## BRIDGE FIRM'S PLAN MEANS BIG PROFIT ON LOCAL CONTRACT

More than twenty per cent of the money appropriated for the Main and South G street bridges will go into the treasury of the National Concrete Bridge Company if the successful contractor uses that company's plans.

Plans for both bridges have been filed by this company with County Auditor Bowman. They provide for use of the Luten patents. Professor Daniel B. Luten is consulting engineer for this company which has headquarters in Indianapolis.

The fee to be charged for use of plans by the National company for the South G street bridge is \$38,340 and for the Main street bridge is \$27,953.

## May Use Mueller's Plans

County Bridge Engineer Mueller's plans, which have been approved by the county commission, are on file in the auditor's office. They may be used free of charge by any bidding contractor.

Use of the National company's plans would reduce the amount to be spent for materials and labor on the bridges to 30 per cent of the total. Use of Mueller's plans will permit the contractor to spend 100 per cent, if necessary, on construction.

The Standard Re-enforced Concrete company, also an engineering company and also of Indianapolis, has filed plans. It will charge contractors five per cent of the contract price for their use.

Bids for these bridges will be opened one week from tomorrow, May 12th.
