

WORLD LEAGUE SEEN AS ONLY SOLUTION BY DR. A. D. REES

The general world situation was summed up by Dr. Arthur D. Rees, of University of Pennsylvania, in his last lecture Friday afternoon. The talk was attended by a large crowd, which has been increasing each day for his lectures.

Dr. Rees is the possessor of a remarkable fund of facts in reference to political and economical conditions all over the world, both past and present, and his talks were interesting and enlightening.

The great struggle in the world now is for oil, said the speaker. The secret movements of troops in Mesopotamia can be accounted for in that Mesopotamia spells oil.

Oil is needed by the world and, some arrangements should be made whereby the matter can be settled amicably. If Armenia had had some commercial attractions, she would not have suffered as she has. As it is, the Americans in Armenia are known only for their charity, schools, and Christianity.

"The Armenians prefer an American mandate," he said, "and if it were to be given to us the thing for us to do would be to go into the country and develop some sort of commercial enterprise. We must prevent another Poland in the East and see that Armenia gets a boundary line on the Mediterranean Sea."

Says Britain Is Satisfied

In particular reference to Great Britain and the league of nations, Dr. Rees said:

"The foreign policy of Great Britain represents the struggle between the east and the west. The external and interior policies of Great Britain are not alike.

"The interior policy has always been progressive and democratic. But because of the power of the cabinet to make secretarial treaties without considering parliament the foreign policies have not yet been democratic to the extent that the home policy has."

History of the aggressions of England in the East and events leading up to the occupation of Constantinople. Mesopotamia and her policy in regard to the Turk were all summed up by Dr. Rees. In reference to Lloyd George, he said:

Says Premier Is Bully.

"Lloyd George wants to boss, to reign supreme. He has more power than any man in the world today and wants to keep supreme command in order to operate. He is in command of the supreme council, and he bosses Millerand."

"If the league of nations is to function properly the supreme council must be abolished. The council does not want the league. The league is no good now, but it is an instrument that can be used. But I believe that all international matters, large and small, should be in the control of the league. The struggle between the East and the West can be settled by the league of nations.

America Must Enter.

America should enter the league. It will not destroy patriotism. We can make the covenant amount to something. If we uphold our national sovereignty as we always have it will be the league way."

"Mr. Wilson did not refuse suggestions of other Americans in the matter of the covenant. He made changes at the advice of Mr. Root, Mr. Lodge, Mr. Borah, Mr. Reed and others. We must enter the league and see that all problems are settled in the league and that the mandates are carried out."

In conclusion, Dr. Rees said that if America knew the truth about the Eu-

tated as the last one was, by money, and have been economical and all economical questions would be settled by the league. One of the finest adjuncts of the league is already completed, said Dr. Rees, and that is the world court which Mr. Root has helped to organize.
