

--Winter Is Coming!--

NOW IS THE TIME to begin thinking of your heating problem for the winter which will be on us before we know it, like many other lines only worse, the stove situation is pretty hard to tell about. We are advised by the manufacturers that when our order is filled they cannot promise to ship anymore. Steel or Armco Iron, which is used in the construction of the GLOBE STOVES and RANGES is very much in demand.

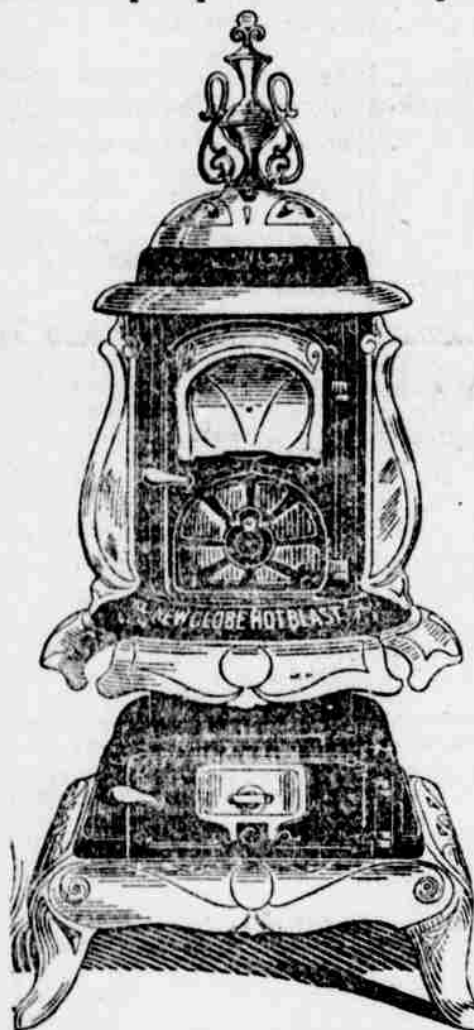

When we were making our selection of a line of stoves to meet all people's requirements, several things were to be considered. First, to get a stove that had proven itself worthy of place in anyone's home. Second, to get a stove that was capable of doing all that would be expected of any stove. Third, to get a stove equal in appearance to its operation. Fourth, to get a stove which could meet all these requirements at a price to suit the buyers, and lastly to get a stove manufactured by a concern which would stand back of every stove with a guarantee as to its workmanship and operation. To find a stove equal to all these we have decided that the GLOBE STOVES and RANGES fill the bill best of all.

GLOBE
STOVES and
RANGES
STAND for QUALITY

Your requirements when buying a stove or range is just as critical as ours—when you select a stove or range you want to be sure that it is going to give you perfect satisfaction, in baking and heating. The best proof to you that the GLOBE is the stove you should buy is that more GLOBE STOVES are in use around you than any or all other makes. No doubt some of your relatives or friends have a GLOBE. Ask them about it and they will tell you they are more than pleased. This should be convincing to you that what you want is a GLOBE.

