## A Mistaken Idea

MANY PHONOGRAPH OWNERS have the idea that Gennett Records will only play on the Starr Phonograph, while the fact of the case is they can be played on practically every make of machine. Gennett Records are the lateral type, therefore exactly the same type as the other leading makes on the market, and you can therefore play them on your machine. You really owe it to yourself to come in and hear a demonstration of a few of the many splendid recordings we carry in stock, as you will be able to get more pleasure out of your phonograph by having Gennett Records among your collection.

## NEW MEASURE

(Continued from Page One)

they favor the employment of the former plant engineer, Mr. Gluys, to supervise the installation of the unit on the theory that the improvement can be provided much more cheaply under this plan.

### See Economy.

These councilmen point to the fact that the estimated approximate cost to have the unit installed by the company from which the unit is purchased would be \$20,000 as against an estimated cost of \$175,000 under the plan they advocate.

This argument is answered by board members with the statement that experts have informed them that the installation of a 5,000-k. w. turbine is a delicate piece of work and that it is advisable to place such responsibility on the contracting company, which must guarantee that the work is perfectly done; that if local talent handled the work the city would assume all responsibility in the event of an accident due to faulty installation.

### Prevents Bidding.

Although council by its action Monday evening left it to the discretion of the board as to how the unit should be installed, the fact remains that if council at its next meeting persists in appropriating only \$175,000 it is almost certain that no bids for the unit will be submitted, because the proposed appropriation is less than the estimated cost of the unit with the installation to be made by the contracting company.

Council at its meeting a week ago appropriated \$100,000 and prospective bidders refused to negotiate for the contract.

Howard Gluys addressed the council. He declared that he was thoroughly competent to install a 5,000-k. w. turbine and offered to supervise the work at a charge of \$10 per day.

CLEVELAND, Ohio, July 20.—After being trampled on by hundreds of pedestrians, securities worth \$20,000, lost by a Federal Reserve Bank messenger, were picked up by an unidentified man and taken to a bank.

## LIBERTY COMPANY MUST PAY TO CITY INCREASED RATES

In authorizing a new schedule of increased rates for the Richmond municipal electric plant the Indiana public utilities commission has apparently denied the petition of the Liberty Light and Power company, which purchases its current from the municipal plant, that no increase be made in the rates the Liberty company has been receiving from the local plant.

The new Richmond electric rate schedule, it is understood, provides a considerable increase in the Liberty company's rate, approximately 80 per cent.

It is learned, however, that the state commission will give ample protection to the Liberty company in the form of increased electric rate schedules for all Indiana towns served by the Liberty company, namely, Liberty, West College Corner, Boston and Brookville. It is understood that until the commission can formulate new rate schedules for these towns temporary schedules, retroactive to July 1, will be established.

### Protests Increase.

"When E. L. Lewis, of the state utilities commission, was in Richmond last week to hear the petition of the local municipal plant for increased rates the Liberty company protested against its own rate being increased. Mr. Lewis indicated that this protest would not be considered," said City Attorney B. C. Robins.

"Mr. Lewis questioned Mr. Perk, accountant employed by the city to formulate its new electric schedule, as to how much of an increase was contemplated for the Liberty company, and Mr. Perk stated that it would be approximately 80 per cent.

"At that time Mr. Lewis indicated that the Liberty company would have to stand its proportionate share of rate increase, stating, however, that

Howard Gluys addressed the council.

He declared that he was thoroughly competent to install a 5,000-k. w. turbine and offered to supervise the work at a charge of \$10 per day.
