GRAIN PRICES

CHICAGO, July 16.—Week-end approaching and some evening up is due. Otherwise no change in crop news. Cash corn and oats nervous and possibly unchanged to one cent higher. Southwest corn weak. One of the biggest cash grain concerns in the middlewest reports the edge is definitely off of export wheat. Bids are down 8 cents from yesterday. Buyers claim they are getting wheat at this reduction. The decline in all grains has been severe and a bulge would seem overdue. On the news, however, it is difficult to see how bulges will proceed far.

SAFE FARMING

Boll Weevil Infests Nearly Entire Cotton Belt

Only Co-operation Can Control the Ravages of the Pest

By F. G. HOLDEN

THE boll weevil is the most destructive insect enemy of the cotton plant. In 1892 it crossed the Rio Grande from Mexico near Brownsville, Texas. During the 28 years since then its invasion of the United States has been practically unchecked, until now it covers almost the entire area of cotton production, only about 115,000 square miles being free of the pest at the close of 1919.

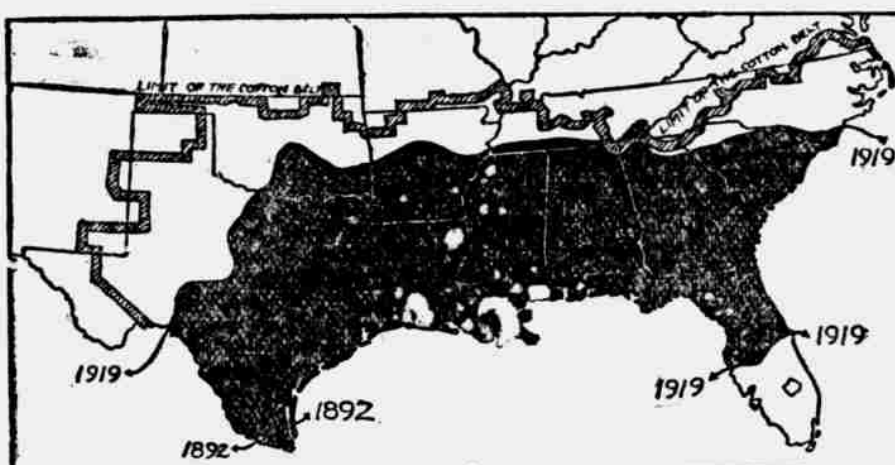

The boll weevil is a decided menace to the prosperity and welfare of America. It presents a problem that must be met with patience, perseverance and co-operation.

While the onward march of the pest has not been stopped, we have learned by experience how to fight it and if we will all work together, and all act intelligently, there seems little reason to doubt that eventually we can almost, if not entirely, eradicate it.

When the right methods are used, cotton production under weevil conditions becomes almost normal.

Best Way to Fight Pest.

The best methods of fighting the weevil are as follows:
1. Pick the cotton as early in the fall as possible, and immediately chop the stalks and turn them under. Not only will this return humus to the soil, but it will deprive the weevil of its food and force it into its winter quarters in poor physical condition, making it unlikely that it will survive the winter.
2. Select good seed of early maturing varieties. Let your local farmer, adviser or your agriculture college advise you as to the best variety for your locality. The earlier we pick our cotton, the earlier we can plow under the stalks and cut off the food supply of the weevil.
3. Plant as early as the soil is warm on well-drained land.
4. Begin cultivating early and cultivate frequently until picking time.
5. Hunt for and destroy the weevils as soon as they appear on the young plants. When the squares begin falling to the ground, be careful to have

Map Showing Invasion of United States by Boll Weevil Since 1892—Black Portion Shows Territory Covered by Pest. Heavy, Shaded Line Marks Limit of Cotton Belt.

them all picked up and burned. This will destroy many of the pests and prevent their spreading to other parts of the field.

These methods of fighting the boll weevil have made it possible to save one of the greatest of American crops from total destruction.

Poisoning the Weevil.

Early attempts to poison the weevil were far from successful, but in 1918 the Ditts laboratory at Tallulah, Louisiana, conducted experiments on 35,000 acres of cotton, using calcium arsenate in the form of a poison dust spray.

The results were considered satisfactory and were made public. Last year many cotton growers tried the plan with such success that it is more or less generally believed that this method of combating the boll weevil will spread rapidly.

But the use of a poison spray calls for properly devised machinery; it involves many details. For these reasons it is advisable that those who desire to use the method should secure full information from the laboratory at Tallulah.

The weevil eats nothing but cotton and goes into winter quarters close to the field, hiding in old stumps, piles of trash or wherever it can find protection.

Only a small per cent survive the winter; very few that go into winter quarters poorly fed live till spring.

Those that do survive, feed on the buds of the plants from the time the plants are very young until the squares are formed. When the weevil first appears in the spring it is very weak and is easily picked off the plants. This work is usually done by children, but a thorough job will pay big returns.

ures which will come before the special session have been introduced.

The house was to have for its consideration a number of bills passed by the senate yesterday under suspension of the rules. One of the most important is the appropriation bill for the maintenance of state institutions. The bill has already passed the house, but was amended in the senate so that \$650,000 was added to the total appropriations made in the house bill.

Harding by the Hartford Times, was sent the following reply: "I answer no."

COLUMBUS, Ohio, July 16.—Governor James M. Cox today promised a delegation of the national woman's party that he will give all his possible time, influence and strength toward procuring a ratification of the suffrage amendment by Tennessee.

He also advised them to appoint a committee to confer with him on a plan of action.

The Democratic nominee will not arrive in Washington for his Sunday conference with President Wilson until Saturday afternoon.

The governor today decided to leave Columbus on a later train this evening than had been originally planned, throwing his arrival in Washington several hours later.

One man stepped in it and cursed. Another almost stepped in it but by a desperate effort avoided it. Women and children, noticing it, stepped.

The large yellowish splotch on the sidewalk at Sixth and Main streets, was caused by a small girl when she dropped a paper bag containing eggs.

mate as to the number of wounded.

The rebel band is understood to be in command of Ricardo Gonzalez, former general in the federal army and a nephew of General Pablo Gonzalez, former candidate for the Mexican presidency. Lieutenant Colonel Manuel Ortega is federal commander at Nuevo Laredo.

SAN ANTONIO, Tex., July 16.—Amplification of official reports that General Pablo Gonzalez, former candidate for the Mexican presidency, had been arrested in Monterey at the order of Provisional President De La Huerta, on the ground that "Gonzalez" was the "intellectual director" of an alleged disloyal movement, was being sought by local Mexican consular officials today.

Has Been Prominent Figure.

General Gonzalez has been a prominent figure in Mexican military affairs for several years. In the revolt against President Porfirio Diaz he took an active part, and later was a military

leader under Provisional President Francisco Madero. He joined General Carranza in the latter's revolt against President Victoriano Huerta.

Several months ago he became an active candidate to succeed President Carranza. When the recent victorious revolt against President Carranza began gaining momentum General Gonzalez threw his forces with those of General Alvaro Obregon. In the political maneuvering which followed the fall of the Carranza regime, General Gonzalez announced the withdrawal of his candidacy.

The present charges against the general, according to President De La Huerta's communication, are based upon his alleged activity in the military plans of several officers suspected of disloyalty. An attack upon Monterey, Wednesday, and yesterday's unsuccessful efforts by General Ricardo Gonzalez to capture Nuevo Laredo are mentioned in the statement, which says:

"From sufficient data now in my

possession, I have reached the conclusion that the intellectual director of this movement is the general of division, Pablo Gonzalez."
