

TO PERMIT NO INTERFERENCE WITH DRAFT CALL

Crowder Refuses to Delay
War Program to Relieve
Harvest Conditions.

WASHINGTON, July 12.—In response to request for postponement of the July draft call in the Northwest, where wheat is ready for harvest, Provost Marshal General Crowder has informed the Department of Agriculture that the military program will not permit of delay in filling the monthly demand for drafted men.

Farmers and farm organizations of the Northwest had appealed for aid. When Assistant Secretary Ousley took up the question with General Crowder he found the situation had been canvassed thoroughly before the July call was placed, and that to relieve conditions in the spring wheat states as far as possible entrapment in that section was ordered to begin July 22, instead of July 5 and 15, as elsewhere.

Provost Marshal Crowder today issued an order suspending temporarily induction into military service of all subjects or citizens of neutral countries pending drafting of regulations under the amendment to the draft act in the new army appropriation law, under which neutral subjects or citizens who have declared their intention of becoming citizens of the United States may be relieved from military service.

The amendment provides that such regulations shall be consistent with the provisions of the amendment, which debar forever from citizenship neutral subjects who, having declared their intention of becoming citizens, seek relief from military service.

Also there will be community singing, and the unfurling of a French flag.

**Poilus Camouflage
Even Helmets Now**

Poilu With Camouflaged Helmet.
The French poilus have started the hunt repeatedly with their cunning in fighting methods. The latest bit of strategy pulled by the French fighters is the camouflage helmet. The poilus found that the ordinary steel helmet was visible for some distance against the mottled background of brush and barbed wire. So the army artists were called upon to help. Now the helmets are marked with a series of white lines which makes them blend with the background and helps make the wearer part of the landscape.

Red - Hot Weather! Stomach Off?

No Appetite? Mouth Dry? Tongue
Stiff and a Fierce Thirst?
Here's Relief!

Hot heavy foods and feed drinks often play havoc with bad stomachs in hot weather. The weak ones never get a chance. A quickly enlivened or over-worked stomach is a start to untold misery for its owner.

When you have that dull, depressed feeling after eating—stomach pains, bowel disorders, heartburn or nausea, teaching food repeating—it is the dangerous point. You want to look out—and be quick about it in this hot weather.

A way has been discovered to make sick stomachs well, and to keep them cool and sweet. It is a commonsense way. No starvation plan of diet is needed. Make this test and see how quickly you get a good appetite in hot weather and enjoy the things you like without misery to follow.

Grocer Up Against It

"I have been up against it for past 3 years suffering from pain in my stomach and side until I was considering giving up my grocery business. Doctors and medicine did not help me. I heard of May's Wonderful Remedy through a friend in Buffalo. The first dose gave me more benefit than all the medicine I had taken before and am now feeling as well as ever in my life." It is a simple, harmless preparation that removes the catarrhal mucus from the intestinal tract and relieves the inflammation which causes practically all stomach, liver and intestinal ailments, including appendicitis. One dose will convince or money refunded. Thistlthwaite's Drug Stores and Druggists everywhere.

NIGHT OPERATOR—ALL IN Vinol Made Him Feel Better, Look Better, Sleep Better.

Springfield, Mass.—"I am a night operator—was all run-down, couldn't sleep, no ambition—I had tried blood and nerve tonics without help—and thought I would try Vinol and I must say it has built me up so I feel better, look better and sleep better." Charles T. Harder.

The reason Vinol was so successful in Mr. Harder's case, is because it contains beef and cod liver peptones, iron and manganese peptones and glycerophosphates, the very elements needed to build up a weakened, run-down system, make rich, red blood and create strength.
