

## YANKS MISSED BY CAMBRIDGE; STUDIED HARD

English University Liked American Soldier-Scholars—Wants More of 'Em.

(By Associated Press)  
CAMBRIDGE, Eng., August 28.—The departure of the American soldier students from Cambridge university is regretted. They are missed. "Quite a gap has been left by the Americans," the correspondent was told by W. F. Reddaway, of Fitzwilliam hall, censor of non-collegiate students, and the Rev. J. P. Whitney, professor of ecclesiastical history at Emmanuel college, which was John Harvard's, put in a quick corroboration. "Indeed they are," said he. "They were a cheery lot. We all liked them. They lent quite a bit of color." The university authorities generally were impressed by the earnestness with which some of the Americans worked hard, however; many taking the view that they would profit more by looking about in a leisurely fashion, studying English practices and manners and cultivating the social side of things, than they would be by burying themselves in books and lecture rooms during their limited stay.

Want American Students.  
Cambridge is beginning to make a bid for American students who look to Europe as a field for postgraduate work. Formerly Americans had great difficulty in securing degrees of doctor of Philosophy in British universities, so they went to Germany. Cambridge now has arranged a Ph.D. Sir Geoffrey said, that will have a special appeal to American researchers.

English postgraduate students, like the Americans, used to go to Germany. To offset a resumption of that practice, Cambridge is arranging to have its men go instead to universities in the United States.

## WAGES MOUNT 50.3 PER CENT IN THREE YEARS, FIGURES SHOW

The average wage of Indiana industrial workers increased 50.3 percent, during the first six months of the present year over the average wage received during the same period of 1916. The increase over the average wage of 1917 is 48.5 percent, and over 1918 is 22.4 percent.

The percentages are based on reports received by the industrial board of Indiana in connection with 15,426 industrial accidents which occurred from January to June this year and on slightly larger and smaller numbers of cases reported during 1916, 1917, and 1918. The statistics include the wages of workers receiving from a few dollars a week to those who, on account of war conditions, have received as high as \$102 a week.

The average wage received by Indiana workmen during the half-year period of 1916 was \$15.61; 1917, \$15.80; 1918, \$19.90; and 1919, \$23.47. These figures indicate that during 1919 the average wage increased \$7.88 over 1916; \$7.67 over 1917, and \$4.28 over 1918.

The following table indicates the average wage by months of the 15,426 workers concerning whom reports were received during 1919.

January	\$23.30
February	29.09
March	23.12
April	22.81
May	19.62
June	22.88

## FEWER CITY BIRTHS; MORE IN COUNTY, AS RESULT OF WARFARE

The city birth returns for the year of 1919, until August 15th, were 56 less than the number for the same length of time the previous year.

Statistics show that 280 babies were born to Richmond people up until August 15, 1917, the year that the United States entered the war; 227 for the same length of time during 1918, while only 221 were born before August 15 this year.

County birth returns, however, tell a different story, as 182 babies were born in Wayne county outside the city up until August 15 this year, while only 171 were born during the same length of time in 1918.

One hundred and eighty-nine babies were born in Wayne county, inside of Richmond, during one year 1917, which marked the entry of the United States into the world war, till August 15.

## FRESHMAN CLASS OF 200 PREDICTED FOR EARLHAM COLLEGE

Students from 26 states and two foreign countries have already completed arrangements for entrance into Earlham College the coming semester, beginning September 15. There is already a dormitory overflow of 100 students, who are to be located in homes near the campus, President David M. Edwards announced Thursday.

Dining room facilities will be enlarged, however, the president said, so that all dormitory students will be able to board at the college.

Improvements are Completed  
President Edwards says that improvements on the building are going on satisfactorily, and will be completed by the opening of the fall semester. The chapel has been repaired and redecorated in an attractive manner. The fund providing for these improvements was increased considerably by the donation from the estate of the late George H. Knolesberg.

One hundred and eighty-three freshmen are now enrolled for the coming year and it is thought the number will exceed 200.

## Lift Off Corns!

Doesn't hurt! Lift touchy corns and calluses right off with fingers

Apply a few drops of "Freezone" upon that old, bothersome corn. Instantly that corn stops hurting. Then shortly you lift it right off, root and all, without pain or soreness.

Hard corns, soft corns, corns between the toes, and the hard skin calluses on bottom of feet lift right off—no humbug!

Tiny bottles of "Freezone" cost but a few cents at drug stores

Right Arm Almost Useless for Fifteen Years Tanlac Ends Rheumatism.

"Honestly, if I could sell the good Tanlac has done me, there is not enough money in the world to buy it," said Mrs. V. Waca, who lives at 1219 North Jefferson Avenue, Peoria, Illinois, the other day.

"For fifteen years I couldn't raise my right arm high enough to comb my hair," continued Mrs. Waca, "and I guess I would still be in that condition if I had not made up my mind to take Tanlac a short time ago. Rheumatism was my trouble, and nobody will ever know how I suffered those fifteen long years. Why, I could hardly dress myself on account of not being able to use my right arm. My liver was out of order all the time, too, and this caused me a lot of suffering. I was very nervous, and rarely ever got a good night's sleep. Finally I commenced to suffer from indigestion and my stomach got in bad condition. What I ate disagreed with me, and I often had headaches that would almost drive me wild. All these troubles together just about got the best of me, and I had failed so long to get relief from the different medicines and treatments I took, that I had about given up hope of ever getting any better.

