

## RAILROADS AND COAL COMPANIES SPLIT BY U. S. SUPREME COURT

(By Associated Press)

WASHINGTON, April 26.—The federal government today won its anti-trust suit against the Reading Company, and affiliated companies, in one of the so-called anthracite coal cases. By a vote of 4 to 3, the Supreme court sustained the government charges that the companies violated the "commodity clause" of the interstate commerce act, and ordered the dissolution of the companies.

The Reading and Central New Jersey railroads, the court decided, must dispose of stock ownership respectively of the Philadelphia and Reading Coal and Iron company, and the Lehigh and Wilkesbarre Coal company. Justice Clarke rendered the decision for the majority, while Chief Justice White, in a minority opinion, in which Associate Justices Holmes and VanDevanter joined, said the minority was in favor of accepting the opinion of the lower court, dismissing the government.

### High School

New members to the high school "R" club are to be taken in this week. This and plans for the annual party will be taken up at a meeting Monday afternoon.

All members of the high school senior class were notified to communicate with S. S. Vernon, if desiring to take the college entrance board examination.

Funds realized from the G. A. A.'s "jinx" dance in high school Wednesday evening, will be used for the annual "spread" of the organization.

### TWO BROTHERS ARE SUED FOR DIVORCE AT SAME TIME

The divorce case of Myrtle Helms vs. Earl Helms, of Centerville township, was taken under advisement Saturday afternoon in Wayne circuit court. Cruel and inhuman treatment is the charge.

Oscar Helms, a brother of Earl, is also defendant in a divorce case. His children are in custody of their mother pending decision.

## HOW TO RAISE BABY CHICKS

Put Avicol in the drinking water.

Most people lose half of every hatch, and seem to expect it. Chick cholera or white diarrhoea is the trouble. The U. S. Government states that over half the chicks hatched die from this cause.

An Avicol tablet, placed in the drinking water, will positively save your little chicks from all such diseases. Inside of 48 hours the sick ones will be as lively as crickets. Avicol keeps them healthy and makes them grow and develop.

Mrs. Vannie Thacker, R. F. D. 3, St. Paris, O., writes: "I had 90 chicks and they all died but 32." Then commenced on Avicol and haven't lost any since. They have grown wonderfully.

It costs nothing to try Avicol. If you don't find that it prevents and promptly cures white diarrhoea, chick cholera and all bowel diseases of poultry, tell us and your money will be refunded by return mail. Avicol is sold by most druggists and poultry remedy dealers, or you can send 25c or 50c today for a package by mail postpaid. Burrell-Duggan Co., 168 Columbia Bldg., Indianapolis, Ind.

## No Signs of Sanity Yet On Part of Public, Say Many Richmond Merchants

Some people are looking for bargains, but the vast majority is still willing to pay \$25 a yard for elite material, and a skimpy little tricolette house can be easily sold for \$15 or \$20, according to Richmond merchants who shake their heads over the possibility of making people happy with cheap materials.

"High prices have become such a matter of course with many of our customers," said a dry goods salesman. "Some people grumble a lot about the 'awful prices' but go right on and pay them without a noticeable wince. I believe most of this H. C. L. ghost stuff is mere hot air. Most people aren't dodging high prices."

Half an hour in a local dry goods store will convince the alert watcher that people are looking for style, and the price go hang!

"Of course, there are the sale-boys, but they generally end up by taking something better than they'd expected to," said another clerk.

### Biggest Hippopotamus In World, With Hagenback

When the Hagenbeck-Wallace circus comes to Richmond Wednesday, May 5, there will be on exhibition in the menagerie the largest hippopotamus ever brought to America. It reached the circus a few weeks ago and has been given a place of honor among the many other unusual specimens of far eastern animal life.

The huge river horse was caught in British South Africa by means of a pitfall—a deep trench, the mouth of which is covered by a network of moss and sticks to resemble the grassy earth. When the animal took his fatal plunge, he fought so ferociously that it required 50 natives to drag him from the dark hole and make a prisoner of him.

### WHITMAN DELIVERS ADDRESS FOR WEBSTER COMMENCEMENT

The Rev. Charles Whitman of Seymour, Ind., who has often appeared on the Richmond chautauqua platform, delivered the principal address at the Webster township consolidated schools commencement exercises Saturday evening.

Miss Mabel Williams and Marvin Hunt were the high school graduates. Those graduating from the grades were Mildred Wilcoxon, Charles E. Kem, Edward A. Waedick, Dudley C. Palmer, Charles H. Stoten and Charles R. Ellibee.

Will Moore is the trustee.

## What do your Clothes cost you?

When anyone asks you that question you probably think of the price you paid. That isn't the real cost.

The real cost is the price divided by the number of days you wear the clothes.

That's why we say your clothes will cost less if you buy them here. You get

# 60 Ton Miles of Motor Truck Freight Per Person

DURING 1917 (latest authentic figures available) motor trucks hauled 60 tons of freight a mile for every person in the United States.

