

AUGUST WEATHER BENEFITS CROPS, REPORT IS MADE

Corn Makes Big Gains, Crop Is 90 Percent of Normal in Wayne.

INDIANAPOLIS, Ind., Sept. 10.—The weather during August was considerably more favorable to crop conditions than July, according to the reports of the Indiana Co-operative Crop Reporting Service issued today. Of the remaining crops to be harvested, corn is the only important one and shows an increase of 4,052,000 bushels over the August report.

White potatoes show a further decline, but sweet potatoes and tobacco remain about the same and there was practically no change in the fruit crops. An indicated production of 2,520,000 tons of tame hay and 64,800 tons of wild hay is shown. There are 8 per cent less hogs on farms for fattening than a year ago, and the production of wool was 5 per cent greater.

Clover seed is very disappointing. Only 65 per cent of last year's acreage will be harvested and the condition is such that not more than two-thirds of an average crop will be produced. Timothy and alfalfa both indicate a smaller yield than usual, but millet shows a slightly larger yield than a month ago.

Tomatoes and cabbages are somewhat better than the August report indicated, but onions show a further decline. The production of melons is about 85 per cent of a normal crop and the quality exceptionally good. Sorghum cane, sugar beets and broom corn each show a better condition than in August. The report follows:

Corn shows a slight improvement over last month notwithstanding many localities have had but little rainfall during the month. Bottom land generally shows the best condition and sandy land the poorest, although all of it is more or less spotted. On a condition of 77 per cent of normal, a crop of 169,127,000 bushels is indicated.

Spring Wheat Away Down.

Much of the spring wheat acreage was left unthinned and none of it made more than one-half what was anticipated earlier in the season.

On a condition figure of 76 per cent of normal at time of harvest, a crop of 65,051,000 bushels is forecasted at this time, which is about three-fourths of what was anticipated.

White potatoes continued to decline in most localities, although the very late planted seemed to "set" well and with favorable weather conditions should make a good crop.

Sweet potatoes in the commercial districts show a slight improvement, while those for home use show a decline over the August condition figures.

Apples, peaches and pears show practically no change since the last report, but grapes show an improvement of five points.

The number of hogs on farms for fattening is three percent less than a year ago, slightly more than the average number at this time.

The total production of wool is five percent greater than last year and ten percent above the usual.

Clover left for seed is only 65 percent of last year and the condition is very poor. This means not more than two-thirds of a crop.

Only 82 percent of the usual timothy acreage was harvested this year with an average yield of 1.2 tons per acre. Alfalfa also shows ten percent less acreage than usual and an average yield of 2.3 tons per acre. A crop of 2,520,000 tons of hay is forecasted.

Heat Kills Pasture.

The excessive heat in the early part of the month did so much dam-

age to pastures that favorable weather later could not bring the condition figure up to last month.

Tomatoes and cabbages indicate a slightly increased condition figure, but thrips have been so bad in the onions that a further decline of seven points is shown over last month.

On an acreage somewhat less than usually harvested 84 percent of a normal crop of watermelons and cantaloupes were produced, the quality of which was excellent.

In the United States, all crops remain about the same as last month. On the principal crops reported on September 1, the condition and indicated production is as follows: Corn, condition, 80.0; production, 2,858,000,000 bushels; spring wheat, condition, 48.5; production, 208,000,000 bushels; oats, condition, 73.1; production, 1,225,000,000 bushels; barley, condition, 69.2; production, 195,000,000 bushels; potatoes, condition, 69.5; production, 349,000,000 bushels.

The following table shows the condition of four principal crops in the counties surrounding Wayne.

County	Corn	Pot. Tim.	Alf.
Blackford	94	35	1.5
Delaware	91	45	1.2
Henry	90	35	1.1
Jay	91	32	1.3
Randolph	86	44	1.3
Union	96	45	1.3
Wayne	90	56	1.3

New Garden, Ind.

Miss Esther Cox, of Canada, is spending a few days with her sister, Mrs. William Collins. The Home Economics Club of New Garden neighborhood, will hold a picnic here Friday evening, September 12, from five to seven o'clock, followed by a community sing to which everyone is cordially invited. Mr. and Mrs. C. J. Martin entertained relatives from Plainfield, Ind., Saturday and Sunday.

Mr. and Mrs. John Rothmerel, Mr. Will Rothmerel and Miss Eva Rothmerel attended the state fair Wednesday and Thursday, and visited relatives in Hancock county and at Indianapolis.

