## PRESIDENT EDWARDS ASKS FOR WORKERS

"Wake up! Mr. Business Man; seriously unaware of the best interest for yourself and your community, you are dodging the responsibility of backing the Earlham college endowment fund campaign for \$500,000, by excusing yourself from all duties in the preliminary preparations," said President David M. Edwards, Monday.

"We want the citizens of this city to realize, especially the business men, that Earlham college cannot continue to show a deficit of \$30,000 at the end of each year, and survive. It is a question of selling the college to the people."

This statement of President Edwards followed a fruitless effort to obtain men to serve on committees. "I do not blame some men for not wanting to take up their time working for the college," said President Edwards, "but it is a case of have to. That is, if they wish to keep the college in operation."

"Why should we have to seek financial assistance every year from outside sources when directly and indirectly an annual expenditure of \$500,000 is made in Richmond or through Richmond business channels? It is certainly for their benefit, and not merely a matter of charity, to keep the college in smooth working condition."

Monday night a meeting will be held to determine who the members for the local committee will be.

## PACT ON SHIPPING HAILED BY GERMANS AS TRADE REVIVAL

(By Associated Press)

HAMBURG, July 19.—As further particulars come to light regarding the agreement between the Hamburg-American Steamship company and the American Ship & Commerce corporation, by which the former German trade routes are to be opened to American shipping, the belief is deepening in shipping and financial circles here that it constitutes one of the most momentous events for Germany since the war.

Through it the Germans see the means of regaining touch with the outside world and an opportunity for Hamburg to re-establish a semblance, at least, of its former position as a great port. But apart from the commercial benefits expected, the Germans attach much political significance to the agreement.

Cuno Emphasizes Point

This was emphasized today by Wilhelm Cuno, general manager of the Hamburg-American line, who, in an interview with The Associated Press, declared:

"I call your especial attention to the fact that the agreement must not only be considered from a business viewpoint, but must be regarded as a trial at re-establishing good relations between the two countries. The way we have taken will be the only possible one to resume relations between Germany and foreign countries in the near future. The war left a deep gulf between the belligerent countries and disorganized entire economic order. The normal state of things can only be restored if representatives of economic interests endeavor to link mutual interests in a new and more binding connection than was possible in pre-war times."

Sees Best Proof

Herr Cuno stated the Spa conference supplied the "best proof that co-operation of nations can not be effected by a victorious government dictating decrees to a beaten government."

"The experience of our negotiations with the United States confirms this," continued Herr Cuno. "From the first day we took up discussions with the full knowledge that this first renewal of friendship on an important and vital point would have to be sincere and binding."

Erect New Plant

Meantime on the lower end of Hamburg harbor a new shipbuilding plant which, it is said, is destined to be the largest in Europe, is nearing completion. The Hamburg-American line is one of the principal stockholders in this concern, which will begin operations within 18 days and facilities for quickly doubling its capacity.

Shipping, rather than chartering vessels is expected to be the Hamburg-American line's aim, owing to the necessity of securing uniformity in the type of ships employed in the joint service. A representative of Mr. Hariman, it is understood, is coming to

Hamburg in September to confer with officials of the line on this matter.

Work on Ships

Contrary to belief prevalent in Germany that German shipbuilding is a futile task as the bulk of new tonnage will have to be turned over to the allies, it is asserted here that the amount of tonnage Germany must deliver within the next two years remains unsettled and that the amount is still indefinitely placed at "up to 200,000 tons."

Before the war German shipyards turned out about 800,000 tons of shipping annually. If the yards succeed in obtaining credits and materials enabling them to resume on their former scale, it is believed only a few years will elapse before Germany again will possess an imposing merchant marine. Trade organizations of the shipping companies are said to remain intact and they have 60,000 unemployed sailors to draw upon to man new vessels.

TAMPICO WORKERS RETURN

MEXICO CITY, July 19.—The 48-hour general strike in Tampico partly ended today, when the street car men, electric railwaymen and chauffeurs resumed work. No agreement between the petroleum companies and their striking employees has yet been reached, according to Excelsior.

## Rail Congestion Blocks Chinese Troop Changes

(By Associated Press)

TIENTSIN, July 18.—Railway service with Peking has again been interrupted by a collision near Yangtsun. As a result there is much congestion of troops trains from Mukden. A regular train left Yangtsun Sunday and replaced the derailed engine, but was unable to proceed further because of congestion due to the arrival of Anhui reinforcements.

The Peking-Tientsin line is single tracked, crossings being possible only at stations. Haphazard running of trains by inexperienced soldiers is also aiding in the almost hopeless confusion. Nine trains are stalled in one section alone near Yangtsun.

The gates to the city of Peking were closed Sunday to keep out refugees and defeated Anfuites. One division of Anfu forces has already arrived here from Mukden, another is on its way and a third is ready to start when trains are available. Fighting has begun on the Chihli-Shantung border. Tientsin is quiet.

A silent, keyless clock, which contains only four wheels and no springs, is a late invention.
