DID YOU THINK EAR PUFFS WERE NEW? LOOK AT THESE

At the left is the twentieth century version of the ear puff and at the right is a belle of the seventeenth century with her idea of the proper ear puff.

Those flappers who think they are very original and ultra-modern with their hair arranged in the prevailing ear-puff style may be interested to know that the fashion is centuries old and is merely a

very modified copy of a style which was popular in the seventeenth century. The photograph at the right shows Marie de Rabutin Chantal, Marquise de Sevigne, a celebrated French author, as she

appeared at the height of her popularity. She was born in 1626 and died in 1696. Her ear puffs are so elaborate and the entire hair arrangement is so intricate that the modern style looks very plain and conservative in comparison.

"Gompers' ultimatum" to obey the American Federation of Labor or suffer defeat in the coming election, hasn't made me flinch," Blanton continued.
