

## STRIKES DEPRECATED BY THE PRESIDENT OF MISS. VALLEY MEN

ST. LOUIS, April 20.—Pursuit of an aggressive foreign trade policy by the United States and enactment of federal legislation to guarantee industry against strikes were advocated by speakers at the opening session of the Mississippi Valley association convention today.

The United States is producing far more than is needed for domestic consumption, it was asserted, and foreign market must be found for this surplus.

Federal legislation guaranteeing industries against strikes was demanded by Harry H. Merrick, president of the association. He referred to the railroad strike and the recent steel and coal strikes, as "criminal attempts to stop production," and insisted that the resources of the twenty-seven states in the Mississippi valley be coordinated to effect this legislation.

"We must pool our resources," he asserted, "so that only those favoring legislation against these criminal attempts to stop production will be elected to congress."

**Urges Development of Industry**

Secretary of Commerce Alexander, in an address urged that the industries of America be maintained at the highest rate of efficiency so that they might compete aggressively for world trade. Capital and labor must cooperate, he asserted, to expand America's foreign commerce.

"With the reparation of European industries," he declared, "competition in the world trade will become more aggressive. If the Mississippi valley and the entire United States wishes to enjoy a fair share of the commerce in competition with Europe, it is necessary that our industries be maintained at the highest rate of efficiency."

Under the latter plan, members said, those exempted because their service was less than 60 days and who would be treated impartially, no payments being authorized to any one for the first two months' service.

## SONORA MOVEMENT LAID TO OREGON BY GEN. SERRANO

(By Associated Press)

**AGUA PRIETA, Sonora, April 20.**—Sonora and Mexican federal leaders today continued preparations for the clash expected as a result of Sonora's withdrawal of allegiance to the Carranza government. Heartened by reports that Francisco Villa definitely had aligned himself with their movement, Sonorans went about placing troops to prevent an incursion for Chihuahua, while at Juarez and Casas Grandes, federal officers prepared an invading force.

No more news from Sonora forces advancing against federal garrisons in Sinaloa was at hand. These forces hoped to take Mazatlan and Tepic, the latter the capital of the state of Nayarit, this week.

Sonora leaders declared they had numerous reports of a rising against Carranza in Chihuahua, one to which they attached considerable significance until it was convincingly denied, being that General Francisco Urbajeo had transferred his allegiance from the Carranza to the Sonora government.

**Points at Oregon**

## Will Build Factories, But Not Houses, Says F. W. Dodge Co. Report

(By Associated Press)

**NEW YORK, April 20.**—Delay in relieving the housing shortage all over the country is greater than in any other form of building construction, according to a review of contracts issued today by the F. W. Dodge company. Public works, industrial buildings and public utilities are being constructed much faster than residences, and are less affected by high prices, high wages and shortage of material.

Contracts awarded for residential buildings in the first three months this year vary from 14 to 29 per cent of total building contracts in different sections of the country. Normally residences account for about 30 per cent of the contracts, and in view of existing needs the review says, residences should represent about 40 per cent of the total construction.

In New York state and northern New Jersey 14 per cent of the contracts in the first quarter of the year represented residential buildings, "a matter of serious concern," says the review, "as it is probable that the housing shortage is more acute in this territory than anywhere else."

In the territory east of the Missouri river and north of the Ohio, residential construction was 19 per cent of the total, in England 23 per cent, in the district of Philadelphia, Baltimore and Washington 28 per cent, in the Pittsburgh district 19 per cent, in the central west 18 per cent, and in the northwest 29 per cent.

In no district is contemplated building construction as high as 30 per cent.

THE Montauk club of Brooklyn, N. Y., is making preparations to give its usual dinner on April 23rd in celebration of the birthday of Hon. Chauncey M. Depew. The famous after-dinner speaker will be 86 years old — or young — on that day.

"I have lived long because I enjoy life and try to help others to enjoy it," said Mr. Depew on his last birthday.

Peekskill, N. Y., where he was born, naturally regards Mr. Depew as its finest product. He gave a park to that town and set up a statue of himself in it. His friends express the earnest hope that time will have crumbled that statue before Chauncey M. Depew feels older than he does — or is today.

Mr. Depew is prominent in many railroad and banking corporations and has always been active in politics. He once received 99 votes for the presidential nomination. That was at the Republican national convention in 1888. He represented New York state in the United States senate from 1899 to 1911. He was the orator at the unveiling of the Statue of Liberty in New York harbor; at the centennial celebration of the inauguration of George Washington; at the opening of the Chicago Exposition in 1893, and at many other notable occasions.

## DRIVE ON T. B. IS STARTED AT MEETING

ST. LOUIS, Mo., April 20.—A national campaign to check the spread of tuberculosis will be launched at the convention of the National Tuberculosis association, which opens here tomorrow, according to delegates arriving tonight.

While the campaign, primarily, will be to prevent the disease, it was explained that nothing would be left undone to bring about cures. The campaign, it was amplified, is known as the crusade of the double-barred cross.

Anti-tuberculosis societies will be formed in every part of the country where such organizations have not been established, and crusaders will search out the estimated 2,000 cases of the disease in the United States and work to obtain adequate care for the sufferers, it was said.

An intensive educational program, directed at children as well as adults, will be worked out to prevent the spread of the malady, delegates asserted.

It was suggested that the phrase "fresh air fiend" be changed to "fresh air friend" and used as the slogan of the drive.

**Prescribes Cures.**

The Rev. W. V. Day of this city, one of the directors, prescribed plenty of rest, fresh air, and wholesome food as the best preventive of the disease.

The industrial and housing problems and laws to segregate tubercular patients who are a menace to the health of others, will be considered at the sessions, it was said.

There are about 1,000 anti-tuberculosis organizations in this country, and a representative of each society is expected to be registered at the convention before it ends Saturday.

Dr. Victor V. Vaughn of the University of Michigan, is president of the association.

## LET THE IRISH MUSS ALONE, IS ADVICE OF BRITISH ENVOY

NEW YORK, April 20.—Declaring that in this generation there is no quarrel between England and Ireland, Sir Auckland Geddes, New British ambassador to the United States, asserted on his arrival here Monday that the Irish in Ireland should be allowed to grapple with their own political difficulties, without outside interference.

Asserting that it takes two to make a quarrel, and that the present generation of Englishmen have steadfastly refused to quarrel with Ireland, he said that when the new home rule bill becomes operative, it "will be the duty of all British subjects who are not domiciled in Ireland to stand aside and leave those who live there to solve their problem."

"I venture to add," Sir Auckland continued, "that it will also be helpful if the many in all parts of the world who are not British subjects but are interested in Ireland, likewise stand aside and leave the Irish to grapple with their own political difficulties." Sir Auckland also referred to the Russian situation, stating that until Russia returns to the circle of producing and trading nations, economic conditions of the world and the cost of living cannot be placed on a normal footing anywhere. He added that the United States and Great Britain were in consultation on the question of reopening trade with that country.
