Catarrah Specialist Coming to Richmond

WILL GIVE FREE EXAMINATION AND ADVICE

MEDICAL DIRECTOR OF INDIANA CATARRH INSTITUTE TO GIVE TALK ON CATARRH AND TUBERCULOSIS

Chronic catarrh of the nose, throat and lungs is so prevalent and it is so often the forerunner of fatal diseases like tuberculosis, influenza, asthma, hay fever and others that the Indiana Catarrah Institute, permanently located at 1436 North Illinois street, Indianapolis, Ind., is sending their medical director to a few points to examine and advise sufferers from this disease on how to prevent or cure it.

Catarrh, besides being extremely disagreeable and annoying, with its continual coughing, hawking and spitting, is positively dangerous, as it leads to many fatal diseases and undermines the strength and health of the whole system. It is a stubborn disease to cure, requiring the skill of an expert and experienced specialist to properly rid the system of it in a short time. It is very seldom, if ever, cured by patent medicines, mail order treatment, home remedies and the like.

The Indiana Catarrah Institute is a large institution, devoted entirely and exclusively to the treatment of catarrh. It has a staff of specialists who have devoted more than sixteen years to the study of this one disease.

There is no other institution like it in this country, and their methods used in curing catarrh are different from any other in this country. Their methods can be used either in the Institute or in the home, according to patients' convenience. Anyone visiting Indianapolis is invited to call at the Institute and investigate their methods and results. But for convenience, it is well to see the medical director; an expert specialist, when he is in this city.

His examination, consultation and advice is free. He invites everyone who is afflicted with chronic catarrh of the nose, throat or lungs, chronic cough and bronchitis, dropping mucus in the throat, pains in the chest, shortness of breath, clogged up head and nostrils, head noise, catarrhal deafness, hawking, and spitting or any chronic catarrhal condition, to be examined and get his advice without charge or obligation. He will be glad to talk with you, giving you the benefit of his skill and experience freely.

Beware of tuberculosis and other fatal conditions by taking treatment in time.

The specialist will be at the Arlington Hotel Monday, September 8, from 9 a. m. to 3 p. m., one day only, and will examine all who call to see him.

For further information either call in person or write the Indiana Catarrah Institute, 1436 North Illinois street, Indianapolis, Ind.—Adv.

Men Recovering From Auto Accident Injuries; Accounts Conflicting

John Brehm, 2112 North F street, foreman at the Watt Casket factory, and Jonathan Shurley, son of Jerome Shurley, North E street, were slightly injured when the buggy in which they were riding collided with the touring car owned by Edwin Cates, 224 North Eleventh street, near the farm of Clem Gaar on the New Paris pike, about 4 o'clock Saturday afternoon.

Brehm said the Cates car was going at a fast rate of speed and that the driver was unable to stop it for a hundred yards. Brehm and Shurley were hurled down a 30-foot embankment, they said. The injured men were taken to their homes.

Cates said his car was not going

more than 12 miles an hour; that his driver sounded the horn and the buggy in which Brehm and Shurley were driving turned out to allow them to pass. As they attempted to pass, the horse suddenly turned in on the automobile, he said. He said the buggy did not leave the road but that the horse stumbled down the embankment, a shallow one of about 5 feet, according to him. As he observed, neither occupant of the buggy was hurt in the least, Cates said.

I Take No Chances With My Baby

WHEN I found I couldn't nurse my baby any longer, I made up my mind to find a food for him that would be safe—that would be sure to bring him health and happiness.

I knew raw cow's milk was hard for him to digest because of the tough curds—and I was afraid of the dangers of germs, particularly in hot weather.

And then my doctor told me the safest form of milk—the easiest to digest—the nearest thing to mother's milk—was Nestlé's Milk Food. My baby has thrived and grown in health and happiness ever since.

Nestlé's is pure milk in powder form that is already modified and does not require the addition of milk. Always pure and safe, always uniform and free from the dangers of home modification, Nestlé's has stood the test of three generations and has today the largest sale of any baby food in the world.
