The new phelactine process does not merely take off the hair-ends; it actually removes the roots! It does this quickly and harmlessly. It does not get anything like the depilatory, electrical, or other methods. Phelactine is non-odorous, non-poisonous, non-irritating. Get a stick of it from your druggist, follow the simple instructions, and have the satisfaction of seeing the roots themselves removed at last.—Advertisement.