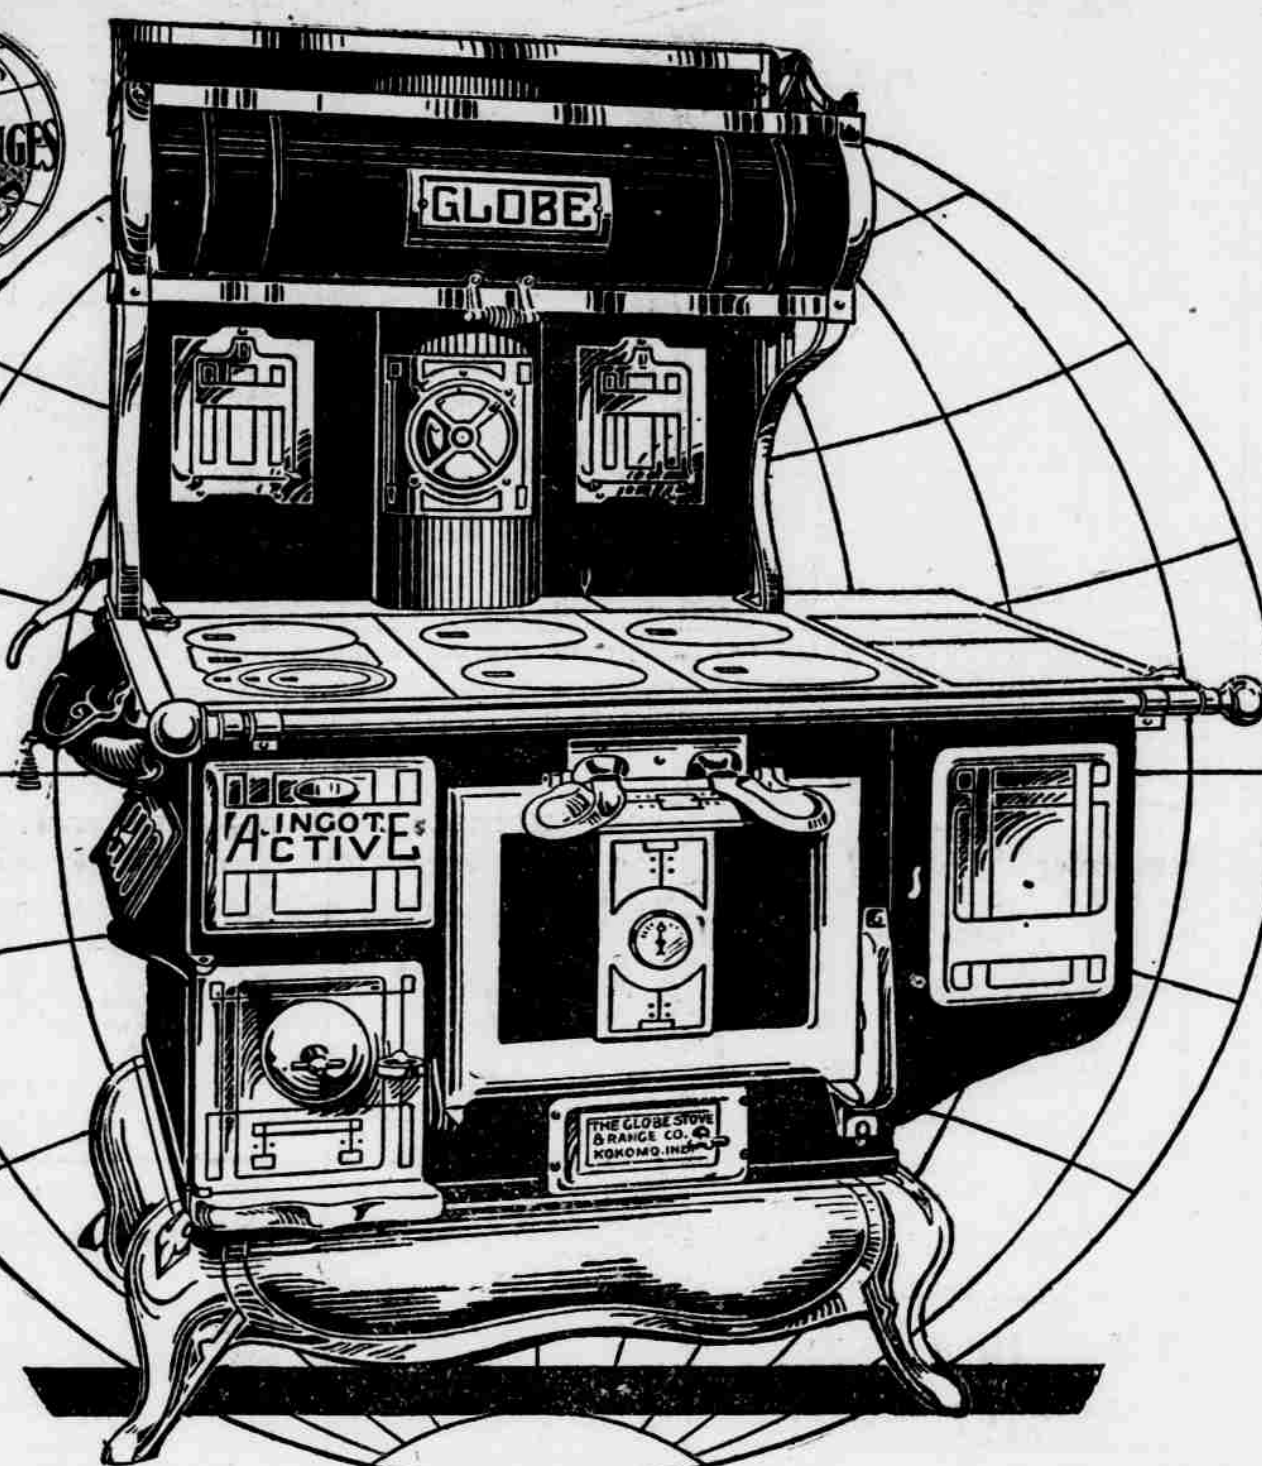

GLOBE HOT BLAST

The size of your coal bill depends on whether you use a GLOBE HOT BLAST or not. This stove actually burns any kind of coal from the cheapest slack to the best grade of hard or soft coal. The Hot Blast feature of this stove is what enables you to do it, and with the prospects for a cheaper grade of coal for this year, it is up to you to get a stove that is right. The material used in the construction of the

GLOBE HOT BLAST

is the very best ever put into a stove and every door and damper is machine fitted so that it is perfectly air tight, giving you control of your fire always.

