Manufacture of Beer to Be Stopped After Dec. 1—Senate Passes Dry Measure.

WASHINGTON, Sept. 7.—Manufacture of beer in the United States will be prohibited after December 1 next, as a war measure.

This announcement was made Friday night by the food administration, which said the decision had been reached at conferences between President Wilson and representatives of the fuel, food and railroad administrations and th war industries board.

The $12,000,000 emergency agricultural appropriation bill, with its rider for national prohibition from next July 1 until the American armies are demobilized after the end of the war, was passed Friday night by the senate without a roll call.

Before final passage of the measure, the senate voted 45 to 6, to retain the prohibition rider. A final effort to postpone the effective date of the "dry" legislation to December 30, 1919, was defeated.

The bill now goes to the house, and because of the many amendments inserted by the senate, it undoubtedly will be sent to conference. Prohibition leaders, however, expect the house to agree to the "dry" rider so that there will be no possibility of changes being made by the senate and house managers.

must have been frightful consequences for the Germans.

Make Successful Advance.

The slowng down of the German retreat from the Aisne has enabled the Americans and French to bring up supplies and artillery and get into the line the full strength desired for forward positions. The Germans, of course have not had the same opportunity to place their artillery in position with the result that artillery action was enlivened and may be expected to increase until a new move toward the Chemin-Des-Dames is made. That the Germans will establish themselves on that line there is almost no doubt. This conclusion is reached from statements made by prisoners and substantiated by circumstances incident to the operations.

The Americans concluded today their movement across the plateau and down the river. They were constantly made targets, but the movement was accomplished with astonishing success notwithstanding the Germans' intimate knowledge of the abandoned territory and their excellent opportunity for observation. French airplanes assigned to this front were remarkably daring and efficient in their operations.

Township Liberty Loan Organizations Prepare For Thorough Campaign

In every township in Wayne county preparations for the big Liberty Loan drive, September 25, 26 and 27, are well under way, in fact the organizations with two exceptions, are in readiness for the actual canvass for bond subscriptions.

An example of the interest in the undertaking and the thoroughness of preliminary organizations is strikingly shown in a letter sent out to all members of the Clay township organization by Ray Deeter, township chairman. The letter, a copy of which is on file with the county committee is as follows:

Dear Sir:

Please be advised that you are appointed a member of the Liberty Loan committee for Clay township for service in connection with the Fourth Liberty Loan.

We are officially informed that the quota for Clay township is $53,765.00, which is approximately $67.00 per capita. This amount we are expected to raise and it will be readily seen that a much heavier subscription must be made than before. The campaign will be launched on September 25, 26 and 27, and it is desired that the full quota can be reported on the first day.

The Treasury Department advises that "The Millions of boys in France and Europe protecting our liberty is of vital importance and concern to every citizen of the United States. With their own blood they are insuring the solvency of America. They are protecting not only your lives and future happiness, but underwriting the stability and value of every piece of land and your possessions of every nature. Every American is expected to do his part fully in subscribing to the Fourth Liberty Loan. The Federal Government is entitled to the first claim upon your holdings, upon every dollar available for investment and upon every dollar necessary to be raised by credit; just as it is entitled and has a claim on every man available for military service. The outcome of his gigantic conflict depends upon your support of the cause. Excuses will not pay the debt you owe the boys that stand between you and the enemy."

As soon as definite instructions and necessary supplies are received an organization meeting will be called which you are requested to attend in your district. Unless the full quota is required in your district. Unless the full quota is subscribed on your first canvass a recanvass will be necessary. It is therefore highly important that this campaign be conducted in no uncertain way.

Very truly,
RAY DEETER.

Democracy Must be Taught in Schools; County Teachers Are Told

Teaching democracy in the schools and discussing means of making every subject focus on war issues was the outstanding feature of the Wayne county teachers' institute Saturday.

In the general assembly of city teachers which was held at 8:30 o'clock, Superintendent Giles spoke on the question of military preparation in the schools. Mr. Giles stated that he was opposed to military training in the schools because he believed it was ineffective as training for service and interfered with other studies. Mr. Giles stated he believed the mission of the teacher this winter would be to instill principles of democracy and good citizenship in all the pupils, and through them to reach the homes.

"You can teach military tactics in six weeks, but it takes years to teach democracy," said Mr. Giles in summary.

Co-operation between the teacher and the supervisor also was discussed.

"The system of teaching has changed from the autocratic basis of the teacher telling the pupil he must do this and must not do that, while the supervisor maintained somewhat the same attitude towards the teacher," said Mr. Giles, "to the present method of mutual helpfulness and co-operation throughout the school system."

The new physical director, Mr. Eckel, who takes the place of Nohr, said Saturday that he is planning to carry out the work for the year along the same lines which previously were used. Mr. Eckel comes from Cincinnati, and has been exempted from the draft so far because of a dependent wife and child.

In the high school work Mr. Eckel will acquaint the boys with military terminology and formations as much as possible in the gymnasium work, and although Mr. Eckel does not intend to have military drills entirely, as much of the gymnastic work as can be adapted, will give the boys an insight into military requirements in drills.

Weaver has not been in good health since the Dayton flood, when he performed heroic services in getting guests out of the hotel. Burial will be at New Paris Sunday afternoon. Mrs. O. G. Porterfield and Frank Plummer of this city are both cousins of the deceased man.