"I finally made up my mind to give Tanlac a trial, and it wasn't very long after that until I commenced to feel better. Before I had finished my first bottle of this wonderful medicine I could feel the pain from rheumatism leaving my arm, and I also noticed that my appetite was improving. I have just finished my sixth bottle of Tanlac, and I can truthfully say that I never was in better condition in every way than I now am. I can use my arm as well as I ever could, and eat three hearty meals every day and never suffer a particle afterwards. My liver seems to be in perfect condition again, and I sleep like a child at night. It is actually hard for me to realize that I am so perfectly well after having suffered so many years. Tanlac did all this for me, and I will praise it as long as I live." Tanlac is sold in Richmond by Clem Thistlethwaite, in Greensfork by C. D. Corine, in Cambridge City by Mr. Dean Houser, in Pershing by Souther and Rodenberg, in Centerville by Centerville Pharmacy, and in Milton by W. L. Parkins.—Adv.

# BUILD NOW.

"Set Your Money to Work on Building a Home of Your Own."

U. S. Dept. of Labor, W. B. Wilson, Secretary

Set your money to work on building a home of your own. This is the period of readjustment, and idle dollars are as detrimental to the national welfare as idle men.

Building is a basic industry. To build a home, aside from the obvious benefits to the home owner, is to make an important and direct contribution to national readjustment and reconstruction.

First, the country needs thousands of homes. After that the home builder creates a demand for stone, bricks, lumber, hardware, concrete, paint, etc., etc., money circulates—only blood that circulates makes for health. Building absorbs labor. That is of prime importance right now when thousands of soldiers are being released from the Army and industry is in transition from the war to peace gear.

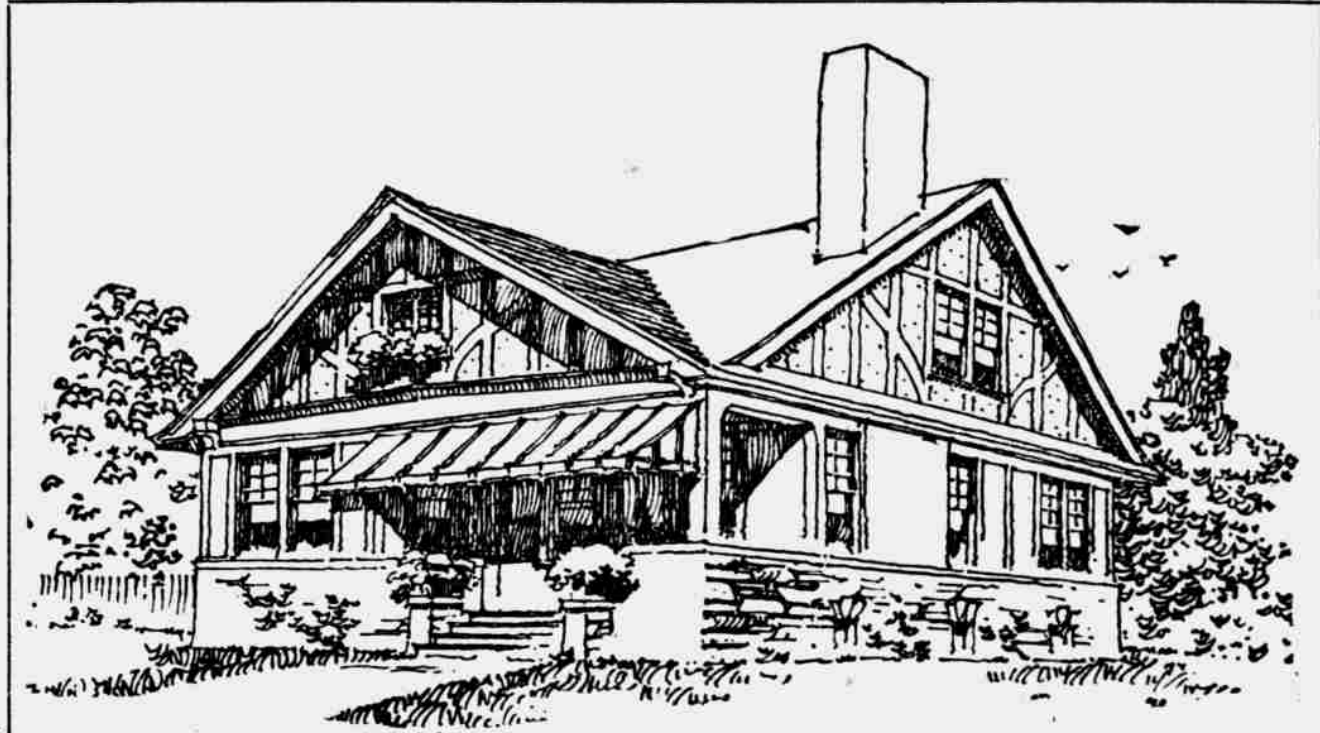

Your money, invested in building a home, works for your permanent prosperity and welfare and at the same time renders a not less tangible service to your country. Put your money to work—BUILD NOW.
