## Growing Girls and Boys

Every physical or mental act that is performed uses up millions upon millions of red corpuscles of the blood. The demand is enormous and continuous. Is it any wonder that the active boy and girl should manifest this need by hunger? Proper food is required so that the system may form new red corpuscles.

HEMO is a concentrated food made with the idea of supplying many of the elements needed in assisting nature to rebuild old blood cells and to manufacture new ones. It is so pleasing to the taste, so easy to assimilate, and so well tolerated by the stomach that a minimum amount of effort by the digestive system is required in converting the food elements into red blood corpuscles.

It is an ideal lunch for the boy or girl, or a pleasing beverage at meal time. Its use will convince you.

Makes a delicious food drink by simply adding water.

We suggest that you try a 50c package with our guarantee of satisfaction. At all drug stores, Thompson's Malted Food Co., Waukegan, Wis.
