

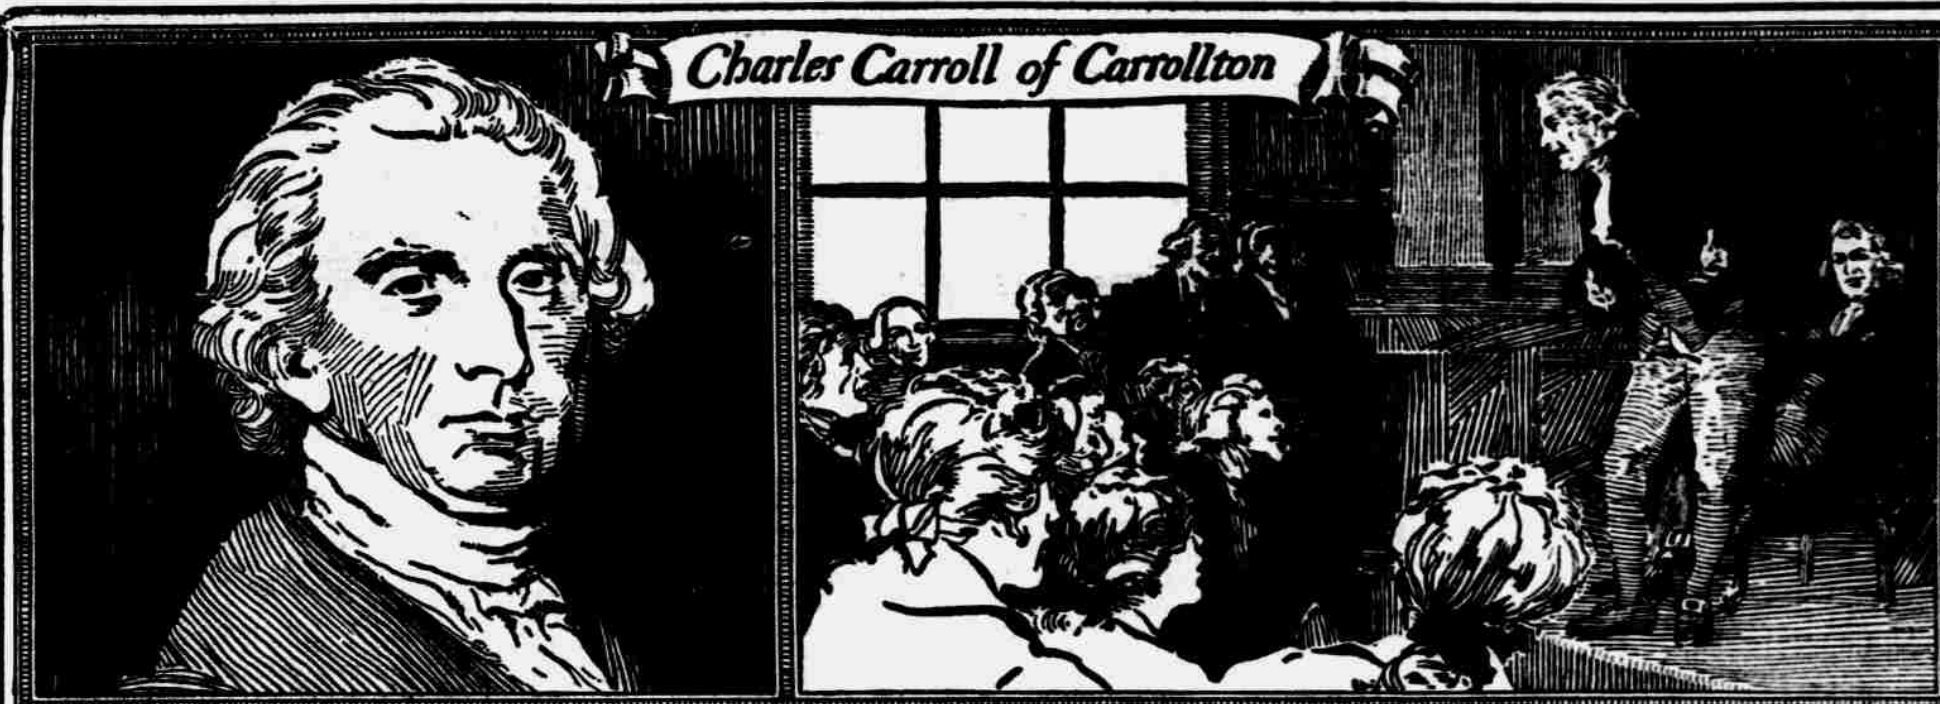

The fire burns from the outside toward the center. By so doing you get the benefit of all the heat. The register grate forces the fire to get its draft through the slots of the firepot.

The Laurel has a National Patronage, it being sold in every small hamlet, large city in America. It has over one hundred thousand users and has no competition as a fuel saver and a heater.

Charles Carroll of Carrollton, Md. "Father of Religious Liberty in America"

HISTORY proves, to their eternal honor, that the Catholics were the first in America to advocate the Freedom of all sects to worship at any shrine they chose to bend a knee. Of all the cavaliers of Maryland, none were more noble, and none adored Liberty more than Charles Carroll, who, with his kinsman, Archbishop John Carroll, strove for the hereditary rights of mankind to practice Civil and Religious Liberty. Carroll was one of the richest and most learned men in the Colonies, and when he proudly affixed his name to our immortal Declaration of Independence he courted the confiscation of his vast estates. A bystander facetiously remarked, as he did so, "There goes a few millions." He was elected to the National Convention which adopted the Constitution of the United States, but illness forbade his attendance. His cousin, though, Daniel Carroll, signed our National Law, which forever guarantees to Americans Civil, Religious and Personal Liberty. Carroll's manners were easy, affable and graceful, in all the elegancies of polite society few men were his superiors. His hospitality was nothing short of royal, and he was a lifetime user of light wines and barley brews. He died in his 95th year, the last survivor of the signers of the Declaration of Independence, and was looked upon with reverential regard by rich and poor alike. Fifty-eight years ago Anheuser-Busch launched their great institution, and have always brewed honest beers—the kind the illustrious Carroll loved to quaff. Day by day their famous brews have grown in popular favor until 7500 people are constantly employed to keep pace with the public demand. Their great brand—BUDWEISER—because of its quality, purity, mildness and exquisite flavor, exceeds the sale of all other beers by millions of bottles.

Visitors to St. Louis are courteously invited to inspect our plant—covers 143 acres.
