And NOW Brunswick Records

WE are introducing, after years of preparation, Brunswick Records. They, too, are unlike any you have known before. They bring a new principle in phonographic recording. Each Brunswick Record is interpreted by a noted director or an accomplished artist technically trained in the art of recording. Thus we unite the talent of the artist with the genius of the composer. This is a step which you will appreciate once you make comparisons.

We feel sure that you will recognize the betterment brought out by this idea. We want you to judge Brunswick Records by the same severe tests with which people have judged Brunswick Phonographs. And that is by comparison. We leave the verdict to you.

Remember—Brunswick Records will play on any phonograph with steel or fibre needle.

Three
Million
Dollars

This illustration is a picture writing. Can you read it? It says: Thomas A. Edison combined his genius with three million dollars and produced the Official Laboratory Model of the New Edison—"the phonograph with a soul."

Always remember this picture-message. Remember the man at the top,—the man whose genius is responsible for it all,—Edison the wizard, Edison the idealist. Remember the three million dollars spent, the seven years he experimented,—the untiring research which spared neither men, materials nor money. Then you will always understand why the Official Laboratory Model of the New Edison is the ultimate development of the phonograph,—why its RE-CREATION of an artist's art and that artist's living art are without difference. Replicas of the original three million dollar model are in our store. You cannot estimate them in terms of other phonographs,—in anything except price. They actually cost no more. We'll put one in your home at once,—and let you pay for it at your convenience.
