

AMERICAN ARMADA TO IMPRESS WORLD SAY NAVY LEADERS

WASHINGTON, Oct. 18.—The two great fleets that the Navy Department plans to send around the world next June will be the most powerful that have been assembled under the American flag, it was stated today. Each will include approximately 110 units, selected with the greatest care from 200 or more available.

As described by officials today, this stupendous armada is aimed to be "a spectacle that will impress the world with America's naval power."

The Atlantic fleet, which first will visit South America and South American ports, it was learned, will include the dreadnaughts Pennsylvania, Arizona, Oklahoma, Nevada, Kansas, Utah, Florida, Delaware, North Dakota, Michigan, South Carolina, Minnesota and New Hampshire. A sufficient number of battle ships will be added to increase the total.

Big Type Ships.

The full number of first-class fighting craft will be 20. Ten cruisers, 80 destroyers and 10 auxiliaries will complete the ensemble.

Impressive as is the proposed Atlantic fleet, it will be exceeded in fighting power by the Pacific fleet. The most powerful unit in that force will be the new dreadnaught Tennessee, put into commission this week and now taking on torpedoes at Newport preparatory for her trip through the Panama Canal.

Tennessee is Latest.

The Tennessee measures 32,000 tons, being more than twice the size and having four times the fighting strength of the battle ship Connecticut, which headed President Theodore Roosevelt's fleet around the globe. Next will come the new superdreadnaughts Idaho and Mississippi, followed close in gun power by the New Mexico, which has the distinction of being the only dreadnaught in the world driven by electric power.

The dreadnaughts Wyoming, Arkansas, Texas and New York also have been assigned to the Pacific fleet, which will include 12 additional battle ships.

Eight cruisers, approximately 80 destroyers and 10 auxiliary ships will complete the force. It will visit Honolulu and Samoa before proceeding to Australia, New Zealand, Tasmania and Van Dieman's Land.

This grand maneuver, which will be complete only after the two great fleets have exchanged a number of their units somewhere between South Africa and Van Dieman's Land, will occupy a year.

Large Crowd Attends First Christian Revival

**Tuberculosis in Greece
Unchecked by Government**
(By Associated Press)

ATHENS, Oct. 18.—Tuberculosis is more prevalent in Greece than in any other European country for which reliable figures are available, with the possible exception of Serbia. There is no governmental or private program for the control of the disease. The number of physicians in proportion to the population is one to every 1,360.

In the city of Athens the death-rate, from tuberculosis of the lungs is 294 per 100,000 of population, which is about twice as high as the rate in the United States. The other forms of the disease also are present, making the total tuberculosis death-rate 365 per 100,000 of population. One death in every six is due to tuberculosis.

Agencies Are Inadequate.

To deal with the disease, the existing agencies are very inadequate. There is little or no hospital provision for the care of the bulk of the population of 5,000,000. There are less than a score of general hospitals in the country.

There is also an alarming prevalence of typhoid fever, which at times rises to the proportion of an epidemic. Even in the larger cities such as Athens, the typhoid death-rate is strikingly high. In the last three-year period for which statistics are available the death rate was 59 per 100,000 of population, about five times as high as the rate in the United States.

Poor Water Supply.

The prevalence of this disease is due largely to the absence of sewers and of adequate and safe water supply. No improvements in the water supply or sewerage systems have been made since 1908. The rudimentary sewerage system, where any exists, affords little or no protection against surface or underground contamination of water supply, and no safeguard against conveyance of infection.

In Athens, plans have been drawn by the national government to provide

NOTED NORWEGIAN WOMAN IN AMERICA

Miss Lily Heber.

The convention of the World Brotherhood Federation now being held in Washington is being attended by delegates from all parts of the world. Miss Lily Heber, doctor of philosophy at the University of Christiania, Norway, is the only foreign woman delegate.

the city with adequate and modest water and sewer systems. But the execution of these plans has been delayed by the war. The water supply in Athens is at present brought in through an aqueduct built by the Emperor Hadrian nearly 2,000 years ago. In the summer months the water is insufficient to carry off the sewage.

KENTUCKY PRISONERS MAKE
MOONSHINE WHISKY IN JAIL
(By Associated Press)

HENDERSON, Ky. Oct. 18.—Investigating the odor of burning rags, jailor Rod Davis discovered a moonshine still in the city jail. Prisoners had made their fire from pieces of blankets and had distilled more than a pint of liquor from corn bread saved from jail rations.

BREMEN WILL ESTABLISH
AIR PORT ON HUGE SCALE
(By Associated Press)

BREMEN, Oct. 18.—Eleven million marks have been subscribed for the establishment of an air port here on a huge scale with an extensive aero-drome, custom house, hangars, repairing shops, signalling apparatus, and every improvement to facilitate international aerial navigation. This will place Bremen in a far better position than Hamburg which has not exhibited the same interest in aviation.

