RUSH TO BUY MARKS BIG EXPORT TRADE

CHICAGO, Jan. 8.—Prospects of continued heavy exports and of diminishing stocks in the United States led today to a general rush to buy wheat. Apparently a majority of dealers believed that the outlook was for a continuance of the war, and that the need of supplies in Great Britain and other European countries was increasing. In this connection, bulls put emphasis on reports of the larger number of vessels available now to move grain. Opening prices, which ranged from 1/2 to 3/4 higher, with May at \$1.85 1/2 to \$1.86 1/2, were followed by a moderate reaction and then a fresh upturn. Corn ascended with wheat, and soon crossed above \$1.00 a bushel. Notwithstanding the exceptionally high prices, country offerings were reported to be light. After opening unchanged to 1/4 up, the market sagged a little, but later scored gains all around. Oats followed the advance of other cereals. There seemed to be no pressure to sell. Higher quotations on hogs lifted provisions. Commission houses headed the buying.

YES! MAGICALLY!
CORN LIFT OUT
WITH FINGERS

You simply say to the drug store man, "Give me a quarter of an ounce of freezone." This will cost very little but is sufficient to remove every hard or soft corn from one's feet. A few drops of this new ether compound applied directly upon a tender, aching corn should relieve the soreness instantly, and soon the entire corn, root and all, dries up and can be lifted out with the fingers. This new way to rid one's feet of corns was introduced by a Cincinnati man, who says that, while freezone is sticky, it dries in a moment, and simply shrivels up the corn without inflaming or even irritating the surrounding tissue or skin. Don't let father die of infection or lockjaw from whitening at his corns, but clip this out and make him try it. —Adv.