Mr. and Mrs. M. E. Frazier have returned home after a few weeks' visit in Michigan.

Mr. and Mrs. Oscar Bailey entertained for dinner Sunday Mr. and Mrs. Richard Paulson of Richmond and Mr. and Mrs. Gerald Frazier and daughter, Helen.

Mrs. Sarah Barr spent Sunday with Jennie Huff.

Among those who attended the state fair Friday of last week were Mr. Luther Leibold, Mr. Clarence, Harold and Lawrence Brinkley.

Mr. and Mrs. Will Rothmerel and family spent Sunday with Mr. and Mrs. Cleo Rothmerel, east of Whitewater.

Mr. and Mrs. Luther Leibold and family motored to Marion and Hartford City Sunday to visit relatives there.

Brave Chaplain Receives French War Decoration

CAMP FUNSTON, Kas., Sept. 10.—In the closing days of the war, when American troops in the Puynelle sector were advancing on Metz under terrific artillery bombardment, a chaplain laid aside the rather advisory duties of his rank and for two days and nights helped in evacuating the wounded men under a withering enemy fire, without regard for his own safety.

That chaplain was Ora J. Cohee of the 34th Infantry, 7th Division, and for the bravery he displayed under fire, the French government has awarded him the Croix de Guerre with gold star, which was presented to the chaplain this week by Brig.-Gen. Wahl, commander of the 7th Division.

The commander of the 7th Division proposes that all Kansas and Missouri men receiving decorations from his own government or from foreign governments come to Camp Funston for a formal presentation, and has arranged for a dinner by the divisional staff and use of the band and troops of the division in the ceremony.

A National Problem Solved

Pure, Wholesome Food + Nujol = Health

PURE, wholesome food is necessary, but it is not enough. The purest, most wholesome food will hinder rather than help health if allowed to clog the colon—the large intestine. And doctors agree that about 90% of our ailments are caused or intensified by constipation.

Some part of even the purest and most wholesome food is waste. If this waste is not kept moving out of the body, it stagnates and breeds poisons which saturate the system and cause or nourish disease.

The old, wrong way to attack such stagnation was to force a passage through the impacted mass.

The new, right way to overcome it is to let Nujol induce easy self-elimination.

And since health is as much a matter of how we eliminate waste as how we assimilate food-fuel, it must become evident to every thinking person that the use of a natural, drugless lubricant is as sensible and necessary as the eating of pure, wholesome food.

The three vital processes upon which health is based are Mastication, Assimilation, Elimination. Therefore, the perfect recipe for health is thorough Mastication, Pure, wholesome Food, and Nujol.

Try this trinity. Get a bottle of Nujol from your druggist to-day.

For valuable health booklet—"Thirty Feet of Danger"—free, write Nujol Laboratories, Standard Oil Co. (New Jersey) 50 B'way, N.Y.

Warning: Nujol is sold only in sealed bottles bearing the "Regular as Clockwork" label. Nujol Trade Mark as shown here. Beware of products represented to be "the same as Nujol". You may suffer from substitutes.

FEDERATION ASKS EVIDENCE ON GRAIN HANDLING PRICES

INDIANAPOLIS, Sept. 10.—Indiana

\$2,394 at New York, they are being cheated. And most of them have been getting only \$2.11 or less. The United States Grain Corporation has not agreed to set a reasonable handling charge, but has undertaken to adjust any individual cases brought to its attention.

"15 Cents a Bushel." Indiana grain dealers deny any collusion in setting a standard for handling charges, although they held a meeting and compared notes on some 73 elevators. Since that meeting, the handling charge throughout Indiana has averaged around fifteen cents per bushel.

"The public gets no benefit when we are trimmed by profiteers, for it goes on paying high prices for flour just the same. It is such profiteering operations as this that keep up the high cost of living, and we intend to do what we can to block the profiteer."

Federation officials have already presented some cases of profiteering to the grain corporation, are awaiting decision. Thus far, however, they have not succeeded in obtaining a decision as to a fair handling charge.

The eight-cent standard in Illinois last year, was the result of a Food administration ruling.

"We want every farmer in Indiana

who has been charged too much by the grain dealer for handling his wheat, to sit down and write his story to us. We plan to prepare some blank affidavit forms, and our idea is to have them filled out and sworn to, before filling them with the grain corporation.
