it his duty to see that the child has the necessary instruction when approaching adolescence.

Girls must be prepared so that menstruation does not come as a shock to their sensitive natures and so they do not take any risks of injuring their health. In a simple manner the girl can learn something of the anatomy and physiology of the generative organs so that she will understand that menstruation is a normal process of preparation for future motherhood. She will understand that it should be the occasion of no especial concern if she gives her entire body the care and exercise necessary to keep it in a good condition. She will understand that this portion of her body is sacred and not allow familiarities that might wreck her future.

The boy should be instructed as to the care of his external organs and the effect of conservation of secretion upon his bodily vigor so that he will not risk the loss of manly vigor by self-abuse. Also, he should understand that seminal emissions at night several

times a month are natural and not a cause of worry such as to lead him to quack physicians.

Both the boy and girl should understand that the new sensations and impulses that come to them at this age are indications that their bodies are being prepared for the duties and responsibilities of future parenthood and that this explains the desires which, if understood, may be controlled by wholesome living and healthful exercise.

The Growing Child

[A series of articles prepared especially for The Palladium, by the United States Public Health Service, Washington, D. C.]

If during his progress from babyhood to adolescence the child has formed the habit of confiding in his parents, if these parents have not failed him at the critical moment when he asked the first question regarding sex, adolescence comes as a natural sequence to other talks between parent and child.

However, if the parent has missed this opportunity of companionship with his child he (or she) must deem

Home-made Remedy Stops Coughs Quickly

The best cough medicine you ever used. A family supply easily and quickly made. Saves about \$2.

You might be surprised to know that the best thing you can use for a severe cough, is a remedy which is easily prepared at home in just a few moments. It's cheap, but for prompt results it beats anything you ever tried. Usually stops the ordinary cough or chest cold in 24 hours. Tastes pleasant, too—children like it—and it's pure and good. Pour 2½ ounces of Pinex in a pint bottle; then fill it up with plain granulated sugar syrup. Or use clarified molasses, honey, or corn syrup, instead of sugar syrup, if desired. This you make a full pint—a family supply—but costing no more than a small bottle of ready-made cough syrup.

And as a cough medicine, there is really nothing better to be had at any price. It goes right to the spot and gives quick, lasting relief. It promptly heals the inflamed membranes that line the throat and air passages, stops the annoying throat tickle, loosens the phlegm, and soon your cough stops entirely. Splendid for bronchitis, croup, hoarseness and bronchial asthma.

Pinex is a highly concentrated compound of Norway pine extract, famous for its healing effect on the membranes. To avoid disappointment ask your druggist for "2½ ounces of Pinex" with directions, and don't accept anything else. Guaranteed to give absolute satisfaction or money refunded. The Pinex Co., Ft. Wayne, Ind.
