

## ENTIRE NATION MUST CONTINUE TO SAVE FOOD

No Specific Food Conservation Set by Hoover—Calls for Continuous Sacrifice.

INDIANAPOLIS, Ind., Oct. 15.—"The American people have taught themselves new habits in their relationship to food, now they must teach themselves to abstain from much of the food to which they have become accustomed."

This is the official word brought from Washington today by Dr. Harry E. Barnard, federal food administrator for Indiana, who attended a conference with other state food officials and Herbert C. Hoover, in anticipation of the enforcement of the new conservation program, which becomes effective October 21st.

"Our new program is not only more difficult, it is more important than those which called for meatless and wheatless meals and days. It abandons the policy of asking for definite sacrifices and more insistently calls for a continuing a sacrifice of at least one half of the food stuffs to which we have become accustomed. Every one will be expected to eat enough, no more, but particularly to eliminate waste and abandon all wasteful practices as rigidly as they save money with which to buy thrift stamps and Liberty bonds."

Imports to be Limited.  
Mr. Hoover's message to Indiana, Dr. Barnard stated, is that the nation's progress in ship building has not been in keeping with the tremendously increased and increasing demands that have been made for ships and tonnage. The requisitions for food to sustain our vastly increased army in France have prevented the accumulation of a surplus in America and have to add to the danger of our being unable to meet our agreements to ship food to the civilian in friendly and neutral countries.

Only the bare necessities will be imported, the food administrator announces, and these will be brought in in old-fashioned sailing ships, much after the style of a hundred years ago. Sugar and coffee will be limited and the consumption of the former will be the only definite restriction that will be enforced, and this will be continued on the basis of two pounds per capita per month.

Our associates in the war, on continental Europe, will receive through the United States food administration their entire sugar supply, and this will involve even closer scrutiny of distribution and supply in America. The fact that coffee will be difficult to secure, will serve to emphasize, also the importance of not wasting it.

Must Reduce Eating.  
"Our new food card," concluded Dr. Barnard, "means that we must reduce the amount of bread we have been eating; we must do without much of the beef and pork and fats that we have considered necessary for our well being. We must make very definite reductions in the amount of sugar we have required, and this may indeed be recognized as more difficult than the former voluntary sacrifices we have made."

"I bring the word from Mr. Hoover, this is the hour of our greatest trial in feeding a starving world, and it will take all of our ingenuity, all of our resourcefulness, all of our patriotism and sympathy for the stricken peoples of Europe, to turn the trick; but I know he was right when he said, we will do it. Indiana will do her part, as she has been doing, and will step forward in support of the conservation program as she has in all other war activity."

### COMB SAGE TEA IN HAIR TO DARKEN IT

Grandma Kept Her Locks Dark, Glossy, and Youthful with Sage Tea and Sulphur.

The old-time mixture of Sage Tea and sulphur for darkening gray, streaked and faded hair is grandmother's recipe, and folks are again using it to keep their hair a good, even color, which is quite sensible, as we are living in an age when a youthful appearance is of the greatest advantage.

Nowadays, though, we don't have the troublesome task of gathering the sage and the mussy mixing at home. All drug stores sell the ready-to-use product, improved by the addition of other ingredients, called "Wyeth's Sage and Sulphur Compound." It is very popular because nobody can discover it has been applied. Simply moisten your comb or a soft brush with it and draw this through your hair, taking one small strand at a time; by morning the gray hair disappears, but what delights the ladies with Wyeth's Sage and Sulphur Compound, is that, besides beautifully darkening the hair after a few applications, it also produces that soft lustre and appearance of abundance which is so attractive. This ready-to-use preparation is a delightful toilet requisite for those who desire a more youthful appearance. It is not intended for the cure, mitigation or prevention of disease.—Adv.
