

BOUSE DRAWS FINE FOR RUNNING AUTO OWNED BY ANOTHER

Another product of a state institution for minors, Louis Bouse, aged 18, received a fine of \$25 and costs and a jail sentence of forty days in city court today for having taken an automobile belonging to J. B. Hurst of Centerville, without the consent of the owner. Mrs. Hurst appeared against him. The boy, who became a ward of the state at the age of two years, pleaded not guilty.

Mrs. Hurst said that about 4 o'clock Monday morning Bouse called to her husband through the open window of a downstairs bedroom. When Hurst came out of the house, she said, Bouse, who had once lived in Centerville, told of having met two men on the National road, who had taken him into their machine for a joy ride.

Teach Him to Drive.

She said the boy told her these men undertook to teach him to drive the car, one operating the brakes, the other helping him to guide the steering wheel while running at a rate of over 50 miles an hour. Passing through Richmond and circling about the north part of the county the car finally arrived at the west end of Centerville.

There, Mrs. Hurst said, Bouse was then informed, according to his story, that the machine was owned by J. B. Hurst; that they left him with instructions to return the car to its owner. He said he passed the Hurst home several times before he discovered how to stop the car. She said the car had been considerably damaged.

Bouse said that he had nothing to add to Mrs. Hurst's story. The boy was once the ward of Isaac Houck of Centerville, but was returned to a state institution when his guardian committed suicide, about three years ago. Lately he has been living in Gary.

WILL PLANES FLY AT FALL FESTIVAL?

Will the Fall Festival be featured by aeroplane flights?

This is one of the questions which must be decided by the publicity committee in case a contract is signed with H. B. Marks tomorrow night.

The exposition manager has a flying machine which he uses in connection with most of his festivals. It was not used at the Hamilton exposition because other attractions replaced it.

Since it was announced early in the summer that aeroplane flights would probably be feature of the fall festival, citizens in general have favored the proposition and it is expected that the publicity committee will decide upon using this attraction.

HIGH PRICES PAID FOR COUNTY BONDS

Wayne county bonds are especially desirable as shown by the higher premiums which were received for the road bonds sold here this week in comparison with premiums offered other counties for bonds, the same day.

"Garfield said of him, 'If I were on one end of a log and Mark Hopkins were on the other, that would be college enough for me.' He had some ideal teacher's qualities: tact, common sense, which is a substitute for a lot of pedagogy; vision, he recognized the individual, had a sense of humor, and physical, mental and spiritual vitality."

LANGUAGE BINDS US TO ENGLAND

The United States and England have remained close together because of their common language," said Dr. Byron W. King, speaking at the Chautauqua this morning. "Two nations can't get far apart while they speak the same tongue."

Dr. King predicted that English would eventually be the universal language. He spoke on "The Growth of Language."

"We speak English, but England didn't invent the alphabet. England has had a very taking way, and she got our alphabet from the Romans."

At the conclusion of Dr. King's program Miss Larmer, of the King school of oratory at Pittsburgh, presented a series of child impersonations.

The Bed—

This magnificent Bed is not heavy cast iron, but is made of drawn steel tubing, light and strong. Comes in Vernis Martin finish (which looks like brass and wears longer), or White Enamel; has 2-inch continuous posts, strong fillers and is fitted with all steel, ball bearing casters. It is one of the most handsome Beds ever set up on our floors—one which we warrant to give years of satisfaction and service.

THE MATTRESS in this outfit is selected from our regular stock. It is of standard quality and is full 45 pounds weight. It has a substantial striped tick covering and downy cotton top. It is just as good to sleep on as it is good to look at and if of approved sanitary construction, easily cleaned and kept clean.

The Spring—

is made from double-stranded link spring fabric supported at each end on highly elastic helical springs attached to smooth steel end angles. It is impossible for this Spring to sag. Put a 35 lb. boy on one side and a 350 lb. man on the other; the center still remains taut and level. The reason for this is because the stretch comes in the Helical Springs—not in the fabric.

The quality of the spring is fully in keeping with the rest of this wonderful Bed Outfit. The spring is slightly different from illustration.

Our Credit System--

Simple—liberal and without complications—that explains our credit system. You merely come here—select your needs, make a small deposit and arrange to pay the balance as best suits you. No difference who you are, where you live or where you work—it matters not to us. You are welcome to credit here and plenty of it. Every dealing is confidential—just a matter between us.
