IF BACKACHEY OR KIDNEYS BOTHER

Eat Less Meat, Also Take Glass of Salts Before Eating Breakfast.

Uric acid in meat excites the kidneys, they become overworked; get sluggish, ache, and feel like lumps of lead. The urine becomes cloudy; the bladder is irritated, and you may be obliged to seek relief two or three times during the night. When the kidneys clog you must help them flush off the body's urinous waste or you'll be a real sick person shortly. At first you feel a dull misery in the kidney region, you suffer from backache, sick headache, dizziness, stomach gets sour, tongue coated and you feel rheumatic twinges when the weather is bad.

Eat less meat, drink lots of water; and get from any pharmacist four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to clean clogged kidneys and stimulate them to normal activity, also to neutralize the acids in urine, so it no longer is a source of irritation, thus ending bladder weakness.

Jad Salts is inexpensive, cannot injure; makes a delightful effervescent lithia-water drink which everyone should take now and then to keep the kidneys clean and active. Druggists here say they sell lots of Jad Salts to folks who believe in overcoming kidney trouble when it is only trouble.—Advertisement.

You'll build better with "PERFECT QUALITY" Lumber

No Argument About It Now---

NO! THERE'S NO ARGUMENT ABOUT IT now. You who have been pessimistically inclined, yet have lived to see America shoulder cheerfully the burden which the war imposed upon her and yet go forward during 1919 with one of the biggest building programs the country has ever seen, must admit THAT IT'S TIME TO BUILD.

WHEN IN ALL HISTORY have dwellings been so scarce? When have industries lent so willing ear to expansion of housing facilities as during the past 12 months? Costs have been high to be sure but rewards either immediate or forthcoming have been and will continue to be higher.

AND BEHIND ALL THIS IS PRESSING NECESSITY. Building must go forward or progress will cease. The rising generation must have homes in which to live, shelters in which work and the energy and initiative of a citizenship which has made the United States the dominant nation of the world today, will continue to provide the way where the will is in evidence.

EVERYTHING POINTS TO THE SPRING OF 1920 as the signal for one of the greatest building movements ever known. The great war taught humanity many lessons, none more valuable than the possibility of personal sacrifice for a great cause. Now that war's emergency is past the tide of individual resourcefulness is turning toward POSSESSION. There is a world-wide movement for acquisition or improvement of the home of one's own.

THE QUESTION IS "Are you or are you not going to take your place in this procession of individual progress?" You can if you WILL. You'll be in the minority, nursing an everlasting regret, if you today do not begin to plan and determine to achieve.