Better Than Whiskey for Colds and Flu

**New Elixir, Called Aspironal,
Medicated With Latest
Scientific Remedies, Used
and Endorsed by European
and American Army Surgeons
to Cut Short a Cold and
Prevent Complications.**

**Every Druggist in U. S. In-
structed to Refund Price
While You Wait at Counter
if Relief Does Not
Come Within Two Minutes.**

**Delightful Taste, Immediate
Relief, Quick Warm-Up.**

The sensation of the year in the drug trade is Aspironal, the two-minute cold and cough reliever, authoritatively guaranteed by the laboratories, tested, approved and most enthusiastically endorsed by the highest authorities, and proclaimed by the common people as ten times as quick and effective as whiskey, rock and rye, or any other cold and cough remedy they have ever tried.

All drug stores are now supplied with the wonderful new elixir, so all you have to do is get rid of that cold, step into the nearest drug store, hand the clerk half a dollar for a bottle of Aspironal and tell him to serve you two teaspoonsful with four teaspoonsfuls of water in a glass. With your watch in your hand, take the drink at one swallow and call for your money back in two minutes if you cannot feel your cold fading away like a dream within the time limit. Don't be bashful, for all druggists invite you and expect you to try it. Everybody's doing it.

When your cold or cough is relieved, take the remainder of the bottle home to your wife and babies, for Aspironal is by far the safest and most effective, the easiest to take and the most agreeable cold and cough remedy for infants and children.—Advertisement

Primer for First Voters

1. Vote early.
2. The polls are open from 6 a. m. to 6 p. m.
3. Vote in the precinct where you live.
4. If you don't know your precinct, call up 2020, county auditor's office for information.
5. According to law, every employee of a factory or business institution must be given four hours in which to vote.
6. Vote straight party ticket.
7. Why? Because it is the quickest and safest way to vote.
8. How do you vote the straight party ticket?
9. By making a mark inside the circle at the top of the ballot.
10. Remember, this is the only mark you make on the ballot if you vote the straight ticket.
11. If you want to "scratch the ticket," do NOT mark within the circle. Put a mark in the square opposite the names of the candidates.
12. Do not cross off any name on the ballot. This will lose your vote.
13. Women should give their names as "Mary Smith" not "Mrs. John Smith."
14. Do not ask for a Republican ballot or a Democratic ballot. All ballots are the same and will be given to you as you enter the polls without asking.
15. Do not discuss politics outside or inside the polls. If you do your vote may be challenged.
16. Do not tell people what your politics are. For instance, do not say "I am going to vote the Republican ticket," or the Democratic or the Socialist or any other ticket.
17. Be sure to fold your ballot correctly. If you do not know how you will be told at the polls how to do so.
18. If you spoil your ballot, you can say so, hand the ballot back and another one will be given you.
19. All women who can do so should vote in the morning to give men and women, who cannot get to the polls until late in the afternoon, plenty of time.

New Safety Instruments Adopted by Mine Bureau

CHARLESTON, W. Va., Oct. 18.—The West Virginia Bureau of Mines which is credited by experts with the best equipment in the country for rescuing entombed miners has just added to its outfit for that work three new pieces of apparatus—a geophone, a carbon monoxide detector and a brass encased thermometer.

The geophone is similar to a physician's stethoscope. As the stethoscope is used to detect irregularities in the human body by sound, so the geophone is used to detect earth sounds. In this way entombed miners can be located noting the direction from which the sound vibrations come.

The brass-encased thermometer records maximum and minimum temperatures whereby it can be ascertained when it is safe to enter mines sealed with the shafts, but with the thermometer dropped through a hole in the barricade, this can be determined easily.

The carbon monoxide detector is considered the most important piece of apparatus from the point of protecting the lives of rescuers. The gas is detected by a color tube and a color scale on the instrument. Formerly canary birds were used, but their use was not entirely satisfactory, as the birds often succumbed to other gases while a color detector instrument shows no other gas than carbon mon-

oxide present. One-tenth of one percent of the gas is said to be fatal to a human being.

Compulsory Farming Text Of Proposed Argentine Law

BUENOS AIRES, Oct. 18.—Compulsory farming is provided for in a bill just introduced in the chamber of dep-

utes with the idea of forming an economic army to be composed of the youth of Argentina who are not called into the army and navy under the conscription law. If this measure becomes a law every young man in the country who does not take up a rifle or go to sea will be set to raising wheat and doing other farm labor. Although compulsory military service is in force in Argentina, only a small part of the young men actually go into the service at present, these being selected by lot, and as a result, according to La Nacion, there is some dissatisfaction because of the exemptions. If the new law is passed, says the newspaper, it will result in the cheapening of food stuffs and some of the vast tracts of uncultivated public land in Argentina can be put to producing food.
