

WOMEN OF OHIO ASSURED ACTION BY LEGISLATURE

Republican Advisory Committee Goes on Record as Approving of Suffrage.

COLUMBUS, June 11.—Ohio women scored heavily yesterday before the Republican state advisory committee at its session here. A resolution was adopted placing the party on record in favor of woman suffrage and at the same time recommending to Republican members of the legislature that they support the resolution ratifying the federal suffrage amendment.

Further recognizing the women the committee decided informally to appoint four or more Republican women to membership on the state advisory board.

The suffrage resolution is expected to come up for adoption in the legislature Monday evening, when the assembly reconvenes to finish its work. Indications are said to be that it will be adopted by a large majority.

Republican leaders last evening were much disappointed because Ohio could not be the first state to ratify the amendment. Illinois and Wisconsin both have ratified.

Captain Victor Helms of Cincinnati, who is in charge of the Chicago office of the Republican national committee, addressed members of the central and advisory committees in a joint session. He declared that Republican prospects were excellent throughout the entire central west.

Party work and campaign plans were discussed and considerable time was spent in discussing state legislation. It was said that the plan for financial relief for cities over which the legislature and Governor Cox are deadlocked.

Lacking a quorum the central committee did not transact any business.

Hot Weather Demands a Refrigerator

Manufacturers Advise They Cannot Fill Orders on "CHALLENGE" Refrigerators---We Repeat Our Advice to Buy Yours Now

We could use a whole page in telling you of the merits of the famous "CHALLENGE" line of Refrigerators. They are the most economical to the consumer—first, in original cost; second, in saving ice. There is no real economy in saving ice unless the refrigeration is the best, because a sufficiently low temperature must be had to properly preserve the food.

With the Challenge you get the maximum amount of refrigeration with a minimum amount of ice. The sale of this line has increased to the point where the manufacturer is unable to supply the demand, and it is doubtful if we can secure more.

And no wonder there is such a demand. They not only

are the most economical, but also the most sanitary and most easily kept clean. They are in every way the ideal refrigerator for domestic use, and, no matter what your requirements are as to size, etc., we have one to meet your needs. We could write and write about them—but all we want you to do is to come in and see them. Then you'll know why we are so enthusiastic about them.

Now is the time to buy. You not only save money on the purchase, as we bought them before the price advanced, but right now is the time you need one most, as you are likely to lose more food now when weather is uncertain than you are later when you are sure it is going to be hot every day.