Then the country was at war and the capacity of the railroads was overtaxed.

It is doubtful if even a small percentage of this enormous tonnage could have been moved except by motor trucks.

The management of the Standard Oil Company (Indiana), recognizing the necessity of furnishing facilities for supplying gasoline to automobiles and trucks as they traveled through the country, established Service Stations at convenient points throughout the territory served.

These Service Stations perfected the system of distribution maintained by the Company.

The drivers of this caravan of motor trucks which carried the 6 billion ton miles of freight in 1917 would have found their task more difficult of accomplishment had it not been for the network of Service Stations along the way.

While the Standard Oil Company was supplying a substantial share of the fuel consumed by these motor trucks, it also was supplying its regular patrons, and meeting the demands of the United States Government with great quantities of gasoline for war purposes.

Its preparedness, and its ability to meet an emergency, however unheralded the emergency may be, serves to emphasize one of the salient phases of the bigness of the Standard Oil Company (Indiana).

## REED'S REED'S

# Remarkable Cooking Secrets that will Revolutionize Your Cooking

When the "RED STAR" was put on the market, the secret of efficient cooking with the cheapest kerosene was made public. The perfection of the "Red Star" made possible for the first time the use of kerosene or other cheap oils without the aid of wicks or substitutes for wicks. It made possible a complete vaporization of all the heat units of oil and increased heating efficiency over thirty percent.

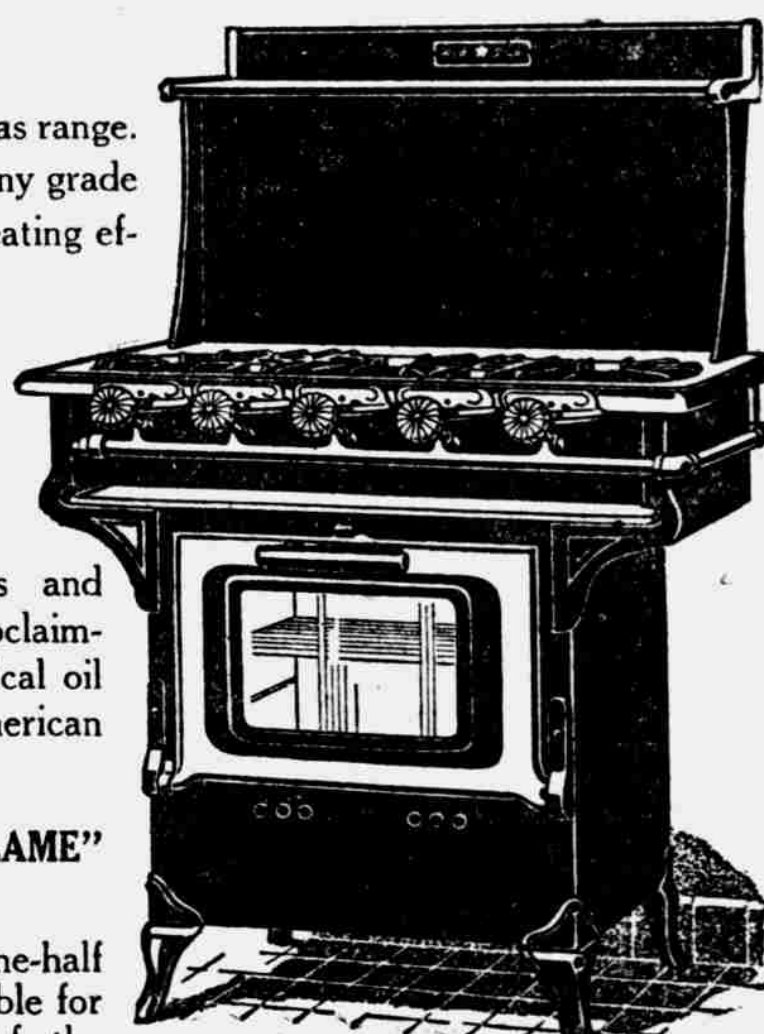

The "RED STAR" is really a gas range. It produces its own gas from any grade of liquid fuel. It increases heating efficiency over thirty percent.

**RED STAR**  
Detroit Vapor Oil Stove

Competent, official judges and countless housewives have proclaimed it to be the most economical oil stove ever offered to American women.

### FAMOUS "DOUBLE-RING FLAME" BURNER

It is the patented eight and one-half pound burner that is responsible for the greatest achievement of the "Red Star" Oil Range. This burner vaporizes all of the heat units of the fuel, leaving no trace of odor or smoke. It heats quickly. It can be heated to a fiery red heat or held to a low, even flame for slow cooking. It concentrates a double ring flame DIRECTLY UNDER the utensil.

### Beautiful, Efficient, Economical

Not only is the "Red Star" efficient and economical to operate, but it is a beautiful range. It is designed like a city gas range, a credit to any kitchen. It is raised on substantial legs, which permits sweeping under and around the stove. It is a sturdily built stove, capable of a lifetime of faithful service. Ask for a demonstration.
