

MISSISSIPPI TURNS DOWN SUFFRAGE AS HOUSE BALKS, 94-23

JACKSON, Miss., April 1.—The Mississippi House of Representatives Wednesday again refused to ratify the suffrage amendment by a vote of 23 to 94. The measure passed the Senate Tuesday.

The action was positive and regarded as final, a motion to disagree with the senate's resolution favoring ratification having been carried.

There was an uproar of "Noes" on the floor when a demand was made that telegrams from Democratic leaders urging ratification be read. Speakers who sought to support ratification were hooted and jeered.

Governor Lee M. Russell, who had been expected to deliver a "little talk" to the House urging ratification, did not make an appearance.

Membership is Short.

Of the 140 members of the house only 117 were present.

When the resolution was rejected in February 121 members were present, 106 voting against and 25 for ratification. Leaders on both sides today intimated the belief that the decreased attendance favored their cause.

Telegrams from Democratic leaders in all sections of the country were received today by Speaker Connor and house members urging that Mississippi, a Democratic state, enfranchise the women of the nation before the Republican legislature of Delaware, where the question also is pending, could act.

**Says His Prescription
Has Powerful Influence
Over Rheumatism**

Discoverer Tells Druggist Not to Take a Cent of Anyone's Money Unless Allenrhu Completely Banishes All Rheumatic Pains and Twinges.

Mr. James H. Allen suffered for years with rheumatism. Many times this terrible disease left him helpless and unable to work.

He finally decided, after years of ceaseless study, that no one can be free from rheumatism until the accumulated impurities, commonly called uric acid deposits, were dissolved in the joints and muscles and expelled from the body.

With this idea in mind he consulted physicians, made experiments and finally compounded a prescription that quickly and completely banished every sign and symptom of rheumatism from his system.

He freely gave his discovery to others who took it, with what might be called marvelous success. After years of urging he decided to let sufferers everywhere know about his discovery through the newspapers. Your druggist has been appointed agent for Allenrhu in this vicinity with the understanding that he will freely return the purchase money to all who state they received no benefit.—Advertisement.

Birds of Indiana You May Not Know

(Furnished by the State Department of Conservation.)

The scarlet tanager is sometimes called the "black-winged redbird," "pocket bird" and "Canada tanager." The adult male is about six and a half inches long, and has a wing extent of ten and a half inches. His general plumage is scarlet; the wings pointed and black.

The adult female is green above and yellow below; the wings and tail are brownish black, edged with green. The scarlet tanager comes north in May and departs early in September, wintering in the southern states and tropics.

The food of these birds consists principally of those kinds of insects which frequent and do injury to our forest trees. They eat chiefly caterpillars, beetles, spiders and grasshoppers. They are also known to eat ants, ichneumon flies, dragon flies and leaf chafers.

**VIRGIN WOODS SLAIN IN
SICKENING ORGY OF WASTE**
INDIANAPOLIS, Ind., April 1.—Friends of conservation in Indiana are appalled at the sickening waste of a tract of 191 acres of virgin timber, part of the Lusk estate in Parke county, owned by a veneer company of Indianapolis, where giant oaks and other forest monarchs are falling before the woodsman's axe, and, as they crash to earth crush out the life of hundreds of smaller and immature trees.

Start to Occupy Big New Building in Next 45 Days; Being Finished

Actual operation in the new six story building of the Starr Piano Company will probably be started within the next 45 days. Construction has been practically completed and only finishing touches remain. Machinery and equipment are already being installed.

The building will be used entirely in the manufacture of pianos. Only parts will be made there, however, as even the six story building does not contain enough space for the complete piano business of the company. The new building causes the Starr Piano company to step into first place as having the largest factory in town.

This honor was held by the Gaar-Scott Company, but with its dissolution the A. S. M. took the lead. The Starr also has the greatest number of employees.

FRANCE TO GET COAL
BRUSSELS, April 1.—A contract has been framed between the ministry of devastated regions of France and the Belgian government by which France would receive 100,000 tons of coal monthly and in return would pledge favorable treatment for certain Belgian products, according to the Soir, which says the compact would be signed soon.

**"Tiger Rose" Melodrama,
Holds Interest at Murray**

With a clever cast, endowed with good voices and adapted to the roles, "Tiger Rose," a stirring melodrama of the Hudson Bay region, was excellently presented on the Murray Theatre stage Wednesday evening. Willard Mack, the author, has designed a thrilling tale replete with tense moments.

Miss Maria Ascaraga, an emotional actress of ability, played well her role of Rose Voclon, "Tiger Rose," a French Canadian of great loves and hatreds. Elmer Grandin as Hector MacCollins, factor of the Hudson Bay Trading Post, played a clever part. His characterization was also good, as was that of Jack J. Bertin, playing Dan Cusick, M.D., formerly of Boston.

Mr. Bertin's carriage and voice modulation were both excellent.

Constable Michael Devlin of the Royal Northwest Mounted Police, was first and last, faithful to his duty to his position. He was admirable as an egotist.

WaWa, a squaw, played by Miss Emilie Lessing, was typical, feeling

rather than thinking out her grunted opinions.

BUG-OLOGY FIGURE THIS OUT

Bedbugs lay an average of seven eggs per day. Under favorable conditions they hatch in five days of which two-thirds are females. They mature to adult size and are capable of laying in four weeks. How many bedbugs would you have in a year if you left one female or egg unmolested for one year? To rid the pesky bedbug, you can readily see how necessary it is to use a preparation that will kill the eggs as well as the live ones. P. D. Q. has been demonstrated by the leading Hospitals, Hotels and Railroad Companies that the safest and most economical way to stop future generations of bedbugs, roaches, fleas and ants is to use the new discovery, Pesky Devils Quicker.

A 25c package of P. D. Q. makes a quart, enough to kill a million bedbugs, roaches, fleas and cotes and at the same time destroy their eggs as well.

Impossible for them to exist when P. D. Q. is properly used. Free, patent spot in every package to get the pesky devils in the hard-to-get-at places.

Special Hospital and Hotel size \$2.50—makes five gallons of P. D. Q.—your druggist has it or can get it for you, or sent prepaid upon receipt of price by the Owl Chemical Co., Terre Haute, Ind. Success of P. D. Q. has caused imitators; genuine P. D. Q. is never peddled. D. & S. Drug Co., Quigley's Drug Store and A. G. Luken & Co.—advertisement.
