

PRECAUTION IS TAKEN AGAINST STRIKE DISORDER

Police to Guard Against Further Stone-Throwing—One Arrest is Made.

As an aftermath to disorderly conduct Wednesday evening, the police and officials of the Richmond Malleable Castings company took precautions Thursday to prevent further trouble.

The disturbance arose from the importation of strike breakers from Chicago. Two special policemen were sworn in by the police commissioners and are stationed inside the foundry.

According to one of the strikers, the trouble yesterday arose over the importation of about fifteen strike breakers from Chicago. The strikers returned to their work following an agreement Monday with the foundry officials, but found nonunion men at work. They walked out again.

Wednesday night, the imported workmen, who were staying at the Arlington hotel, were molested by the strikers and the police were called for. The police had some difficulty to control the crowd that collected outside the hotel, several stones were thrown at the strike breakers.

Or an affidavit filed by Frank Shellin, assistant superintendent of the castings company, Arthur Kilner, a moulder, was arrested for provoke and brought into police court Thursday morning. Shellin alleged that Kilner called him a "scab" and asked him "to come out and fight like a man." After admonishing Kilner, and issuing a warning that such actions would not be tolerated, Mayor Zimmerman dismissed the case. Kilner was released.

According to one of the strikers, the imported workmen have been moved from the hotel, and are quartered in one of the factory buildings. The strikers insist that these men must leave the city, and that the agreement made Monday with the company officials must be carried out.

Officials of the company, it is claimed, told the strikers that the imported workmen had been hired under contract and that they could not be released.

GOODRICH PAYS TRIBUTE TO MEN THAT TILL LAND

COLUMBUS, Ind., Aug. 28.—Governor Goodrich addressed the Columbus Grange at the fair grounds here Wednesday afternoon. He commended the tillers of the soil for their conservatism, their stability, their broadmindedness, their disposition to be fair and for their good citizenship. Discussing the high cost of living, the Governor said that it is a condition due to the war and that history is only repeating itself, in that like conditions followed every other big war. While the nationwide fight against the high cost of living in general and profiteering and hoarding in particular will help, it will not reduce the high cost of living to any considerable extent. Time and greater production alone can do that and he predicted that the cost of living would continue high for at least four years, despite all efforts.

He said conservatism, sound judgment and co-operation, with extra effort at greater production, instead of unsettled labor conditions, which are in restraint of production, will bring about desired conditions.

The Governor suggested that fewer big headlines in the newspapers and less general agitation of the question of the high cost of living would serve to hasten its reduction. He predicted that the high cost of living will right itself in time and that the farmers of the country will be potent factors in bringing back normal living conditions.

Reaction is Forecast.

He was asked if he expected that within a few years it would not be a question "with labor as to whether it should do eight hours of work for ten hours' pay, time and one-half for overtime and double time for Sundays and holidays, but one of getting work at all or at any price—a condition that has in the past followed eventually every national crisis, such as now confronts the United States."

The Governor cited the labor conditions at Gary and Hammond and said that the labor people of the two cities are being imposed upon by Socialists and I. W. W. propaganda of the most unfair and ridiculous sort.

Speaking of capital, the Governor said that he disapproved of the practice of the condemnation of corporations and their methods just because they are corporations; that justice should be done in all cases, but added that if the power were vested in him he would send to the penitentiary any one who profiteered or hoarded necessities out of wholly selfish motives and for individual gain.

Contractor Is Paid by Board of Works for South Ninth Street Improvement

The bid for the cement roadway in the alley running north and south between North Twelfth and North Thirteenth streets, and between North C and D, was awarded to Daniel Burkhardt, contractor, at 24 cents per square foot, by the board of works at their regular Thursday morning session.

The vacation of Randolph street from West 1st street to Richmond avenue was approved by the board. The approval of the \$5,000 payment to Joseph T. Gist, for his gravel pit north of the city was made.

The opening up of the track drains at Eighth and Main streets was referred to the street commissioner for co-operation with the street car company. It was hoped by members of the board that the drains could be opened before the fall rains set in.

The report submitted by Charles Kilpatrick, of Greenfield, who was the contractor for the improvements on South Ninth street, was approved by the board. The final estimate was placed at \$16,873.05, by Kilpatrick, and the amount immediately due him is \$16,936.27. Five per cent of the estimate is being held back by the city for a year, when, if the improvements are substantial, it will be paid to the contractor.

Confirmation of a sewer in the first alley running east and west north of South E and between South Sixth and

South Seventh running from the South Eighth street sewer in South Eighth street east in the alley to the alley running north and south between South Sixth and Seventh, was made by the board.

Fire Chief Miller was granted permission to buy two additional stoves for the fire department. The board will not hold a Monday session because of Labor Day.
