

AUDITORIUM MAY BE ERECTED ON ROOSEVELT FIELD

Directors of Chautauqua To Vote on Plan Next Week—Expect to Fill Stock.

Plans for erection of a permanent pavilion for the Richmond Chautauqua will be discussed at a meeting of the directors, which probably will be held some time next week, according to an announcement made today by members of the board.

Definite steps toward the erection of a permanent Chautauqua pavilion will be taken as a result of the resolution adopted last Sunday afternoon favoring the erection of such a pavilion.

Sentiment favors it. Sentiment in favor of the pavilion is very strong and it is believed that the success of the Chautauqua will be much greater when a larger seating space for Chautauqua audiences is provided. The fullest measure of success at some of the big attractions of former assemblies has been impossible on account of the lack of proper seating accommodations.

This was shown at the last assembly when W. J. Bryant spoke. Although the largest crowd of the entire assembly was on the grounds, less than two-thirds of the crowd was able to hear the address on account of lack of space, and a large number of those who did hear the address were forced to stand.

Can Be Enclosed. No plans for the construction of the building have been presented to the board although information from other Chautauquas where a permanent pavilion is maintained has been sought. The building, however, will be built in such a way that it may be used as an enclosed building, or an open air pavilion.

Two locations have been suggested for the new building. The most desirable location, and the one that will probably be used if the building is erected is on the southern half of Roosevelt field. The large open space, and the natural slope of the ground make the field well suited for the pavilion. The other is the present location of the auditorium tent. This location is not favored on account of the lack of room and the necessity for removing several trees to make the space large enough to accommodate a building such as is desired by the directors of the Chautauqua.

Gets Strength As Tonic Gives Him Appetite

True Feels Better in Every Way Since He Gave Tanlac a Trial.

D. N. True, 320 Osage street, Greenville, Ind., had been in a weakened and run down condition for a long time when a friend told him about Tanlac one day and he tried it.

"It helped me right from the start," Mr. True said.

"You know, I'd gotten so I felt weak about all the time. I didn't have any appetite and I guess that had something to do with it for a person naturally will feel weak if he doesn't eat right."

"I had dizzy spells often, too, especially when I'd stoop over and then raise up again."

"Well, I heard about Tanlac through Jacob Davis, a friend of mine. He said he had tried it and that it had helped him and so on his recommendation I got a bottle and began taking it."

"As I said before, it helped me right from the start. It wasn't long before my appetite came back and then I started getting stronger. I've taken about six bottles now and I feel better in every way. The weakness is all gone, my appetite is good and I never have dizzy spells like I used to."

If you are not feeling right get Tanlac today. Delay in health matters is dangerous. You can get Tanlac at any of Clem Thistlethwaite's drug stores. ADV.

Winter means the test of your judgment as to comfort, so make up your mind early that you will have IDEAL-AMERICAN heating—the kind that the experience and judgment of thousands of owners of IDEAL-AMERICAN heating outfits has shown to be the most economical, most durable, and most comfortable.

With a spirit of preparation in the air, it is wise for you to look forward to the fitting of your old or new house with one of these labor and fuel saving heating outfits.

AMERICAN & IDEAL RADIATORS & BOILERS

Coal is a large item in the family budget—so be wise and choose the IDEAL-AMERICAN heating outfit which will exactly suit your needs and get the utmost heat out of the smallest amount of fuel. You can economize greatly by burning cheaper grades of fuels, for IDEAL Boilers burn all kinds of hard and soft coal, wood, lignite, pea coal, screenings, gas, oil, coke, etc.

Don't wait for the rush of Fall to put in IDEAL heating

The exact and scientific proportions in the construction of an IDEAL boiler, make it a heat producer unequalled by any other device. IDEAL fire pots will hold fuel charges to last 24 hours and the delicate adjustment now possible with the IDEAL draft control gives a regulation of the heat that keeps exact step with the demands of the weather. No need to over-heat or under-heat with an IDEAL boiler and thus waste valuable fuel. We have yet to hear of an IDEAL boiler or an AMERICAN radiator that is "really worn out." They give perfect heat service as long as you live.

Easily put in all kinds of buildings

Cottages, residences, stores, hotels, theatres, churches, schools, clubs, hospitals, greenhouses, etc., are readily equipped and served with heat at the minimum cost.

Phone your dealer today for an estimate on putting IDEAL-AMERICAN heating in your building. Send for catalog "IDEAL HEATING"—full of valuable hints and illustrations—should be read by every one interested in economical comfort.