Rex Oak HEATERS

Are made of the same material and the same workmanship as all other GLOBE STOVES, only smaller in size and different in trimmings. If you do not want to pay the price of a Hot Blast, we recommend the

Rex Oak Heaters

to give you perfect satisfaction.

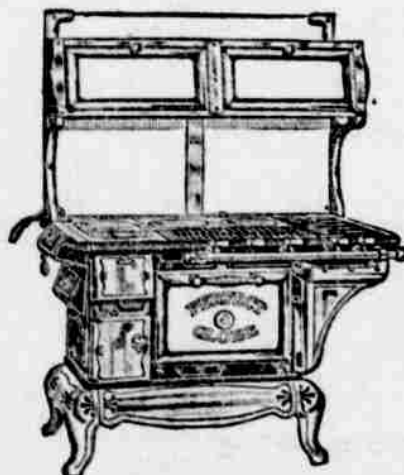

This stove comes in three sizes and you can find the size to heat any number of rooms you wish.

Globe Ranges are the most beautiful, economical, well constructed, most satisfying stoves shown today!

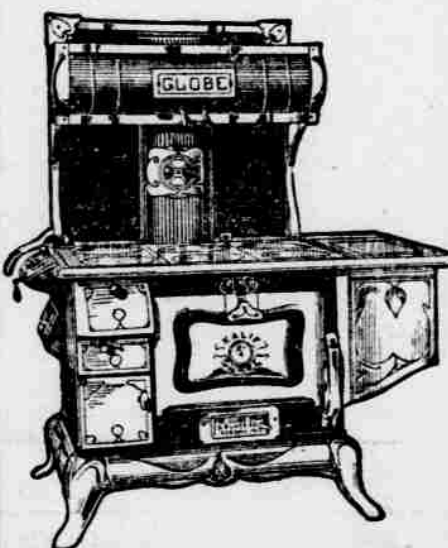

These ranges are either Cast Iron or Armco Iron which is the purest metal used in stove construction. The Globe Stove and Range Co. give an insurance policy for 25 years with each range made of Armco Iron, against rust and burning out. The success of the Globe Range is due to the large flue construction, which gives perfection circulation to all parts of the stove.

COMBINATION RANGES

If you are located where you can use gas some of the time a Globe combination range is the most satisfactory you can buy. The oven can be heated with either gas, coal or wood. You can bake with gas and cook on top with coal, or bake with coal and cook with gas all at the same time. An examination of this Combination Range will convince you.

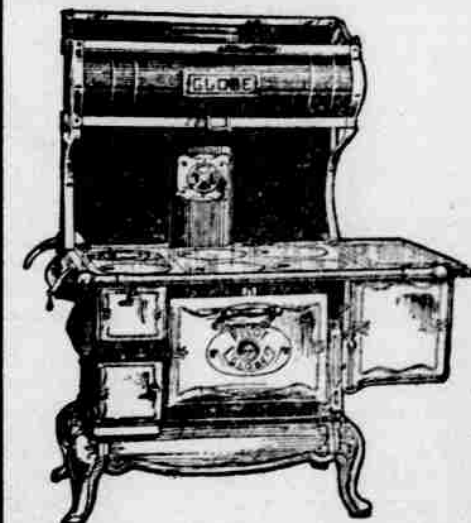

The Kalif Range is one of our biggest sellers, because of its beauty. The oven and the reservoir are of full capacity. The body is not as large as some of the other styles. Thereby making it a very popular size.

Our showing of Globe Stoves is ready for you and we invite you to our store to see them, whether you buy or not you are always welcome.

CAST RANGES

Made of the same material which our forefathers had and liked so well. Those not liking a steel range will be pleased with the GLOBE CAST RANGE.

Select your stove early and be sure you will have one. Already we have stoves sold being held until they are needed. We will deliver them to you any time to any place.

REED'S

The Globe Stoves, like all other lines of merchandise have greatly advanced in price, but now it is a matter of getting them, rather than the price. Our honest advice to you, whether you buy of us or someone else is to place your order early.
