

PAYMENT OF TAX THIS WEEK NEAR THREE BILLIONS

BIGGEST OUTPOURING OF TAXES IN HISTORY WILL OCCUR THIS WEEK.

WASHINGTON, D. C., June 10.—The biggest outpouring of federal taxes in the history of the nation will occur this week. More than \$2,000,000,000 in income and excess profits taxes from individuals and corporations is due by next Saturday night, in addition to the half billion which already has been paid in this year. Total receipts from these sources are expected to be about \$2,775,000,000.

More than 6,000,000 separate payments of income taxes are to be made in addition to hundreds of thousands of excess profits tax payments.

Corporations Pay Most.

Approximately three-fourths of the total tax will come from corporations and about one-fourth from individuals. Millions of persons will pay income taxes for the first time.

As an indication of the huge task imposed on the internal revenue machinery of the government with its sixty-four collection districts, it is recalled that last year only 780,000 income tax payments were made under a former law, and \$800,000,000 was received on incomes.

Many Sell Securities.

Many corporations and big business interests face the necessity of selling securities or other assets to meet tax payments this week, according to reports to the treasury, and officials are watching carefully the effect on the money and securities markets.

A method of installment payments in advance was arranged under the law, but comparatively few corporations took advantage of it. Under another plan, however, the treasury in the last six months has sold more than \$1,500,000,000 of certificates of indebtedness acceptable in payment of taxes, and these virtually amount to advance payments.

The certificates are not redeemable until June 25, but the treasury has urged corporations and banks to turn them in this week to avoid disturbing the distribution of money.
