

SURVEY GIVES IMPORT NEEDS OF EUROPEANS

700,000,000 Bushels of Wheat and Rye to be Minimum Requirement.

(By Associated Press)
PARIS, June 4.—A preliminary survey of the import necessities of Europe except Russia show that the area will need 700,000,000 bushels of wheat and rye at a minimum, or 350,000,000 bushels as a possible maximum, Herbert C. Hoover, the head of the allied relief organization, said in a statement issued today. The export surplus of wheat and rye from the larger exporting countries indicates that the needs of Europe can be met. Mr. Hoover estimates the exports of the United States at 470,000,000 bushels.

"Through our organization and cooperation with the various governments," the statement says, "we have completed a preliminary survey of the food prospects of Europe and the import necessities, outside Russia, for the harvest year beginning Aug. 1, and the world's supplies available to meet these needs."

"We estimate the total prospective European yield of wheat and rye outside Russia, as of May 1, after deducting seed, at 1,550,000,000 bushels. This indicates a crop of about 77 per cent of pre-war normal. The pre-war consumption, outside of seed, was about 2,500,000 bushels, indicating a net import of about 950,000,000 bushels if consumption were normal next year. The somewhat diminished populations and the diminished buying power militate against full normal consumption, but the least possible consumption with the maintenance of public health we estimate at 2,250,000,000 bushels."
