

CANNON, SPEED NEEDED BADLY

WASHINGTON, Jan. 7.—Cannon, coalition and speed are the three elements needed to win the war in the shortest possible time. Representative Medill McCormick, of Illinois, told the house today in a speech reviewing his three months tour of the battle fronts.

The allies, he said, "want at least 25,000 great guns, first of all; then they want men and want the heartiest co-operation of all political elements in America for its effect on morale to win the war."

"The German staff," he said, "must arrive to induce France to make peace on the score that American will not make ready in time. That is why the front from the Alps to the Channel has assumed a greater importance than at any time since the battle at Verdun."

German soldiers deserted in increasing numbers last summer, he said, and among the captured during the last few months there were many tear-faced youths of 16 and 17.

HERE'S POTATO BREAD RECIPE

INDIANAPOLIS, Jan. 7.—Federal Administrator, George A. Prescott of Michigan, has found a new wheat-flour substitute for bread making and at the same time a chance to dispose of the immense potato crop now in storage.

The experience of the Michigan Administrator as disclosed in a letter to Dr. Harry E. Barnard, Federal Food Administrator of Indiana, may be the means, Dr. Barnard thinks, of conserving a large quantity of wheat in Indiana and at the same time save a large loss to Indiana farmers, due to a declining potato market.

Mr. Prescott also informs Dr. Barnard that the 1917 potato crop in Michigan was the largest in the State's history and there is a big surplus now, for sale at popular prices. These can be offered to Indiana dealers upon receipt of order. Mr. Prescott recommends the following potato bread recipe, which he says will serve a double purpose in conservation:

Three cakes compressed yeast, one-fourth pound salt, 12 ounces sugar, one-half pound of hardened vegetable fat, 15 lbs. flour, 8 quarts liquid, five pounds potatoes, after having been put through a ricer. Mix ingredients in a stiff hard dough. Allow to raise until double its size; tin and when light, bake. This will make about thirty-one, one pound loaves of bread.

No Sacrifice Too Great to Insure Children's Safety, Says Pershing

(By Associated Press)
WITH THE AMERICAN ARMY IN FRANCE, Thursday Jan. 3.—On behalf of the American expeditionary force, General Pershing was answered new year's messages from the United States. A message to the army from the children's American loyalty league read:

"Dear American Soldiers: We know the sacrifice you have made for us and will make that we may be safe and happy. We thank you and wish you all a happy new year."

General Pershing responded as follows:

"The American soldiers in France are very glad to have your message. No sacrifice we can make will be too great if we can insure the safety and happiness of the children of America."

From Dr. Anna Howard Shaw, suffrage leader and member of the Woman's Council of National Defense, came this greeting:

"The women of the United States are with you in the spirit of service. You are our standard bearers, our hope. We love you, believe in you, pray for you."

General Pershing replied:

"All ranks of the American expeditionary force unite in heartfelt thanks to the women of America for their love and prayers. The patriotism of our incomparable women, than whom there are none other more noble, shall be our constant inspiration until the great task which is entrusted to us shall be accomplished. Accept our best wishes for the coming year and our firm confidence in final success."

To Christmas messages from the women of the American Red Cross, the American commander sent the thanks of all ranks, adding:

"The love and confidence of our women will make us all better men and better soldiers and hold us firm in the courage and determination to win."
