### After Harvest Values—

The farmer who is enjoying splendid crops and prevailing high prices for them will be greatly pleased to find that furniture has not kept pace in advanced prices and that the money realized from a sale of wheat, corn, hogs, etc., at present prices will go much farther on a purchase of furniture now than the money from the same amount of grain or livestock would have gone a few years ago.

### Our Charge Account Plan—

We benefit thru service to others and an intelligent co-operation. We fully appreciate that it is not at all convenient or possible for many of our best people to pay cash and we have a very dignified Credit Plan—a plan which does not include collectors—and we will gladly explain it to all who are interested. It will be found a very pleasant and satisfactory method and may materially assist you in making your plans.
